Rutgers gets $98,000 from seed royalties

Seed Research of Oregon has given more than $96,000 in royalty payments to Rutgers University. The royalty payments were based on sales of SR4000, SR4100, and SR4200 perennial ryegrasses; Titan tall fescue and SR3000 hard fescue. All of these varieties came out of Dr. Reed Funk's turfgrass breeding program.

Royalty payments in excess of $4,000 and $6,000 were also made to the University of Rhode Island and Arizona State University, respectively, for sales of improved creeping bentgrasses, Providence and SR1020.

Architects to see Britain's best at conclave

A 10-day tour of English golf courses will constitute the bulk of the American Society of Golf Course Architects' annual meeting.

Beginning April 20, the North American architects will visit some of England's great courses, meet with English architects, greenkeepers and historians, and discuss the future of the game with European counterparts.

The annual Donald Ross Dinner will be held at the Broughton Park Hotel in Broughton, Preston, on April 23. Each year the society presents the Donald Ross Award to someone who has made a significant contribution to golf, especially in focusing attention on the contributions its architecture has made to the success of the game.

ASGCA President Dan Maples said the architects have included Royal Birkdale, Royal Lytham and St. Anne, Southport, Ainsdale, Royal Liverpool, Sunningdale, Wentworth, Royal Cinque Ports and Royal St. George's on their English tour.

Officials of each course will provide historical and architectural information. ASGCA members toured Scotland in 1980 and Ireland in 1989.
