Invention
Continued from page 78

Casey and his family saw commercial opportunities in the tee and began showing the tee to golf course superintendents, asking for suggestions about how to improve the product. One immediate result was deleting the grass seed and fertilizer from the mixture. "Superintendents didn't like that idea," Casey said. "There are a lot of different types of grass on different courses, and we didn't want bent grass growing on a bluegrass course because of the tee."

After consulting with Hauser Laboratories in Boulder, Colo., all ingredients were changed.

"The new version doesn't have any of the original ingredients," said father John. "Superintendents were unhappy with the idea of fertilizer on the course that they didn't apply, or the thought of bent shooting up through Bermuda, so we came up with a new formulation." The lab also helped ensure that the end product met all the strength and rigidity requirements necessary to make the tee usable during a round of golf.

The commercial finished product, BIO-T, is produced by Bio Dynamics Ltd., the company formed by the Goldens to manufacture Casey's invention. The BIO-T is virtually indistinguishable from a conventional golf tee, except for its enhanced biodegradability. Broken and immersed in water, a BIO-T will dissolve in about 24 hours.

The tees are treated with a ultraviolet-sensitive chemical that ensures that even intact tees will break down if left exposed to the elements. "The result is priced competitively with personalized tees," said John Golden. "And it offers obvious environmental appeal. If a golf tee can be sexy, we're sexy."

Casey's talent as an inventor has earned him considerable media attention and a trip to Japan, but he has no plans to turn his hand to any new projects right away. "I kind of want to see this invention all the way through before I start another one," he said.

He hasn't let the possibility of entrepreneurial success distract him from his two primary concerns, which remain school and improving his golf game.

The youthful inventor leaves the details of running Bio-Dynamics to his father. "I'd better not make him mad," said John Golden. "He'll fire me."

Mechem takes reins from Blue at LPGA

DAYTONA BEACH, Fla. — Charles S. Mechem Jr. has replaced the fired Bill Blue as commissioner of the Ladies Professional Golf Association. Mechem, 60, retired last June after 24 years with the Great American Broadcasting Co., formerly called Taft Broadcasting Co., executive committee. He served as chairman and chief executive officer from the time he joined the company in December 1976 until he retired. He then assumed the chairmanship of Great American Broadcasting Co.'s executive committee.

A native of Nelsonville, Ohio, Mechem graduated in 1952 from Miami University in Oxford, Ohio, then attended Yale Law School, graduating in 1955. He joined the law firm of Taft, Stettinius & Hollister, where he became a partner and remained until joining Taft Broadcasting Co.
