Koban® turf fungicide kills Pythium instantly—on contact.

Keep Koban on hand because, left untreated, Pythium can spread like wildfire.

Koban is the most effective Pythium control available. In over 20 years of use, there’s never been a reported case of resistance. It’s the brand more and more superintendents are using, because they know they can trust it, completely.

Koban is available in two convenient formulations—30% wettable powder or 1.3% granular. You can spot apply the granular without interrupting play. And increase the effectiveness of your systemic preventive program by rotating in either formulation at low rates.

Call your Grace-Sierra distributor today. Or for more information call us toll-free at 1-800-492-8255.

And get a case or two of Koban right now. Keep it handy, just like you do a fire extinguisher.

Just in case...

In Case Of Pythium Break Open This Case.
The most important people in the golf course industry make our front page every month.

People like Joe Black, President of Western Golf Properties, Inc..., consultants and managers of more than a dozen courses from coast to coast.

If you want to reach 20,000 of the most important people in golf... decision-makers at every course in America, call Golf Course News today.

It's "addressed" for success.
Pumping Systems, Inc. manufactures custom made prefabricated water pumping systems that provide maximum efficiency and low operating cost exclusively for turf grass managers. Extensive research has been conducted by PSI engineers over the past seven years to seek improved water pumping techniques including the design and construction of Variable Frequency Drive (VFD) controlled pumping systems. Since 1988, PSI has delivered VFD systems to turf grass irrigation projects across the United States.

Today, PSI continues this research and development effort in order to provide the most reliable systems available. Some standard features include: U.S. manufactured, state-of-the-art VFD; custom designed computer control software; dehumidified air cooler for the control panel; power filter; and system capacity relief valve. These features ensure the durability, reliability and operator confidence required for today's turf irrigation pumping systems.

PSI has a factory trained national service network. For prompt service or more information about the finest turf irrigation pumping systems available, contact your nearest dealer or:

Superior fairway mowing.
In head-to-head comparisons, the LF-100 delivered superior fairway mowing, in all kinds of grasses.

It starts with exclusive Jacobsen heavy-section, 22” reels. They stand up to challenging fairway conditions and follow ground contours closely for a smooth, manicured cut at production mowing speeds of more than 5 mph.

**Exclusive down-pressure system.**
For the ultimate in cutting performance, add the unique, dual-spring down pressure system. It puts the pressure at the rear rollers, where it’s needed, to show off your fairways’ best features.

**Lightest footprint.**
The LF-100 has the lightest footprint in the industry. It delivers minimal compaction even on the softest fairways.

Prove it to yourself. Contact a Jacobsen distributor for a demonstration on your course against any fairway mower. Let the LF-100 give you and your fairways a superiority complex.
