MAINTENANCE SURVEY

Superintendents at nation’s best courses respond

Developer submits chem-free plan

Sherman Hollow’s Truax draws fire, support over Green Life use

By Peter Blais

HUNTINGTON, Vt. — Hoping to end a six-year battle to gain state environmental approval, Sherman Hollow developers will submit plans to manage the controversial golf course without pesticides or fertilizers.

Sherman Hollow, Inc. will present details of its organic turf management program at a July 25 hearing before the same Vermont State Environmental Board that voted 2-1 against the project last September because of fears regarding pesticide and fertilizer use.

“The use of a non-toxic soil conditioner called Green Life, in conjunction with an organic program, will allow the course to be maintained without chemicals, according to Sherman Hollow President Paul Truax.

“This should remove concerns about the use of pesticides and fertilizers on the proposed golf course that, for the last six years, have prevented Sherman Hollow from receiving a golf course permit from the state of Vermont,” Truax said.

Green Life has been researched and tested on several courses over the past 10 years by a Glendale, Calif., company hoping to make inroads into the environmentally conscious

Maintenance costs high all around

From staff reports

Paced by a double-digit increase in payroll taxes and employee benefits, golf course maintenance costs rose 7.8 percent at private country clubs in 1990, according to a recent survey of 250 facilities.

Last year’s increase brings the national average figure to $7,996 per hole and continues the spiraling cost of golf course maintenance, which has jumped 500 percent in the past 20 years, reported the international accounting firm Pannell Kerr Forster in its annual publication Clubs in Town & Country.

The highest per-hole costs occurred in the Far West, $34,328. The South, $27,443, East, $25,143, and Midwest, $22,567 followed.

Nationally, payroll ($14,031) along with payroll taxes and employee benefits ($2,718) averaged 61.4 percent of per-hole maintenance costs. The $16,749 total is more than four times greater than the $3,800 spent on the same items 20 years ago.

Why have labor costs risen so dramatically? Golfers’ demands for perfect conditions simply require greater numbers

Florida lawmakers put water law on hold

By Peter Blais

The Florida Legislature will delay action until next year on a proposed water tax that could greatly impact the state’s $5.5 billion golf industry.

The Legislature adjourned last month before committees released bills to levy a 10-cent charge on every 1,000 gallons over a water user’s allotment—a fee some estimate would cost many courses $20,000 to $30,000 annually.

A lot needs to be worked out before the Legislature goes forward.”

— Bobby Brantley

But Gov. Lawton Chiles has promised to make passage of a water tax a top priority when the Legislature reconvenes early next year, according to Florida Golf Council Executive Director Bobby Brantley.

“We’re pleased the bill didn’t pass,” Brantley said. “A lot needs to be worked out before the Legislature goes forward with plans to tax water consumption.”

Besides raising much-needed revenue, tax supporters say the extra charge

GCSAA out $1.4M to McLoughlin

By Mark Leslie

The Golf Course Superintendents Association of America will appeal a May 9 jury verdict in a Topeka, Kan., federal district court awarding $1,457,742 to former Executive Director James McLoughlin.

The jury verdict awarded McLoughlin $457,742 for breach of a separation agreement and $1 million for libel — $500,000 compensatory damages and $500,000 punitive damages.

GCSAA attorney Robert Ochs said he would first file motions with Judge Richard Rogers for a new trial, and if that is denied, he will appeal the decision to the U.S. Court of Appeals for the 10th Circ.
