risk facing a suit from the owner," Eldredge says. "What if the green fails for some reason? The owner will come back and ask, 'Why did you go against the USGA? You'll never win that one in a court of law.'"

Hurdzan adds: "There has been a liability problem for those who specify the USGA method because it has a measurable performance standard. If you claim a car goes 150 miles per hour and it goes only 145, then someone can sue. If you just say this car is dependable and it goes fast, there is no basis for a suit."

"Isn't it a pity that the fear of being sued should overshadow principles of good turfgrass management and add immensely to the cost of golf course construction?"

"It must be recognized by all golfers that tournament-paced putting surfaces can stress the grass plant beyond its ability to survive. Keeping super-fast greens on a routine basis is flirting with failure, no matter how the green is built."

"The key to great putting surfaces is a good superintendent and not some root-zone voodoo."

GOlf Resources busy in Japan and California

Representatives for Golf Resources, Inc. have just returned from Tokyo, Japan, where they broke ground on Iwaki Golf Course. Byron Nelson, design consultant on the project, and his wife Peggy led the contingent to Japan to take part in the four-day groundbreaking ceremonies. This is Nelson's first project outside the United States, while it is the second of four projects Golf Resources is involved with in Japan.

The 27-hole championship course will be completed in 1994 and will be the centerpiece of a full destination resort.

The firm also just recently completed a nine-hole bunker renovation of Cottonwood Valley Country Club at Las Colinas, Calif. GRI was charged with renovating the original nine holes to compliment the nine-hole addition previously completed by Jay Morrish.

The firm has also been working on some of APGMC's overseas golf course projects since 1986. APGMC's Chief Operating Officer, Robert Holzman, said: "Miller's addition allows us to better serve our clients who now extend to Singapore, Germany, and the United Kingdom."

"Miller's experience will allow us to work on multiple courses, as well as continue to provide the high level of service to our current clients' projects," Holzman added.

ORLANDO, Fla. — Mark F. Miller has been named associate agronomist with Arnold Palmer Golf Management Co. and will be based out of the Orlando office.

Meanwhile, Tracy Kennedy was appointed national marketing coordinator.

Miller has been working on some of APGMC's overseas golf course projects since 1986. APGMC's Chief Operating Officer, Robert Holzman, said: "Miller's addition allows us to better serve our clients who now extend to Singapore, Germany, and the United Kingdom."

"Miller's experience will allow us to work on multiple courses, as well as continue to provide the high level of service to our current clients' projects," Holzman added.

Miller, previously director of agronomics for Desaru, an IMG/Arnold Palmer-managed project in Malaysia, was responsible for construction of its five 18-hole courses and sod farm.

Prior to Desaru, Miller was responsible for the 36-hole golf course, lawn bowling greens and grass tennis courts for Sanctuary Cove Resorts in Australia—also an APGMC-managed project.

Miller graduated with a degree in business administration from Florida State University in 1981.

Kennedy has been working with the Palmer firm for one year as a marketing and communications consultant. She has more than 10 years of experience in management of corporate communications, marketing, public relations and advertising.

Peace of mind and healthy turf.

With Daconil 2787®, you get the broadest-spectrum contact-fungicide protection on the market. And a history of 20 years without a known case of disease resistance. Which is why more course superintendents make it the cornerstone of their turf management program.

It controls 12 major diseases, including Leaf spot, Melting out, Brown patch, Dog's tooth, and Rust, on all Southern grasses. Especially on Bentgrass tees, greens, and overseeded turf. And it's the most economical fungicide per day of control on the market.

You can also use it on many ornamentals.

Get Daconil 2787 in your disease management program, and you'll be seeing green.

ISK Biotech Corporation, Turf & Specialty Products Division, 5966 Heisley Road, PO. Box 8000, Mentor, OH 44061-8000.

The cornerstone of your turf management program.

Always follow label directions carefully when using turf chemicals.
