In Case Of Pythium Break Open This Case.

Koban® turf fungicide kills Pythium instantly—on contact. Keep Koban on hand because, left untreated, Pythium can spread like wildfire.

Koban is the most effective Pythium control available. In over 20 years of use, there’s never been a reported case of resistance. It’s the brand more and more superintendents are using, because they know they can trust it, completely.

Koban is available in two convenient formulations—30% wettable powder or 1.3% granular. You can spot apply the granular without interrupting play. And increase the effectiveness of your systemic preventive program by rotating in either formulation at low rates.

Call your Grace-Sierra distributor today. Or for more information call us toll-free at 1-800-492-8255.

And get a case or two of Koban right now. Keep it handy, just like you do a fire extinguisher. Just in case...

How you can take advantage of the opportunities.

**Design & Construction**

Whether your project is located in North Dakota, Mexico or Indonesia, you have entered into an international marketplace. Find out how to design and construct a development that will attract more golfers and maximize your profits. Discover which designs are favored for your project and most importantly why. You will be afforded insights on how to avoid costly overruns and other hazards. Find out how, when and you should look for when selecting your designer. Construction in Mexico requires a special knowledge. Find out how to do it from those that have!

**Management & Operations**

A primary reason why golf and resort developments fail is because they are too costly to operate. Find out how you can avoid this pitfall and many others. You will get insider strategies and tips on managing the project to maximizing your profits. You will also discover how to select the right management firm, what questions to ask and why. Can you run your own operation and how to go about it if you're up to it. These are just some of the need to know ideas you will gain.

**Market Feasibility & Valuations**

The single most important issue to obtaining financing and attracting deep pocket investors is a creditable market feasibility. Find out what must be included and what is not necessary. Should it be a public course or private? How many golfers can you expect, the cost and then find out how to select the right management firm, what questions to ask and why. Can you run your own operation and how to go about it if you're up to it. These are just some of the need to know ideas you will gain.

**International Resort Management**

The leisure and recreational industry is an international boom. Which experts will assist you, the potential and more importantly why. What are the needs of the visitor and the resident? How can you appeal to the international "big spending" golfer. A great market and financial package is your key to future profits. Don't miss out!

**USA/Mexico: The New International Marketplace**

Find out how to enter this market and profit from Mexico's booming economy. You will get the new hot development sites and why. Discover cultural differences that can make or break your deal. Find out how to access the Mexican golfing community and where you should begin the process. Discover what the free-trade agreement really means to your investment in Mexico and Mexico's many other exciting insights.

**Buy/Sell Marketplace**

Throughout the conference there will be a separate area where you can network with potential investors, buyers and sellers for your development. You will be afforded the opportunity to display your project (free of charge) in our buy-sell forum...affording you instant feedback on your project value and interest before an international network. Worth the price of the conference alone! Sign-up now. Call for more information 800-285-2332!
On a golf course
a bad score should be the
only thing that stinks.

Foul odors, algae and sludge in golf course
ponds are enough to ruin anyone's game.
The results of poor water management can be
unsightly, smelly and costly.

Now Otterbine has developed CONCEPT\textsubscript{2},
the new high-technology surface aerators that
can revolutionize your approach to water quality
management.

CONCEPT\textsubscript{2} High Volume aerators are built to
last, made of stainless steel and tough, versatile
thermoplastics, with a rugged, custom built
motor and a virtually unbreakable stainless steel
prop designed to handle large volumes of water.

And CONCEPT\textsubscript{2} offers almost unlimited
versatility, with easily installed, totally inter-
changeable spray patterns.

SUNBURST\textsubscript{2} in Otterbine's CONCEPT\textsubscript{2}
line answers the challenge of producing a
sparkling water display with minimal effect
on pumping rates.

CONCEPT\textsubscript{2} and SUNBURST\textsubscript{2}, fulfill the
Otterbine tradition of scientifically designed,
highly efficient, compact, self-contained aeration
systems. They are simple to install and
economical to operate.

They need no
foundation, external
pumps, or other costly
plumbing fixtures. All
Otterbine Aerators are
safety tested and
approved by the
Electrical Testing Laboratory.

Call or write, today, to find out how
CONCEPT\textsubscript{2} can help you keep your water quality
up to par.

Water works with Otterbine.

A choice of 3 Jacobsen Tri-Kings™ puts you in a commanding position to take more real estate.

Only Jacobsen offers you so many high production mowing choices in such highly maneuverable, compact packages.

Select a 16 hp gas, mechanically driven reel model with 71" cutting width, or a 16.5 hp diesel, hydraulically driven reel unit in either a 71" or 84" cutting width.

Results-oriented machines.

All three units feature your choice of 5 or 10-blade reels that can be switched from fixed to floating simply by removing a bolt. Foot-operated reel lift allows fast, precise cross-cutting.

While responsive yoke steering makes it easy to negotiate around shrubs and flower beds. The generous 10" overhang on the 1684D gives you added reach to neatly handle tricky traps. And large capacity grass catchers are available for quick, easy cleanup.

Take the high ground.

To tackle slopes with confidence and grace, Tri-Kings feature high-torque wheel motors, true differential action, a wide stance and your choice of 2WD or 3WD.

Jacobsen reliability makes it an even better deal.

Tough under pressure, Tri-Kings are built to last. For example, our carbon steel blades and self-adjusting tapered roller bearings on the reels deliver extended life, with reduced maintenance. And built-in backlapping, standard on the 1684D, keeps reels sharp.

To see just how sharp all three of these shrewd negotiators are, ask your Jacobsen distributor for a complete demonstration.

THE PROFESSIONALS CHOICE ON TURF.
