Working to make practice more perfect

High-end, "ultimate" range facilities carve their niche

By Lisa Maki

Practice makes perfect, but what makes perfect practice? An optimum practice facility must meet the golfer's primary needs—physical and psychological.

Such perfect facilities are scarce, no matter what a golfer's skill level or what caliber course he plays: cow pasture or country club.

Throughout the country, golf courses have a common problem—inadequate practice facilities. Municipal courses often show more concern for picking up balls than hitting them.

Private courses have generally compromised their practice areas, squeezing in extra homesites, leaving small ranges with no specialty shots.

Well-meaning entrepreneurs tried to respond to this dilemma by creating "golf entertainment centers" complete with batting cages, video arcades, putt-putt courses, and rubber matts. These centers sprang up at major intersections across the country. They did little to satisfy serious golfers' desire to improve their game.

An alternative to cow pastures, country clubs and entertainment centers appears to be gaining popularity—the high-end daily fee golf club.

Aqua range delivers novelty, profitability

By Lisa Maki

One trend that may further aid the rebirth of practice facilities—even the cow pastures and country clubs—is the aqua range, which combines beauty, drama, challenge and shot value, not to mention the novelty of floating golf balls.

The notion of hitting balls into a lake may sound counterproductive.

But the aqua range generates income and offers the developer a number of advantages: increased value of neighboring homes, decreased maintenance costs, and the fill necessary for further development.

Jim Cocchi, director of golf at Glenn Lakes Golf Club in Weeki Wachee, Fla., supports the aqua range concept.

Cocchi said his clients enjoy the aqua range, and it's been very profitable.

Its success can be partially linked to Cocchi's belief in supplying good quality balls. Although floating balls are about 60 cents more expensive than ordinary balls, the initial investment will be returned in kind, he said.

American Golf executive: Market runs the risk of over-expansion

By Peter Blais

The market for practice range facilities may not be as bright as many believe, according to an executive with one of the nation's largest course management companies.

"We had a lot of practice ranges built in areas with insufficient demand," said Terry Sopko, vice president of Wittke in Chicago, which manufactures and distributes range equipment to the world.

"The growth in indoor golf facilities has "skyrocketed," he said. "In 1990, 100 percent of the number of ranges was in 1991 increased 53 percent over 1990."

Mark Grothe, golf ball marketing manager of Spalding, said, "1991 was a big jump (10 range balls sales) over 1990." He estimated 50 percent.

The answer will help explain the nomenclature, in the same manner as "women's tees" was changed to "forward tees" to reflect modern times. Simply put, ranges have evolved to the point where they are visited to experience a total
Industry indicators point to unprecedented growth

Continued from page 31

golf experience — something beyond teeing it up and blasting it out to the sign. Even the PGA has incorporated the name change in its constitution.

The fields are both prosaic and aesthetic. Ball picker sales are up, along with other range equipment, said Sopko.

From headquarters in Lake Grove, N.Y., Nannette Poillon, owner of American Indoor Golf and distributor for Golfitek simulators, described a piece of equipment that offers computerized course mapping ("Every pebble and contour of a given course is known and reproduced by the computer") which allows a player, indoors, to use regulation clubs and balls, have balls bounce accurately off berms, be subjected to wind effects and have the swing analyzed as birds chirp in the background. "Golf learning centers," they are called.

Poillon reports the simulator was installed indoors at a Michigan range, Kedlin, that had 25 outdoor tees and a 2,400-square-foot pro shop. Prompted to "play the popular Myrtle Beach courses," people signed up before the simulator was delivered.

Scott Schirmer, editor and publisher of Golf Range Times in St. Louis, began the 20-page bi-monthly trade paper last July. Schirmer said the first issue had two ads. Four editions later, ads started coming to him unsolicited. Offered free to 2,200 public-access ranges in the United States, GRT "provides suppliers of golf practice ranges with a cost-effective advertising medium in the form of an informative and interesting publication for range owners," Schirmer said.

Reflecting the wider, more diversified nature of ranges, the Golf Range and Recreation Association of America was born in January and already has 285 members. Members own and operate traditional ranges, indoor golf and miniature facilities.

Di Costanzo portrayed GRRA as "the only association dedicated to golf range facilities and management."

He said. "GRRA was formed because the growth in the industry the last two years has been tremendous. Critical mass has been reached in this industry."

Di Costanzo expects a membership of 1,000 by year's end, with more to come.

"The (range) 'universe' contains 4,000 to 5,000 facility operators," he explained. The organization will offer a newsletter, insurance benefits, legal services and equipment discounts to members," he said.

DATA TELLS THE STORY

Scott Marlowe is market analyst at Forecast Golf Marketing & Financial Systems, Inc. in Richmond, Va. Ask him a question about the industry and he'll pull an answer out of his data base.

Is the number of ranges increasing?

"Lord, yes! There was a 53.6 percent increase in 1991 over 1990," he said, then asked, "Do you want the numbers pertaining to on-course or free-standing, or indoor, or aqua ranges, too?"

Forecast's data answers the question about the solvency of ranges. Marlowe said about one-tenth of one percent of all public-access ranges failed in the last year, which is about one-fifth the rate of the number for all amusements and recreational services, and about one-seventh of the national failure rate for all U.S. businesses.

"There has been an explosion in ranges," Marlowe continued. "They have increased eight times the rate of golf courses. Landowners are looking for a land bank, course operators for an additional source of revenue."

Firing another salvo of statistics, Marlowe offered this: In 1989 83 percent of PGA-affiliated courses had a range, and 45.4 percent of the remaining courses offered the facility.

Municipalities are finding ranges a source of revenue. A case in point is Crystal Lake, Ill. A suburb of Chicago, its park district serves about 40,000 people.

Jim Miller, superintendent of recreation, said the city has a park project of about 200 acres. "We are looking at a way to generate revenue, and with what the range will produce, we can partially fund other projects," Miller said. "There are a lot of advantages, like no taxes. The public has used surrounding ranges, and this one appears to be a 'can't-miss' situation."

"The 15- to 20-acre range, still in the planning stages, is being designed by Lohmann Golf Designs of Marengo, Ill. Lohmann architect Phil Sage said ranges usually occupy around 10 acres. The Crystal Lake facility will be larger as, "We are getting into more up-scale facilities with sand bunkers and chipping greens. There will be a long-grass area for practice from the rough, mounds and depressions at either end to practice from."

"Golf," Sage said, "is getting more competitive. You have to cater to the person who just got a new sand wedge and wants to practice with it."

THE 'USED' MARKET

Grobbe, of Spalding, said the life of a new range ball is about one year. As

Plan now to attend these two exciting conferences

Marketing to Golf Facilities

A 2-day seminar loaded with ways to help you focus your marketing strategy to the golf course industry

October 4-6, 1992
Oak Brook Hills Hotel and Resort
Oak Brook, Illinois

Plan now to attend Marketing to Golf Facilities—a comprehensive seminar for vendors and suppliers to the turf industry.

- Learn the latest trends on the growth of golf facilities and key growth areas for the future
- Discover how superintendents and facility managers recommend, specify and purchase everything they buy—from chemicals to irrigation equipment
- Evaluate your strategy for reaching the golf market—and how to assess a successful marketing campaign
- Gain a competitive advantage in converting leads into sales

Public Golf '92

The premier national conference for managers of public golf facilities

November 1-3, 1992
Oak Brook Hills Hotel and Resort
Oak Brook, Illinois

Don't miss this exciting conference to help you profitably manage, maintain and market the public course.

- Discover what's new—ideas, trends, and methods. A look at the bright future of public golf—and your part in it
- Examine profit minded planning, feasibility, expansion, and construction—and successful ways to finance it
- Get better results by learning new ways to manage and maintain your operation
- Develop a marketing strategy to dominate the market

complete with practice facilities.

Developers are responding to the void in the industry by supplying a quality mini-market product.

The theme "strictly a golf club" and "development of the game" seem to be the wave of the future.

The higher green fees these high-end daily/week courses charge have both necessitated and allowed development.

Customers are serious about practicing, yet get the most out of their game. Today's architects are rewarding them by mixing the majesty of classic courses and golf tradition with new creative concepts.

This combination of the past, present and future design concepts has created a surging demand for developers to provide the facilities where golfers can adapt their techniques to these modern but traditional courses.

An optimum practice facility sub-
tley advocates practice by providing the necessary mental atmosphere and physical setting.

Important are an assorted physical components: perched greens, plateaued landing areas, native grasses, up/flat lies, lateral and crossing water hazards, thick rough, low-profile greens, down/flat lies, towering pines, strategically placed bunkers, hillocks, sidehill lies, pot bunkers, dense woods, dunes, flat lies, waste areas, grassy hollows, uneven stances, goping sand bunkers, and light targets. All of these attributes can and have been incorpo-
rated into the high-end practice facil-
ity.

Such characteristics provide the appropriate tools for developing dis-
tance perception and a palette of shots: bump-and-run, forced carry, working right to left and left to right, long ex-
acting iron, open drive, lob, bite off, chip, finesse, pitch, strategic thinking hole, blind, heroic, and sand wedge through driver.

A person who has chosen practicing as a recreations activity should have privacy, concentration, absorp-
tion, excitement, challenge, confi-
dence, encouragement, optimism, and hope.

An intense but comfortable mood must be created so the golfer can concentrate on the target and the shot at hand. Distractions must be mini-
mal. A relaxed atmosphere induces internalization, visualization and fo-
cus that practicing requires.

For a golfer to conclude a practice session feeling a sense of achieve-
ment and satisfaction, two types of participation must occur — physical and psychological.

Most "driving ranges" make physi-
cal participation easy. However, they do not encourage psychological par-
ticipation.

Bob Jones said it best, "The first purpose of any golf course should be to give pleasure, and that to the great-
est number of players." To accomplish Jones' objective, practice needs a wide variety. Providing diversity is a key factor in satisfying these needs, and ulti-
ately in the success of a practice facility.

Repulsion is boring. Variety induces concentration.

The used market

Continued from page 34

balls get worn, more prosperous ranges will sell or trade them to other ranges, and purchase new ones.

"It's like the used-car market," he said, "There is a second-tier market in range balls.

Grothe would not divulge any numbers as to volume or dollars of the company's two-piece range ball.

As Spalding claims to be the largest ball maker in the world, Wittek, of Chicago, assumes that position in golf range equipment. Both manufacturer and distributor, Wittek serves courses and ranges around the world.

According to Spoko, Wittek invented the first ball picker for ranges. The company deals in new and re-
cycled balls, all range range equipment and parts, mats, washers, tees, dis-

pensers and lightning systems to name a few. "Indoor golf facilities have skyrocketed," Spoko said. "Of course pro shop display items are up... Miniature golf is up." Spoko noted the phenomenon has reached Poland, where a facility is being planned.

Wittek also is involved in the pre-
liminary planning stages for ranges.

"The range and miniature field is just growing," he said. "Business is up. The need and potential are there." It's not only swinging clubs at these

places. Poillon offered results of a 1990 study of golf learning centers, which

also offer associated health clubs, di-
agnostic equipment, classrooms and actual ball striking.

The study showed an existing market of $89 million in 1990 and forecast 19-percent growth by 1995.

Said Poillon: "People who are en-
tering the range business or rejuve-
nating older facilities are looking to new types of amenities and revenue producers, looking for more than sales of buckets of balls. The overhead does increase, the fixed payment does not decrease. A learning center, in-
doors, out of both, can keep a flow of activity and revenue going in other than the prime season."

THE SIMPLE, LONG-RANGE RANGE SOLUTION

With miles of fairways, greens and tees to maintain, the last thing you need to worry about is your practice range. That's why you'll appreciate our colorful new, worry-free, Standard Golf Range Banners. ♦ Naturally, they're highly visible. That, after all, is the whole idea. The bold black numbers literally pop off the 4' x 2' bright yellow nylon banners. And unlike pennants, they can be easily read on the calmest or windiest of days.

♦ They're durable, too. Mounted on do-it-yourself PVC frames (our enclosed instructions show you how), they're designed to stand up to all kinds of weather. ♦ Best of all, they're very economical!

So you can afford to order all you need. ♦ Ask your nearby Standard Golf distributor about the best Range Banners in the business. Available in 25-yard increments from 75 to 300 yards, they'll help you and your members feel more at home — that's right! — on the range.
