GCSAA faces opposition on proposed bylaw changes

BY PETER BLAIS

This year's GCSAA annual meeting promises to be anything but a ho-hum affair. The proposed bylaw changes will see to that.

Recommendations to give the board of directors authority to set dues, get rid of delegate voting, change from a two-thirds to simple majority rule, and restructure membership classes have drawn fire and support from around the country.

The Organizational Study Committee recommended and the board of directors unanimously endorsed the changes, according to GCSAA President Bill Roberts.

Still, some board candidates, former association officers and members have expressed reservations about the changes.

"Many people feel like these are being rammed down their throats," said board of director candidate George Renaut of Burning Tree Club in Bethesda, Md. "They could all be voted down. It just stresses the need for better communication with the membership."

Board candidate Dave Fears of Blue Hills Country Club in Kansas City, Mo., explained that the board has simply endorsed bringing the proposed changes before the membership for a vote rather than endowing the actual changes themselves.

"Whether they pass or fail, they have the members interested and ac-

Revised green construction specs forthcoming

BY MARK LESLIE

Major changes in the U.S. Golf Association greens construction specifications, to be unveiled this month, will save developers money and time, according to USGA Green Section National Director Jim Snow.

New guidelines will be released in January following a "thorough, scientific" 18-month review of the USGA's controversial construction recommendations by agronomists, scientists, architects, industry personnel and soil laboratory personnel.

Snow believes golf course builders, architects and developers will be happy with the results, which will be available in a rough version in January and in a booklet come late winter or early spring.

Central to the changes is the intermediate pea-gravel layer, known as the choker layer, which Snow termed "controversial, not in terms of agronomics, but in terms of money."

"Believe most of the time the choker layer is left out of the construction," Snow said. "We have found good specs for determining when you need it or not" based on particle size distribution of the root-zone mix.

The recommendations place more stress on laboratory tests, especially in

Low Country courses take proactive environmental tack

BY HAL PHILLIPS

HILTON HEAD, S.C. — The words "coastal council" are enough to scare some golf course owners and developers half to death. However, a proactive approach taken in the Low Country of South Carolina has shown that regulators and course owners can work together, to the benefit of all concerned.

Mike Tinkey is chief operating officer of Royal Golf & Tennis, Ltd. which manages 81 holes in and around Hilton Head. Since 1989, Tinkey has overseen a slew of environmental improvements: lagoon naturalization, bird sanctuaries, above-ground fuel storage, wildflower plantings, and conversion to irrigation using 100 percent effluent. All this was done with the active blessing of regulatory agencies.

"We went to the agencies and said, 'This is what we're doing.' They were very positive. They were interested in what we were doing, and they worked with us every step of the way," Tinkey said.

Supers descend on Anaheim

BY PETER BLAIS

ANAHEIM, Calif. — Guess what, folks. This year's winner of the GCSAA's highest honor, the Old Tom Morris Award, will be there to receive his plaque.

Business kept last year's recipient, golfer Tom Watson, away from the New Orleans ceremony. Knowing he would not be able to personally receive the award, Watson requested the association give it to someone else.

But the group decided Watson was their man and honored him anyway. Although he taped an acceptance speech shown during the annual banquet, the five-time British Open champ's absence was definitely noticeable.

Superintendents descend on Anaheim

Continued from page 1

This year, the GCSAA decided Dina Shore was their woman. And the patron saint of the Ladies Professional Golfers Association will be at the Jan. 30 annual banquet to receive her award. So, too, will golfer Patty Berg. Berg received the award from Shore in 1986. This time Berg returns the favor to her old friend and will present the Old Tom plaque to Shore.

The Saturday-to-Saturday run is a departure from the turns the favor to her old friend and will present the award from Shore in 1986. This time Berg returns the favor to her old friend and will present the Old Tom plaque to Shore.

The annual banquet, which features a performance by the legendary Beach Boys, wraps up the eight-day event. The 64th annual conference and show kicks off the previous one- and two-day sessions on Monday and Tuesday.

In response to superintendent requests for more information on golf course design, several well-known architects are leading a handful of the 60-plus seminars. American Society of Golf Course Architect members Brian Silva and Jan Beljan discuss Golf Course Restoration, Renovation and Construction Projects the first Saturday and Sunday. Geoffrey Cornish and Robert Muir Graves give their critically acclaimed Golf Course Design Principles seminar Monday and Tuesday. Pete and Alice Dye on Golf Courses Designing Tuesday's one-day session by two of the industry's top names.

Other topics during the first four days of seminars range from water quality and wildlife habitat conservation to employee safety training and managerial productivity. Hall of Fame catcher Johnny Bench will be the keynote speaker at Tuesday night's Opening Session. Organizers are excited about some of the speakers, especially on the environment, on tap for the six concurrent education sessions scheduled for Wednesday.

Sessions by allied associations round out the conference. Among them are the Golf Course Builders Association of America on Thursday, American Society of Golf Course Architects on Friday, and United States Golf Association Green Section on Saturday.

Wednesday is Distributor Preview Day for the trade show, providing an opportunity for exhibitors to meet exclusively with current and potential distributors and dealers. The trade show officially opens Thursday, Jan. 28, running from 9 a.m. to 5 p.m. Thursday and Friday, and 9 a.m. to 1 p.m. Saturday. The 175,000-square-foot show floor will house a record 660 plus exhibitors.

The annual meeting on the closing Saturday morning should be one of the most spirited affairs in recent memory, with heated debate expected on the proposed bylaw changes. The election of Randy Nichols of Cherokee Town & Country Club in Dunwoody, Ga., as the new GCSAA president will highlight the election of officers. The conference and show should draw 16,000 to 17,000 domestic and foreign visitors, which could surpass the record attendance set three years ago in Orlando. The recession held down last year's numbers in New Orleans, organizers said. Desert Storm and a souring economy did the same two years ago in Las Vegas, they added.

But with an improving economy, no military engagements threatening foreign travel and the proximity of this year's event to a major metropolitan area like Los Angeles, attendance is likely to improve.

Bylaw changes? Continued from page 22 own minds." If most members voted by mail, there would be less chance to discuss issues at candidate briefings, wrote superintendent Palmer Maples Jr. of Summit Chase Country Club in Snellville, Ga., in the Georgia GCSA publication Through the Greens.

With mail-in ballots, many people would vote for directors on the basis of name recognition alone, giving candidates from larger chapters with more financial resources an advantage over candidates from smaller ones, Bavier said. It would also eliminate any realistic chance for a person nominated from the floor, he added.

The "it-ain't-broke-don't-fix-it" attitude extends to those opposing the proposed change from a two-thirds to simple majority vote to amend bylaws. Intense lobbying by a vocal minority could sway half the eligible voters, putting too much power in the hands of a few, they say.

The current two-thirds rule forces an amendment to stand on its own merits, Bavier said. Directors must vigorously sell any change to members to gain approval, he added. Amendment supporters contend current bylaws mean a one-third minority can override the desires of two-thirds of the members.

"A two-thirds requirement is overkill," Roberts wrote.
