Pebble Beach Co. takes effluent plunge
By Hal Phillips
PEBBLE BEACH, Calif. — The Pebble Beach Co. has seized the effluent initiative by financing a $34 million reclaimed water project that will eventually irrigate every golf course on Monterey Peninsula.

The undertaking will provide approximately 800 acre-feet of reclaimed wastewater to irrigate the courses and other open space areas in Pebble Beach. Included on the project checklist are a new tertiary treatment plant, improvements to the existing plant, new pump house, new storage tank and 7.5 miles of pipeline weaving its way through some of golf's greatest golf courses.

According to Ted Horton, director of golf course operations for all eight Pebble Beach Co. courses, the project was not foisted on anyone.

"The water situation here has been very tight, by virtue of seven years of drought," Horton explained. "The company

Behind every great golf course architect...
By Mark Leslie
America loves heroes. That's the case in golf course design as it is in politics and war. And, just as behind every great man there is a great woman, behind many great course architects are great lead designers.

Yet, who are these people? Donald Ross is credited with designing more than 300 golf courses. But who ever heard of Walter B. Hatch or Henry T. Hughes?

Robert Trent Jones Sr.'s name is on more than 450 golf courses. But who outside the industry has heard of Roger Rulewich? The marquee at more than 80 golf courses names Tom Fazio as architect. But who knows of Andy Banfield and Tom Marzolf. Or Jan Beljan and Dennis Wise?

The "man (or woman) behind the man" is often a major reason "The Man" is famous. But what are the rewards, why do they stay with "The Man," and when, if ever, do they move on?

Field burning on decline in Oregon, but not in Idaho
By Hal Phillips
SALEM, Ore. — Grass growers and government agencies here are working to create new markets for the tons of straw that had been ritually burned each fall until legal restrictions made field burning an increasingly less viable option.

An Oregon Department of Agriculture program will soon dole out nearly $250,000 in "seed money" in hopes of creating alternative uses for the leftover straw. The department has already received proposals to conduct research on creating paper pulp, mulch, soil amendments and feed.

"The state is really trying to find a market for these guys who can't burn anymore," explained Bruce Pokarney of the Department of Agriculture. "I think the seed industry has been very upset about the park board's decision to forego a competitive bidding process for the contract to privatize its six courses, two practice ranges and miniature golf facility, which together lost $403,000 last year.

AGC claims it offered the

Kemper, AGC wrangle over city contract
By Peter Blais
CHICAGO — "We don't operate like the rest of America," said Erma Tranter, referring to the political wheelings and dealings that seemingly pervade every undertaking, including golf, in the Midwest's largest city.

Tranter is executive director of Friends of the Park, a watchdog agency that oversees the Chicago Park District's activities.

She and losing finalist American Golf Corp. are upset about the park board's decision to forego a competitive bidding process for the contract to privatize its six courses, two practice ranges and miniature golf facility, which together lost $403,000 last year.

AGC claims it offered the
