Members soundly defeat bylaw amendments
By PETER BLAIS
While the Golf Course Superintendents Association of America board of directors may have suffered a black eye from the overwhelming rejection of the proposed bylaw changes, the board and association probably sustained no permanent damage.

SHOW WRAP-UP
The 64th International Conference and Show drew a near-

monsoon rainy season in December. Given the periodic torrential rainfall, the contour grading and land sculpturing work must be tied carefully into a comprehensive subsurface drainage system. Two hundred inches of rain per year is not unusual.

Fream and his colleagues are not newcomers to Borneo. In 1989 the Royal Brunett Golf Club championship course, designed for the Sultan of Brunei (the world's richest man) opened for play at the Sultan's polo club, Jerudong Park, Brunei — after a two year weather-prolonged construction period. Sarawak is the state just to the south of Brunei, facing the South China.

Construction is progressing for the first 18 holes of the Bangi Golf Resort project at Bangi, 30 minute's drive south of Kuala Lumpur along the main roadway to Johor. The comprehensive project will include two championship 18-hole courses, a businessman's conference meeting center, resort hotel, extensive clubhouse facilities, residential housing (from villas to apartments) and an adjacent office business park. This is the most comprehensive and carefully master planned, multi-use, golf-oriented real estate development yet initiated in Malaysia. An extensive reforestation and oil palm planting program will create a park-like setting in this rapidly developing satellite city to Kuala Lumpur.

Construction work has just begun on the Damai Laut Country Resort, located near Lumut on the west coast of Perak State. This project is an 18-hole championship course playing to riverside, seaside, through mangrove and tropical hardwood forests. A four star resort hotel, hilltop viewsite villas and apartments are to be part of this second home golfer's getaway retreat.

Golfplan also is presently preparing the design concept plans for the 18-hole Kimara Golf Course that is being built as part of the Taman Setiawangsa project near Kuala Lumpur. Taman Setiawangsa will total more than 2,000 homesites.

Once you make Daconal 2787® the cornerstone of your turf management program, this is what you're left with.

Peace of mind and healthy turf. With Daconal 2787®, you get the broadest-spectrum contact-fungicide protection on the market. And a history of 20 years without a known case of disease resistance. Which is why more course superintendents make it the cornerstone of their turf management program. It controls 12 major diseases, including Leaf spot, Melting out, Brown patch, Dollar spot, Anthracnose, and Red thread, on all cool-season grasses. Especially Bentgrass greens, tees, and fairways. And it's the most economical fungicide per day of control on the market. You can also use it on many ornamentals.

Get Daconal 2787 in your disease management program, and you'll be seeing green.

ISK Biotech Corporation, Turf & Specialty Products Division, 5966 Heitly Road, P.O. Box 8000, Mentor, OH 44061-8000.
