High tech tools aren't coming — they're here

**BRIEFS**

**SEED RESEARCH PAYS OFF FOR DR. FUNK**

Mike Robinson, president of Seed Research of Oregon, recently presented Dr. Reed Funk with a royalty check worth $182,000. The payment was based upon sales of the following turfgrass varieties developed by Seed Research in conjunction with Dr. Funk: SR 4000, SR 4100 and SR 4200 perennial ryegrasses; SR 3900 and SR 3100 bermudagrass fescues; SR 5000 Chewings fescue; Ti-tan and SR 8200 tall fescues; and SR 2000 Kentucky bluegrasses.

**NEW ORLEANS** — Chuck Childers, chairman/president and CEO of the Potash Corporation of Saskatoon, Saskatchewan, Canada, is the new chairman of The Fertilizer Institute. At the executive vice president, agricultural association's recent annual meeting in Saskatoon, Canada, is the new chairman of The Fertilizer Institute, Gary D. Myers was re-elected TFI vice chairman, and Gary D. Myers was re-elected TFI president and chief staff officer.

**SOUDERTON, Pa.** — Moyer & Son, Inc. has announced the addition of John Ripp to its sales force. Ripp will be responsible for golf course sales in the Mid-Atlantic states. He will be marketing and selling turfgrass varieties that are well-suited for Mid-Atlantic conditions. Ripp has been with Moyer & Son since 1982 and brings with him 10 years of green industry experience. He has worked as an assistant superintendent and most recently as a distributor representative in the Chicago Metro area. He has a bachelor’s degree in natural resource management.

**BEREAUT JOINS HYUNDAI**

SANTA ANA, Calif. — Hyundai Golf Cars, U.S.A. has named Joe Bereaut to the position of regional sales manager for the central United States. Based in South Haven, Mich., Bereaut’s responsibilities include the supervision and expansion of Hyundai Golf Cars’ central U.S. sales and distribution center. Bereaut has worked for Hyundai Golf Cars for the past three years and previously served as interim president of Michigan-based Chi Industries and has many years of sales management experience with Taylor Dunn and E.Z. Go.

**Barebo head to step down**

ANAHEIM, Calif. — Otterbine Barebo Inc. President Charles “Chuck” Barebo, 58, will soon relinquish that title and more of the day-to-day responsibility of running the aerator manufacturing company to his oldest son, Charlie.

Beginning Jan. 1, 1994, the elder Barebo will become chief executive officer and chairman of the board of the Emmaus, Pa.-based firm he founded 14 years ago. He made the announcement at a distributor breakfast held during January’s Golf Course Superintendents Association of America Annual Conference and Show.

While he will cut back on much of his travel and dealings with distributors, Chuck will still be actively involved in the company.

**Chestnut joins Smithco**

WAYNE, Pa. — Ted Smith, chairman of Smithco, has announced the appointment of William R. (Bill) Chestnut as manager of engineering & product development.

In his new position, Chestnut will be responsible for the creation and development of new Smithco products and further engineering advancement of the company’s existing product line. Chestnut joins Smithco following 20 years with the John Deere Company, where he played a key role in the development of its Golf & Turf Division and the marketing of resulting products. Chestnut, who shares patent rights with Deere and has been widely published in golf and turf business journals, will be based in Smithco’s manufacturing facility in Camerom, Wis.

“We welcome Bill Chestnut to our company with much enthusiasm,” said Smith. “We are highly confident that his considerable knowledge and experience will bring new dimensions to Smithco’s product innovations and engineering operations.”

**Ciba-Geigy and Rain Bird honor industry’s Environmental Stewards**

ANAHEIM, Calif. — Ciba-Geigy and Rain Bird have announced the winners of the first annual Environmental Steward Awards. The companies also announced a donation of more than $12,000 to Golf Course Superintendents Association of America Scholarship & Research.

The award program was created to recognize golf course superintendents and golf courses for their work to protect or enhance their local environment. Entries were reviewed by an independent panel of judges selected for their expertise in environmental issues, turfgrass management and other areas. Awards were given in three categories: public, private and resort golf courses. One national winner was selected in each category:

- Don Tolson, CGCS, Fox Hollow at Lakewood (public/ Lakewood, Colo.).

**WeatherWare 5.0 can generate this type of map on any IBM-compatible computer.**

**Individual weather forecasts a reality**

**By Hal Phillips**

SALT LAKE CITY — WeatherWare 5.0 isn’t rain gear. It’s an on-line personal computer weather display program from Salt Lake City-based WeatherVector Corp., and another example of how the golf industry has been affected by high tech innovation.

Through the company’s WeatherBank data feed, WeatherWare provides coverage of meteorological activity as well as graphic capabilities that display weather occurrences on TV-broadcast quality maps — international, national, regional and state.

WeatherWare sells for about $300 and runs on any IBM compatible PC. It requires a Hayes compatible modem, hard disk and EGA or VGA color graphic monitor and card. Connection to the WeatherBank data feed is made with a 300-9600 baud modem via two networks which can handle calls from anywhere in North America, 24 hours a day, 365 days a year.

If that last paragraph left you fumbling through your computer dictionary, you’re not alone. Many superintendents are just becoming familiar with their computers' capabilities. The computer also provides coverages of meteorological activity as well as graphic capabilities.

**By Tom Laverty**

According to a study from the University of Oklahoma College of Architecture, about 75 percent of the golf course architects surveyed indicated they use computers for traditional tasks such as accounting or office automation.

Only 17 percent, however, said they use computers for technical tasks such as design and drawing. Landscape architects are tough, elusive customers for computer graphics vendors and software application developers trying to provide solutions to make their life easier. The computer is literally as big as the all outdoors, and the infinitely variable landscape seldom deals with straight lines or standard parts. Still, in this age of information, it is inevitable that the computer will play an ever increasing role in the architect’s job.

There are currently two areas of focus that should interest the golf course architect. Geographic Information Systems (GIS) are computer solutions targeted at the site planning professional who needs an understanding of the landscape within which a project will be designed. Site identification, watershed and ecosystem analysis, or erosion-control work are tasks where GIS is of service.

Computer Aided Design and Drafting (CADD) tools are for the architect who needs more accuracy and efficiency in landscape design and drafting, cost estimation, and many other areas. The line between GIS and CADD is blurring, though, as vendors provide seamless ability to move from GIS-oriented aspects of a project into more specific course design and engineering with GIS.
