First family of design reunited in Florida

Robert Sr., Bobby Jones collaborate

By MARK LESLIE

ORLANDO, Fla.—After 20 years, the Joneses are back together. Robert Trent Jones Sr. and Jr. — Trent and Bobby.

Father and son have agreed with Disney Development Co. to design an 18-hole public daily-fee golf course as part of Disney's next major undertaking, Celebration. A small-town community steeped in the past yet incorporating cutting-edge ideas for the future, the city of Celebration will be built on 4,000 to 5,000 acres of Disney-owned land, according to Tom Sunnarborg, Disney's development manager for recreation and amenities.

"We're excited," said Robert Trent "Bobby" Jones Jr. "I think it will be fun for both of us. It is fun for both of us."

"I've spent a lot of time with my father in Florida since my mother died July

Posting & Notification

Should the chemical industry pursue a national standard?

By HAL PHILLIPS

While the party line is clear enough, the debate persists among chemical industry executives who disagree on whether the country needs a nationwide, standardized posting and notification statute.

Twenty-three states have already adopted their own P&N laws, which require applicators to inform abutting property owners of what is being applied and when. However, each state has different standards for signage, setback and other "precautionary" measures.

While groups such as REISE (Responsible Industry for a Sound Environment) have "precautionary" measures. While groups such as REISE (Responsible Industry for a Sound Environment) have fought and will continue to fight such laws, sober observation would point to the proliferation of such laws in the remaining 27 states.

Some in the chemical industry, however, see this struggle as an uphill battle not worth fighting. Ron Fister, director of specialty sales at Sandoz Agro Inc., believes the industry should seek a nationwide posting and notification statute that would standardize requirements (thereby saving companies money) and project a pro-active image for manufacturers of pesticides, herbicides and

Course owners warned of mystery medical liabilities

By KIT BRADSHAW

The clinical ecologists have. The media have. And golf course owners had better become more familiar with MCSS — that's the message from Orlando attorney David Henry, who spoke at February's National Golf Course Owners Association Conference here in Orlando.

"Generally speaking, those who claim to have Multiple Chemical Sensitivity Syndrome (MCSS) say that exposure to toxic chemicals or poisons has caused a disruption of the immune system. This has created such symptoms as respiratory problems, itch, nausea, headaches, and so on," said Henry.

Two problems have occurred with this syndrome, he pointed out. First, there is not a lot of clinical evidence to support the claim; and second, physicians who call

Members soundly defeat bylaw amendments

By PETER BLAIS

While the Golf Course Superintendents Association of America board of directors may have suffered a black eye from the overwhelming rejection of the proposed bylaw changes, the board and association probably sustained no permanent damage.

"If anything, I walked away from the annual meeting thinking we were a stronger organization," said Bob Malbusch of Hirodale (Ill.) Golf Club, one of the bylaw changes more vocal critics.

"It could turn into a real positive in the long run if it
