Now Kill Algae. Without Killing Your Budget.

Introducing Algaen-X™ Algaecide. It can give you algae control far superior to what you’re getting now. And do it for a fraction of the cost of the chemical fungicides you’ve had to use, up to now. Unlike those chemical fungicides, Algaen-X was developed specifically to control algae. And does it ever!

Algaen-X is fast-acting, knocking down algae on contact. It’s so powerful, you can control algae with very low application rates—just 1½ ounces per 1,000 square feet.

And all it costs to treat 1,000 square feet with Algaen-X is about 40¢. The cost-in-use of comparative chemical fungicides can be $2.00 or more per 1,000 square feet!

You can get Algaen-X now, in 2 x 2.5 gallon cases. Call your Grace-Sierra distributor today. Or call us toll-free at 1-800-492-8255.

New Algaen-X. It kills algae. Without killing your budget.

Note: Algaen-X registration in California is pending. © 1993 Grace-Sierra Crop Protection Company. Algaen-X is a trademark of Grace-Sierra Crop Protection Company.
The most important people in the golf course industry make our front page every month.

People like Hale Irwin. Three time U.S. Open Champion (most recently 1990) and member of the 1991 U.S. Ryder Cup Team, Hale is president of Hale Irwin Golf Services, Inc. The company, based in St. Louis, Missouri, provides a full range of golf course design and development programs including operations business planning, financing, construction budgeting and management, design, architecture, marketing and promotion.

Irwin calls Golf Course News "informative" with "excellent coverage of controversial issues, as well as timely coverage of all the golf industry news from A to Z."

If you want to reach Hale and over 22,000 others who are the most important people in the industry... decision makers at nearly every course in America, call Golf Course News today.

It's "addressed" for success.
In Japan, golf is an obsession. Their courses attest to this fact. And so does their leading import—the Jacobsen Greens King IV™.

Uncompromising quality is what it's all about. In the cut. And in the equipment.

The Greens King IV has the lightest footprint in the industry to minimize compaction. Its exclusive, fully floating, pivoting reels steer through turns without scuffing or marking on the clean-up pass. Individual reel control and power backlapping keep reels sharp with less work. Plus, Jacobsen's quality reel, and unique Turf Groomer® option continue to set the standard for fine greens mowing... in Japan... and around the world.

To see why the Greens King IV is Japan's number one golf import, ask your Jacobsen dealer for a demonstration.
