Do the job the way you’d want it done for you

By MARK LESLIE

Reflecting on the 16 people who have worked for him and gone on to design courses, Wadsworth said, “Yes, there are a few.” But the ultimate question is, What did they expect to learn?

“First, they’re trying to learn all the construction practices — all the little details — that go into making a golf course,” he said. “Beyond that, they observe and bring up questions, ideas and thoughts relative to the designer’s skills and the elements he projects into the frame.

“They are constantly looking at those types of things. This is probably what leads them into their next step — which is working for an architect.”

Wadsworth singled out Keith Foster and Craig Schreiner as aspiring architects who “said it on the line. They said up front that they wanted to some day be designers. They weren’t hiding anything. They weren’t going to leave without you knowing it. And they were very interested in learning everything they could about our business. You could feel that happening. What they were contributing to was not only our work but their own learning processes. And you could tell that by the way they handled themselves.”

Qualities he looks for are “high integrity and decent moral character,” Wadsworth said. “Those things you don’t always find out until later. But they surface with those who stay with us.

“We have an opportunity to hire people all over the country simply because we travel. We have a broad spectrum to look at. The ones we end up with are people who are going to further our concepts of good business and who like to work. They remain because of the intense human efforts that they make and we require.”

Would-be architects learn trade with Wadsworth

thought, “Is this the way I should conduct myself? Is this the way Brent would conduct himself?”

I value his honesty, integrity and sincerity above anyone else’s in the business.” — Foster.

• You’re going to get the same product no matter who in the company you work with or where you are. They have an ingrained corporate philosophy: Brent always wants the job to finish with everybody happy. If he has to spend more money that wasn’t in the contract, Brent will go the extra mile to get the whole thing turned out. Others might say, “Here are the keys. You can drive it away. But it’s missing a hubcap.” — Nugent.

• In the construction business you want to perform at a high-quality level, you still have to get the job done on time and under budget. Blending all that has made Brent successful. If he came out on a job and saw something that would make a product better, he wouldn’t rest until it was done.” — Dasher.

Dasher even has a list of “Brentisms” gathered during his work for — and now with — Wadsworth:

The right way — Means you always have time to go back and fix something.

Work hard to get lucky — Means you can put yourself in position for big jobs, great opportunities and good fortune by working hard and doing it thoroughly and completely.

Equalizers — Refers to sometimes small, sometimes large design elements that help swing the advantage from the long hitter to the short hitter.

Sometimes you do your best work by accident — Be smart enough to recognize when an unplanned or unexpected element is just what you need, knowing when you have done enough is very important.

• “Anyone working in this profession is remiss unless they get...
The Brent Wadsworth Way: Do unto others...

1958 when he was driven into the construction business because he couldn't find enough good builders.

Since then, he has cut a swath through the Florida to those in Illinois, Arizona and Hawaii. But building a reputation for strong work ethic all came naturally to him.

"It comes down to human nature — dealing with something the way you would want it done if you were the client," Wadsworth said. "If you can apply that, plus the good business practices of life (careful accounting, careful elements of sales and running a very tight ship), you will provide the extra elements that are a value to a customer."

A dissertation he tries to give to each employee is: "We all serve somebody. Remember, you're not hiring somebody, you're serving them. When you recognize that and put yourself in that mode, it seems you'll perform at a higher level than others."

"His basic work ethic, he said, is "get to the job early in the morning, work late at night and give everything you've got to the work at hand."

"Those who succeed are those who really want to give a good value to people they serve," he said.

Wadsworth pointed to John Cotter, his overall general manager, as exemplifying "all the basic characteristics of the type of people who have made our business successful through the years. He was my first guy and he's still there. And everything I am, I feel he has carried forward and projected to other people... Everywhere he goes he is well- respected. He is fair and trustworthy and kind and gentlemanly. If all those things are practiced on a regular basis, those people succeed in life, not only working for somebody but for themselves as well."

Wadsworth apprentices

A number of people in the golf industry have apprentices for Wadsworth Golf Construction Co. Here is a list:

INDEPENDENT ARCHITECTS
Keith Foster of Keith Foster and Associates in Phoenix, Ariz.
Rick Jacobson of Rick Jacobson Golf Course Design in Libertyville, Ill.
Paul Loague of Aurora, Ill.
Craig Schreiner of Kansas City, Mo.
George Williams of Williams, Gill & Associates in River Falls, Wis., now in Texas

ARCHITECTS WORKING FOR ARCHITECTURAL FIRMS
Mike Dasher of Arthur Hills & Associates
Tom Johnson of Dennis Griffith and Associates
Jim Sluogcki of J. Michael Poellot
Kevin Sutherland of Fazio Golf Course Designers, Inc.
Tom Walker of Gary Player Design

ARCHITECTS' SONS
Tim January, son of Don Carter Mortish, son of Jay Tim Nugent, son of Dick Roger Packard, son of Larry David Flatt, son of Larry

CONTRACTORS
Paul Clute of Paul Clute & Associates
Joe Niebur of Niebur Golf Construction
Larry Smith of Mid-American Golf Construction

RELATED FIELDS
Jay Keohole, construction consultant in Mexico
Dr. John Hall III, professor and Extension Service representative for Virginia Polytech

FOSTER CHOSEN
MCO Properties, Inc. of Fountain Hills, Ariz., has chosen Keith Foster and Associates to be the architects for an 18-hole championship course. The high desert site called Sundidge Canyon is situated directly east of greater Phoenix overlooking the Verde Valley. Construction is scheduled to begin in June.

You didn't read it in the sports section. But Fore fungicide recently wowed course superintendents in 17 states. Put to the test, Fore showed it was one of the hardest-hitting broad-spectrum fungicides in commercial turf care today. And probably the most economical.

Beats more diseases for the money.

On tees, greens, and fairways, Fore proved it was more than a match for 14 major diseases. Including such well known names as Brown patch, Dollar spot, and Helminthosporium melting-out.

And as superintendents in 17 states discovered, a treatment of Fore costs far less than the leading competitive fungicides.

No resistance after 25 years.

A multi-site enzyme inhibitor, Fore has been defeating turf diseases for over 25 years. And in all that time, not one of those diseases has mustered even the least resistance.

For information on trials and warranty, write: Rohm and Haas, 300 Industrial Mall West, Philadelphia, PA 19115

Limited warranty: Fore fungicide is guaranteed to control labeled turf diseases or your purchase price will be refunded.

Holler Fore! Even for Pythium.

Spray a reduced rate mixture of Fore and Subdue (or Banol) — and you can also gain improved control of Pythium blight.

So if you're looking for a proven broad-spectrum fungicide to strengthen your program this year - holler Fore! And duck some of the high cost of turf care at the same time.
