Badlands site looms as friendly soil for North Dakota developers

Continued from page 37

Red Mike, which will include the golf course and 80 spots for recreational vehicles, holds an intense attraction to each of the four partners. For Weeks — the superintendent at Country Club of Williston — "we already have better quality soil than we could even buy."

"Everything around this spot is clay hills and buttes. Yet, there is virtually no rock on this particular property. You could take an 18-inch soil probe and bury it to the handle."

For Kay, the architect, this may be the site of a lifetime. "I thought it was Ireland," he said. "It is pot-marked, dunesy terrain, but similar to the cliff areas of Ireland. On half the holes we have beautiful views of Lake Sakakawea. But, water does not come into play."

For Schlau, it's a much desired chance for an extended visit to his home state.

Amen? "Stain and I decided this area desperately needs a real golf course. We started looking for a place, and found our little bit of Scotland right out here in North Dakota," he said.

Amen and Weeks searched along the Missouri River for just the right land a year ago. A farmer whose land they singed out told them the best spot was not his farm but Red Mike Hill — a 270-acre property, sitting high above the waterway and named for a notorious cattle thief of the early 1900s. Weeks, who drove to Nebraska to walk the much-talked-about Sand Hills Golf Course (GCN, February 1994), said: "I feel we have as much to work with as they do. They have higher mounding with the sand hills. We've got higher elevations. We've got the lake. And the land is like big sink holes."

"What spurred me on," Ames said, "was that I knew the soil type was right and we don't find that often in this part of the country. And we had a wonderful water supply.

When it Comes to Performance...

Our Competitors are Behind Us 100%.

Since 1954 when AquaGro® was introduced to the nation's golf courses, hardly a year has passed that some company didn't come along with a new wetting agent. Most products have vanished like the morning dew they claimed to control. A few brands have managed to demonstrate their residual effectiveness, but year after year AquaGro remains the hands down favorite among golf course superintendents... because on the golf course performance counts.

The Top Performer

Don't just take our word for it. According to a survey of golf course superintendents conducted last winter by the Center For Golf Course Management's Market Research Division, AquaGro remains the most popular brand by a large margin. GCM found that more AquaGro users are satisfied with the product than any other soil wetting agent on the market.

In addition to being the most popular soil wetting agent on the market, AquaGro is the only one carrying a money-back performance guarantee. Satisfaction Guaranteed

If you're not already using AquaGro, it's time you discovered why the first wetting agent is still the best. AquaGro is available from your local Aquatrols turf products distributor.

Courses around here are built on poor soil and have poor quality water for irrigation."

"This site is a miracle," Weeks said.

Indeed, only 7,000 to 2,900 cubic yards of dirt will be moved, Kay said. "We will only cut and balance the tee and green locations... The sandy loam soil is so high in organic matter that our lab (Denver Laboratories) said if we build big greens and have good surface runoff we can do pushup greens."

Ground will be broken in late April or early May. Late August or September is the target for completion and the foursome hopes to open the track by Labor Day 1995.***

The Red Mike project is a testament to how to overcome financial obstacles.

Amen and Weeks formed a partnership, bought the land and are leasing it to Red Mike Development Corp., consisting of the four men.

Kay and Schlau are forgoing their fees in exchange for part ownership of the facility. "We're leaving money on the table so they will have enough to do the project," Kay said.

"We'll have a cash outlay of around $500,000 for 18 holes in a practice range."

Amen's company will install the costly irrigation system. Thus, his share of Red Mike will be greater.

14 course builders earn certification

CHAPEL HILL, N.C. - Fourteen golf course builders have met requirements for certification for 1994, according to the Golf Course Builders Association of America (GCBAA).
