What drives a man who constructs golf courses?

The love of golf. The pride of a job well done. And what’s his tool of preference? The Dyna-Drive™ rotary surface cultivator. Of course.

John Cotter, president of Wadsworth Golf Course Construction Company, Plainfield, Illinois, is proud of Wadsworth’s work. Some of that pride is because of the Dyna-Drive.

John says this about Dyna-Drive: It follows the contours of a course better than a disk. It doesn’t compact the soil like heavier equipment. It’s sturdy, built to last. And it pulls with only an 80 horse tractor.

Maybe that’s why Wadsworth owns five of them with more on order. He adds that more people would buy Dyna-Drives if they could see them in action and that architects, engineers and designers should specify them. We appreciate his honesty. We can’t add much to John’s comments except its tines are truly low maintenance.
