Relationships the key to cordial relations

“Watershed” may be a bit dramatic, but under the circumstances it’s a doubly appropriate description of January’s Environmental Summit, where representatives of the golf and environmental communities for the first time discussed their differences face to face.

Whereas in January’s Golf Course News we presented a golf-centric view of the Summit — through the eyes of attendees like architect Dr. Michael Hurdzan — we concentrated this month on their views which will interest you (see story, page 3).

Relationships were the most important ramifications of the recent Summit. Friends of the Earth, for example, should no longer evoke “the Golf Course News” may be a bit dramatic, but under the circumstances it’s a doubly appropriate description of January’s Environmental Summit, where representatives of the golf and environmental communities for the first time discussed their differences face to face.

The threat of resistance is very real. Reports are coming in that repeated applications of the same family of fungicides have forced resistant strains of disease pathogens. Brown Patch, Dollar Spot and Leaf Spot are creeping back, even after treatment. But there's a simple way to protect your course from the threat of resistance.

Product rotation with an alternate chemistry. Alone or tank-mixed, the long-lasting protection of CHIPCO® brand 26019 Iprodione fungicide is the perfect cornerstone for a season-long disease and resistance management program.

CHIPCO® 26019 is the proven, broad-spectrum fungicide that gives you unsurpassed control of Brown Patch, Dollar Spot, Leaf Spot, Fusarium Blight and Patch and Necrotic Ring Spot, all season long. It's so effective, it even gives you control of Pink and Gray Snow Mold and Corticium Red Thread.

So don't let resistance give you a spotty reputation. CHIPCO® 26019 is the product to start with. The product to rotate around. The foundation for all your tankmix combinations. Call your CHIPCO® sales rep today.

CHIPCO® 26019 gives you unsurpassed control of Leaf Spot.
