**BAHAMAS** — Former Golf Course Superintendents Association President Mike Bavier and Canadian Golf Superintendents Association founder Gordon Witteveen taught a two-day workshop here for the superintendents and crews of the island’s three golf courses.

Called “The Magic of Greenkeeping,” the seminar attracted 32 greensmen, including superintendents Sherwin Bastian of Ruby Golf Course, Ishmael Roberts of Princess Resort’s Emerald Course and Hiram Field of Lucaya Golf Course.

Bavier, of Inverness Golf Course in Palatine, Ill., was GCSAA president in 1981, while Witteveen is in charge of the five Metropolitan Board of Trade courses in Toronto and was president of the Canadian GSA in 1969.

The pair have spoken in countries around the world.

The seminar features practical secrets of greenkeeping and stresses the importance of catering to the whims of discriminating golfers.

“Mike and I are avid golfers, and we were impressed with the courses there and their condition,” Witteveen said from his office. “The very same golfers who play in the Bahamas in the winter are our customers in the summer.”

**SEWER LINES**

Sewer lines are another utility that should be explored. With many sewer companies, golf course developers have to pay for installation of the sewer piping. But the good news is that the developer can recover some of their costs by collecting “tap fees” from any entity that hooks up to it. The ownership of the piping is usually turned over to the sewer company, but the tap fees many times turn over to the developer who paid to have it installed.

**NYSTA AWARDS**

The New York State Turfgrass Association (NYSTA) awarded eight $500 scholarships to students at the grand finale of the NYSTA Turf and Grounds Exposition. Cornell University winners were Jason A. Straka and Christopher Hennes. Gregory Wall and Ryan M. Paschal (posthumously) were the two winners from SUNY Cobleskill. The University of Massachusetts’ two winners were Robert Alonzi Jr. and Christopher Caporici. G. Michael Elston of SUNY Delhi and William R. Michalski of Alfred State College were also awarded scholarships.

**NYSTA PROGRAM SET**

TIFTON, Ga. — The 49th annual Southeastern Turfgrass Conference has been expanded from two to three days and will be held at the Rural Development Center here, May 1-3. May 1 will center on discussions of research and May 3 will be a full-day calibration workshop, while May 2, will be devoted to various turfgrass topics. Speakers Tuesday morning will include University of Georgia Drs. Bob Carrow, Al Smith and Rick Brandenburg. Dr. Lee Burney will reveal new fungicide technology while Dr. Gil Landry will talk on strategies for improving turf winter-hardiness. Golf course designer and author Tom Doak will speak on minimalist architecture and Tom Delaney, director of state government affairs for the Professional Lawn Care Association of America, will address pesticide issues. More information is available from Jeanne Werner, Rural Development Center, Tifton 31793; 912-386-3418.

**With Curalan, Long Lasting Control Is Par for the Course.**

Finally, there’s a turf treatment that works as hard as you do to keep your golf course looking its best. It’s Curalan™ fungicide. With Curalan you can control eight tough turf diseases including brown patch, dollar spot, leaf spot, Fusarium patch and snow molds three to four times longer than other fungicides — up to 28 days.

And that’s not all. Curalan’s long lasting control is specifically designed to work on any kind of turf, at any stage of its growth, as a preventive or curative treatment. So, whether you want to keep spots, patches or molds from invading your turf, or you need to clear up an existing problem with brown patch or dollar spot, a treatment with Curalan can do it. This year, go for a new course record in disease control. Call 1-800-878-8060.
