The back nine were scheduled to be under the supervision of architect Andy Raugust. The greens has begun at Turlock Golf Club, and construction is ongoing for play in early spring. The club is scheduled to be completed by late February and ready for play by March. Raugust will also remodel the greens and bunkering, and will include a driving range with target use of washed sod on the new USGA greens. Remodeling will include chipping and putting areas and practice bunkers. Oak Run is owned by Decca Development & Construction Corp. of America.

### BRIEFS

**TURLOCK GREENS REMODELED**

TURLOCK, Calif. — Remodeling of the greens has begun at Turlock Golf & Country Club under the design supervision of architect Andy Raugust. The back nine were scheduled to be completed by late February and ready for play in early spring. The club is scheduled to be completed by late February and ready for play by March. Raugust will also remodel the greens and bunkering, and will include a driving range with target use of washed sod on the new USGA greens. Raugust will also remodel the front nine and that construction is scheduled for completion by late February and ready for play by March.

**MACKI BUSY ON TWO FRONTS**

COLUMBUS, Ga. — Construction is underway on a 18-hole, day-and-dusk, fee course here, serving as a cornerstone of a residential housing development. Fox Chase Plantation is the creation of Jack Maki and Jack P. Day, while the course is being built by Bilberry Golf and designed by Lisa Maki of Golf Design Services International. The par-72 course will measure 7,100 yards when complete. Meanwhile, Maki expects to begin work in April on Eagles Nest in Sacramento, Calif., south of the U.S. Air Force's Mather Field which closed last fall.

**CHICAGO'S MR. GOLF HONORED**

AUGUSTA, Ga. — Joe Jemsek, an octogenarian who pioneered public golf in Chicago and is known in that area as Mr. Golf, will be presented the William D. Richardson Award from the Golf Writers Association of America. The award is given for outstanding contributions to the game. Jemsek owns and operates eight public courses in Chicago. Jemsek is a past Professional Golfer of the Year, chosen by the PGA of America, and has been inducted into Chicago Sports Hall of Fame. The National Golf Foundation presented him its Herb Graffis Award in 1977 and his family its Jack Nicklaus Family Golf Award in 1991.

### CARIBBEAN SINGS SIREN SONG

**BY PETER BLAIS**

Caribbean golf resort/residential development is warming after a relatively long cold spell, according to golf industry experts working the area. Hurricane Hugo devastated certain islands in the late 1980s, denting the Caribbean's reputation as a safe and peaceful retreat, according to Ralph Stewart Bowden, a Virginia real estate counselor who has thoroughly researched the Caribbean market. Just as the islands were recovering from that natural disaster, a financial calamity struck in the form of a world-wide recession. The financial downturn struck particularly hard and long at the northeast United States, historically the main source of Caribbean tourists and second-home buyers. Bowden noted. Certain islands and island groups are recovering faster than others and looking at golf to help lead the way. Barbados and the Bahamas are two good examples. Here's a look at the different regions and how golf is developing in those areas.

**NETHERLAND ANTILLES/LESSER ANTILLES/ WINDWARD ISLANDS**

The real estate market has been relatively soft, but golf development is fairly strong in the past year in these southernmost islands. "There hasn't been much in the way of quality golf in the Caribbean, until recently," said architect Steve Schroeder of Robert Trent Jones II International. Jones designed Hyatt-operated Tierra del Sol, Aruba's first 18-hole course on Golden Bay, and is currently working on the development of a course on Curacao.

**MEXICAN WOES ONLY SLOW GOLF**

**BY PETER BLAIS**

Mexico's financial crisis may slow but certainly won't stop golf development there, according to industry experts working the area. "The recent devaluation of the peso has brought most projects to a halt. That will continue until things settle out," said Joe Finger, a Texas-based course designer with five Mexican projects recently opened or planned. "In the long term, the devaluation won't affect development that much. We had a similar devaluation 15 years ago and work eventually resumed." The government delayed the

**GOLF COURSE NEWS**

You supposedly retired from active design work in 1990. What have you been doing since?

Joe Finger: Working my rear end off. I've built two courses in Mexico, have two more on the drawing board and one up in the air. We remodeled the greens at Camden Ridge in Tulsa [Okla.] and Colonial Country Club in Memphis [Tenn.]. We're doing a long-range plan for Pleasant Valley CC in Little Rock [Ark.], which we built for Winthrop Rockefeller 27 years ago. We also did consulting work on the Napa Valley [Calif.] CC clubhouse. I'm doing a lot of gardening and orcharding at home and working for the club [River Hill]. Byron Nelson and I built River Hill back in 1974 and we both have homes nearby.

**UNearthed!**

Mackenzie's mysterious manuscript

**BY TERRY BUCHEN**

OLUDER, Colo. — Raymond Haddock, the step-grandson of Dr. Alister Mackenzie, is a successful insurance agent here who insists that he no longer had the manuscript and had returned it to Trent Jones. But Jones insisted that Hoffman still had it, and it was never to be seen again. Another dead-end.

Fast-forward 10 years to 1992. The Mackenzie Cup was being played between four 10-man teams representing Cypress Point, Meadow Club, Green Hills, Pasatiempo, The Valley Club and Crystal Downs. At a gathering in the garden of Mackenzie's house along the 6th fairway at Pasatiempo, Whitten told the golfers that 60 years later it was difficult to research Mackenzie. In particular, he was

**Mackenzie's mysterious manuscript**

In 1982 Robert Trent Jones Sr. told Whitten he had a typed version of the lost manuscript which he had given to the legendary Red Hoffman. Whitten called Hoffman, who insisted that he no longer had the manuscript and had returned it to Trent Jones. But Jones insisted that Hoffman still had it, and it was never to be seen again. Another dead-end.

"We can develop better courses today and it's starting to happen," Schroeder said.

Tierra del Sol stands in contrast to the island's only other course, Aruba Golf Club. But like its smallish, nine-hole neighbor, and most other Caribbean layouts for that matter, water is in short supply.

"Aruba gets about 10 inches of rain a year," said Jones' associate designer Kyle Phillips. "It's basically a desert surrounded by water. The irrigation water for Tierra del Sol comes from a water treatment plant transported through four miles of pipe."

Water is slightly less of a problem farther east in Barbados, where Jones II also designed Royal Westmoreland, a new 18-hole layout that opened nine holes last fall with a second nine scheduled to open in late spring.

Forty to 50 inches of rain fall annually on Barbados, an independent member of the British Commonwealth. Runoff and deep wells located within the coral limestone underlying the island replenish the 9-million-gallon pond that supplies the bulk of 150-acre Royal Westmoreland's irrigation water.

"We prepared an extensive maintenance program that is environmentally friendly," said project director Coleman Kicklighter. "We have to be sensitive to the water situation here, just like everyone else in the Caribbean."

Most Royal Westmoreland golfers will come from two exclusive Pemberton Resort's, the Glitter Bay and Royal Pavilion hotels located a quarter-mile away. However, an increasing number will be members of the 400-plus acre Royal Westmoreland residential community, which will eventually contain 300 luxury villas ranging from $300,000 to $1 million.

"Play on the Westmoreland course will undoubtedly become more restrictive over time," Coleman said. "We see this appealing to the pre-retirement and migratory community, with most coming from the United States and United Kingdom."

Developers of the Royal Barbados resort/residential complex hope to begin construction this spring on the first 36 of what could eventually be a 90-hole facility. Most permits are in place and financing is being sought, according to Canadian developer Brian Turner. Robert Cupp designed the first 36 holes, which could be ready for play sometime in 1996, Turner added.

"We could probably use one more 18-hole, public course on Barbados," said Steve Nile, director of golf at Sandy Lane Resort, which plans to renovate nine of its existing holes and build an additional nine Joe Lee-designed holes beginning in early 1996. That will make Sandy Lane a 27-hole complex.

"Barbados has such a strong infrastructure and a very well-established population. The island is relatively stable and fairly affluent by Caribbean standards. So it attracts people. We'd like to see Barbados become a major golf destination like Amelia Island in Florida or the South Carolina coast. We'd like to be known for having the best golf in the Caribbean."

The only thing that could stand in the way of that happening is resistance from some local residents to further golf development. Water is their rallying cry.

"It's not usually a matter of the quantity of water," Niles said. "There's plenty. It usually involves the political correctness of taking water from a residential zone and using it on a golf course."

"It's often just a lack of education. People don't understand the positive benefits golf can have on the economy. Barbados is driven by the tourist industry. We have 8,000 hotel rooms on the island and golf can help fill them."

The owners of the Jolly Harbor Resort on Antigua to the north are rumored to be considering building a course on Trinidad or Tobago, Nile added. Grenada has recovered from the U.S. invasion of several years ago and may be in the golf development market as well, according to Bowden.

out property for a Karl Litten-designed course that is sched-uled to open in March. A man-agement firm is operating the property, which will cater prima-

arily to Jolly Harbor guests.

“Antigua is ripe for develop-ment,” Bowden said. “It’s similar to Barbados, but not as intensely
developed.”

Litten agreed, noting the gov-ernment is repaving 47 miles of road, among the worst in the Car-ibbean. “There’s talk about an-other three courses on the is-
land,” he added.

The Four Seasons Resort course on Nevis opened two years ago. The mountainous Robert Trent Jones Jr.-designed lay-out is reportedly doing well.

On Saint Martin, developers of a time-share resort in Port de Plaisance want to build an 18-hole golf course. Bowden said. The 37-square-mile island is half French, half Dutch. The planned facility is

bogged down in the bureaucratic red tape that dogs projects strad-dling the split nation.

GREATER ANTILLES

Roy Case was the architect for the Links at SafeHaven Golf Club on Grand Cayman, an 18-hole semiprivate layout that opened last April. The fairly high $2,200 annual dues for members and $80 greens fees for daily-fee players resulted from several factors.

Material dredged from a man-grove swamp had to be thor-

oughly washed to rid it of saline before being used as fill, said SafeHaven general manager David Bailey. So did the clay-
coral mix that was used for top-soil on the barren landscape.

The lack of surface water on Grand Cayman required SafeHaven to purchase its irriga-
tion water from a desalination plant. “They guarantee us a cer-
tain amount of water per day,” Bailey said. “But it’s not cheap.

We spend about $40,000 per month for irrigation water for the entire SafeHaven complex (which includes residential lots and a resort).”

Construction of a Robert Cupp-designed course was supposed to be well along by now at Drax Hall Estates in Jamaica. But minimal earth moving has been done for the 27-hole course, according to sales manager Joy MacDonald.

A drop-off in North American and United Kingdom tourists as well as financing problems have slowed the project, which includes 147 villa lots and a 260-room hotel. “The hotel and course will be built together,” MacDonald said. “We expect to get going on both later this year.”

Work is underway on the first course built in Cuba in 30 years. Golf Design Services of Canada is designing the 55 million, 18-hole layout for the Cuban gov-

ernment on the Vara Dero penis-

ula. Other courses are expected to follow, especially if President Fidel Castro loosens his grip on the area’s largest island and seeks foreign tourists.

In Puerto Rico, a $3.8 million renovation is taking place at the four Robert Trent Jones courses at the Hyatt Dorado Beach Resort & Casino and the Hyatt Regency Cerron Mar Beach Resort & Casino. A comprehensive irrigation project on the Dorado West and East courses has been completed and new cart paths added. A simi-
lar irrigation project is underway for the Cerromar North and South layouts.

The Links at SafeHaven Golf Club, which includes a Raymond Floyd-designed course, Ritz Carlton hotel and 225-slip mar-

ina set to begin construction on the island of Grand Exuma.

A second golf project on Andros Island, the largest of the Bahamian group, is also planned. Though not as elaborate as the Bahama Club, it will benefit from that rarest of natural systems in the Caribbean, a huge under-ground aquifer.

An Atlanta businessman has floated the idea of developing a Myrtle Beach-type course develop-

ment in the Bahamas with over 100 courses, Bowden said.

While our new Seed & Soil Caddie for Powered Golf Carts is not the first system ever invented for carrying seed and soil to the fairway, it certainly is the best. Compare the advantages for yourself.

Naturally, it’s easy to use. Players simply grab it by its integral handle-spout and pour the mixture into the

divot. It’s easy to fill, too, since the entire bottom is a

screw-on cap. To keep the rain out, we curved the

spout. And we built it to last for years!

It’s ideal for use on all brands of golf carts, and all necessary hardware is included for quickly and easily mounting the Holder to each side of the cart’s framework or basket.

So why not make it easier for your golfers to repair divots?

Contact your nearby Standard Golf distributor and ask about our new Seed & Soil Caddie for Golf Carts. It’s the best way to turn your cart fleet into a divot repair armada!

Turn your cart fleet into a divot repair armada.

While our new Seed & Soil Caddie for Powered Golf Carts makes it easy for your golfers to pour on the medicine wherever they make a divot!
