Eagle Interface for Greens Construction

NGF report

Continued from page 62

year's "Golf Participation in the U.S." report is based was conducted for the NGF by Market Facts, Inc. of Chicago. As in past years, a total of 30,000 households were surveyed and results were weighted with key U.S. Census demographic variables to ensure their national representation. This allows the national participation rate to be estimated to within 0.2 percent with 90 percent confidence. "On our estimates of rounds, I think we're in a 2- or 3-percent error range," said Beditz, "which is a lot of rounds when you think of it on a national basis."

But we do need more accurate results. One thing to remember: These are consumer estimates from the previous year when you think of it on a national basis. We do need more accurate results. One thing to remember: These are consumer estimates from the previous year - they're not facility-based. We're working on a methodology that is based directly on the turnstile. "There hasn't been any material change in rounds played, though we have been adding 2 or 3 percent each year to the course supply. We would be delighted if we could see equal growth in rounds played... As all politics is local, so is rounds-uptake. They're not facility-based. We're working on a methodology that is based directly on the turnstile. "There hasn't been any material change in rounds played, though we have been adding 2 or 3 percent each year to the course supply. We would be delighted if we could see equal growth in rounds played... As all politics is local, so is rounds-uptake.
