Foster Busy in Texas

Houston, Texas — Following on the success of the Quarry in San Antonio, which opened in 1993, Keith Foster has secured another design opportunity within the state of Texas. The latest, Cypresswood Golf Complex here, has retained Foster to design its third 18-hole course. The site has stands of pines and magnolias, as well as ground "perfectly suited for an outstanding golf course," Foster said.

Art Hills Track Opening

Petoskey, Mich. — The first nine holes, named The Links, at Boyne USA's Bay Harbor Community is scheduled to open July 1. Art Hills designed all 27 holes at the facility. The second nine (The Preserve) will open in September and the third nine (The Quarry) next year. CMS Energy Corp. of Dearborn and Victor International of Southfield are developing Bay Harbor, etc.

HARBOTTLE RENOVATIONS UNDER WAY

Los Angeles — Ground has been broken on two major renovations by golf architect John Harbottle. The Angeles Country Club North Course, a George Thomas original design, is being restored with the help of Landscapes Unlimited; and the remodeling of Stockton Country Club, credited in part to Alister McKenzie, will be completed by Flint Golf.

Rees Jones on the Cape

Nantucket, Mass. — The planning board has approved plans for a private, 18-hole golf course on 250 acres of prime island real estate known as the Coffin Farm. The Nantucket Golf Club will feature a par-72 course designed by golf course architect Rees Jones. The proposed course will cover 67 acres of the parcel. Construction of the club on former farmland will cost an estimated $21 million.

Ascoa on line

Chicago — The American Society of Golf Course Architects expects to have its web site on line by early June. The address is www.golddesign.org. Information will include association history, addresses and phone numbers of members, environmental case studies and a developer handbook. The handbook will assist in selecting an architect, provide information on course redesign and lend insights into developing municipal courses.

Development

Palmer-Seay team: A time-honored tradition

Twenty-six years ago golfing legend Arnold Palmer linked up with architect Ed Seay to design a golf course. More than 125 courses later, they are still together and among the most sought-after architects in the world. Palmer, 66, the golf icon, winner of 60 PGA Tour events; Seay, 58, the consummate course architect and former president of the American Society of Golf Course Architects. Catching them at a rare time when they both were in one place, we asked them these questions.

GCN: Outside of America, things are so varied in regards to regulations. Is there one country you enjoy working in more than the others?

Seay: I’ve enjoyed Ireland, Japan and Australia. Only in Australia and Ireland was English spoken when we first started. I started working in Japan with Arnold in 1971 and there was very, very little English spoken. We were never without an interpreter. That has changed a lot.

GCN: Any memorable stories showing the uniqueness of working in another culture?

Seay: You wander through a fish hatchery outside Bangkok and along this strip of land down by the fish ponds. It’s about a foot wide and a foot above water. In front of us about 30 guys are beating on straw baskets with sticks. I ask what they were doing, and I’m told, “They’re just..."

Better relations, products are GCBAA’s new goal

By Mark Leslie

Plainfield, Ill. — With its finances stabilized and certification program fine-tuned, the Golf Course Builders Association of America’s (GCBAA) new president is focusing on improved relationships with course architects and building a better product.

Paul Eldredge, president of Wadsworth Golf Construction Co. headquartered here, said: “The next emphasis should be our alliance with the architects, finding ways to improve the quality of golf courses, working with the environmental issues that face us all, and assuring we don’t do anything that would be negative to the continued expansion of golf.”

“All the people in the industry — superintendents and allied associations — have begun to work together to identify those issues and come to grips with them before they become a major deterrent to golf.”

The GCBAA will address some of these issues at its summer meeting, Aug. 8-10, in Louisville, Ky. A panel on the quality of golf courses, working with the environmental issues that face us all, and assuring we don’t do anything that would be negative to the continued expansion of golf will be held.

Builders facing trouble collecting final payments

By Mark Leslie

Chapel Hill, N.C. — Retainage: the scourge of golf course builders. That’s the definition painted by leaders of the Golf Course Builders Association of America.

Builders “have trouble collecting on about one of five jobs,” said GCBAA President Paul Eldredge of Wadsworth Golf Construction Co., which has offices across the United States including Hawaii. “At the margins we work at today, we can’t afford that.”

Retainage is the amount of money a developer holds back from a builder until the project is complete. GCBAA Executive Director Phil Arnold said: “That can be $800,000, and it is often the builder’s entire profit.”

Even though retainage is a portion of the agreed-upon amount to be paid the builder, “some owners take the attitude that it is always going to be their money and they’re not going to give it to you,” Eldredge said.

What to do?

Wogan solo no more

By Mark Leslie

Topsfield, Mass. — Little did George Sargent Jr. know when he took his first job out of college working at the Phil Wogan-designed North Conway (N.H.) Country Club that one day he would be a partner with Wogan. But today that is true. Long-time golf course architect Wogan and superintendentre-turned-contractor/project manager Sargent have incorporated as a new design team, Wogan and Sargent, Inc.

Working out of headquarters here and in Franklin, N.H., Wogan and Sargent have several projects under construction and more in the works.

“I’m fortunate to be working with Phil,” Sargent said. “His experience, along with my background in the business, makes a..."
