Lesco acquires Pro-Lawn

C L E V E L A N D — Lesco, Inc. has signed an asset purchase agreement to acquire the Pro-Lawn Division of Agway, Inc. for an undisclosed amount of cash.

Pro-Lawn is the largest regional supplier of professional turf care products serving the golf course, landscape, commercial and lawn care market in the Northeast. The division markets fertilizer, turf seed, turf protection and other specialty products in 16 states to a broad array of customers. Annual sales revenue is approximately $50 million.

Said William A. Foley, chairman, president and chief executive officer of Lesco: "We believe this move strengthens our position in the strategically important Northeastern U.S. market.

Lesco, Inc. now serves more than 90,000 customers nationwide and distributes its product through its Lesco Service Centers, Lesco Stores-on-Wheels, lawn care service representatives, telemarketing and catalog sales.

Flowtronex PSI, Amiad join forces

C O L U M B U S, Ohio — Zebra mussels, fresh water clams, algae-infested water sources. Inspired by the golf industry's growing dependence on high quality filtration systems, pump station manufacturer Flowtronex PSI has forged a precedent-setting marketing agreement with filtration systems manufacturer Amiad Filtration Systems.

The agreement, which took effect Jan. 1, grants Flowtronex PSI world wide marketing rights to Amiad filters for the golf course industry. What that means, said Flowtronex PSI President Dave Brockway, is greater responsiveness to customer concerns.

"Until recently, we simply followed customer specifications when it came to pump station filtration," said Brockway. "But filtration emerged as a more crucial issue in the last few years due to mounting water-quality problems. Superintendents...

NEW PRODUCT OF THE MONTH

Behold, the Water Hog, an Irish invention that removes surface water at a rate of 6,000 gallons per hour. Now manufactured in the U.S. by Star Transportation of Englewood, Colo., the ride-on Hog, powered with an 11-hp Honda engine, retails for $11,500, while the Hog Jr., a light-weight, walk-behind model, goes for $875. Both machines use the principal of sponge-covered, take-up drums which act as wheels. The sponges, which are non-invasive to the terrain, feed water to a drum which collects and stores the water, which is wheeled away and emptied.

The ride-on model, as you can see, simply shoots the water away — up to 50 feet away. For more information on the Water Hog, call Star at 800-495-4429. For more new products, see page 66.

Fish-based fertilizer shows real promise

BY JOHN SCHMITZ

Cold ocean waters off the Oregon coast are the principal source of a new organic fertilizer formulated to grow healthier greens, tees and fairways. So far, the product is showing good promise during testing at a nine-hole course on the Long Beach Peninsula in the state of Washington.

BioGro (9-3-5), which is made by fish feeds producer Bioproducts of Warrenton, Ore., consists mainly of the organic by-products of fish-processing plants along the Oregon coast. Rob Gould of Pacific Organics in Salem, Ore., who consulted with Bioproducts, said the natural, slow-release nutrients it contains actually serve to increase the health of soil microbcs, which in turn leads to healthier grass plants.

There's certainly nothing new about...
