Stressed Out!

Superintendents and their turf living too close to the edge, say researchers

By Mark Leslie

MONTREAL — Declaring that "pre-stress conditioning" will be the new buzz word in turfgrass management, Dr. Joseph DiPaola told Canadian superintendents here they should develop long-term agronomic plans for their golf courses.

Speaking at the Canadian Golf Superintendents Association's International Turfgrass Conference and Trade Show, DiPaola said: "Our job is very simply to grow tomorrow's turf today. We have to be in a position of putting plants in place for next month, for next summer, well in advance of stress...."

"The heads-up is that we are going to be hearing more about pre-stress conditioning... We don't have all the answers right now. But we've got better answers today than we had five or 10 years ago. We can

Course taking shape atop Montana Superfund site

By Mark Leslie

ANACONDA, Mont. — It's a legend before its own time, designed by a legend in his own time. Old Works Golf Course won't open until May 31, yet it has already made its mark: A Superfund cleanup site, which Jack Nicklaus called "one of the ugliest properties I've ever seen," transformed into a golf course that builder Chip Roe lauded as "breathtaking."

The former copper mine closed more than 90 years ago, but left behind a legacy of arsenic over its 250 acres. Turning it from a moonscape-like wasteland into a safe golf course

PGA Tour, Deere ink 3-tiered deal

By Hal Phillips

MOLINE, Ill. — In a deal that impacts three distinct segments of the golf industry, John Deere has reached an unprecedented nine-year agreement with the PGA Tour to provide turf equipment to the Tournament Players Club (TPC) network of courses, assume title sponsorship of the Quad City Classic and provide 385 acres for a new TPC course development here.

The nine-year partnership — comprising three consecutive 3-year leases — was announced at an April 2 news conference at Deere's world headquarters.

Other golf industry corporations have associated themselves with professional tour events, including The Scott Company's sponsorship of The Tradition.
"ClubLink was looking for a platform and an existing portfolio and management team," explained Hunter, the president and chief operating officer at GolfSouth. "We were looking for deeper, more reliable funding sources.

"We feel like this relationship gives us an advantage, quite frankly, because ClubLink is a funding source that understands the golf business a lot better. They're in the business in Canada, which makes our affiliation a little different. Ultimately we may evolve into a full-fledged merger.

Justin Conidis, ClubLink's vice president of corporate development, also expects the companies to grow more interdependent.

"ClubLink and GolfSouth are jointly reviewing GolfSouth's capital and expansion plans," Conidis said. "It is the intention of ClubLink and GolfSouth to work together to establish and implement a business plan for GolfSouth which will both enhance its position as a leading U.S. golf course company and facilitate its ultimate merger with ClubLink."

Through its wholly owned subsidiaries — GolfSouth Management, Inc., GolfSouth Capital, Inc. and GolfSouth Clubs LLC — Greenville-based GolfSouth controls or manages 23 golf course projects: eight which remain in development, 13 existing operations in which the company has ownership stake, and two it manages for outside ownership. The majority of these courses are in the Richmond-Baltimore corridor, the Southeast and Central Florida. (For a complete list of GolfSouth holdings, see chart on pages 50-51.)

Hunter acknowledges the golf industry remains rife with poorly managed facilities ripe for operations assistance — many of them available at bargain-basement prices. Yet GolfSouth has also displayed the willingness to build its own facilities.

"It's a market-by-market consideration, whether you should be building or acquiring," said Hunter. "We'd like to have our holdings in clusters. I have to say, with a couple of exceptions, we haven't been able to accomplish that. We have three courses in the Richmond-Baltimore corridor. We always look at acquisition first, but there is a course shortage there; plus, the quality of what can be purchased isn't what it could be. So we've done most of our building in that region. It's part of our fill-in-the-blanks strategy.

In Virginia, GolfSouth has two projects in planning (Cypress Creek Golfers' Club in Smithfield, and Pleasant Valley Golfers' Club in Fairfax County) and two more under construction: South Riding Golfers' Club in Loudoun County and Chesdin Landing Golfers' Club in Richmond. Overseeing these projects is Noel Tuck, Barton's son and GolfSouth's vice president of construction.

Other key members of the GolfSouth management team are Dr. Joel Barber, vice president of agronomy (formerly head agronomist for Golf Enterprises); Marc Brady, group manager for GolfSouth's Mid-Atlantic holdings; Don MacLaren, group manager for Florida; and Phil Wiggins, vice president and group manager for the remaining courses.

Other team members include Ron Hakala, vice president of sales and marketing; Controller Dean Doolittle; Tom McKay, vice president of sales and marketing; and Betti Wright, director of merchandising.

"We feel like we've built a very strong management team" said Hunter. "What we're trying to do is appeal sound business concepts to this business; pro-active marketing, focused marketing, common-sense but progressive business management practices - incentive programs, networking, resource management. Ultimately, we'd like to take advantage of the synergies that result from having groups of courses."
