Retiring Feindt’s lesson for a lifetime: Take turf seriously

By Mark Leslie

ROCHESTER, N.Y. — When Pennsylvania State University Professor Bert Musser laid it on the line back in 1959 — choose turfgrass or nursery management — Bob Feindt quickly picked turf. And he hasn’t been sorry — except perhaps that college summer when he had the chance to work for a nursery for a lot more money than at Seaview Country Club in Warwick, R.I. He could have used the money, but his famed professor had disdain for jobs that didn’t steer his pupils toward turf.

“He told me, ‘That’s fine. Take the nursery job and you won’t be in the turf program.’ You jump into it with both feet. You have to be dedicated and you have to be sincere. He went on and on. When I left his office I didn’t think there was anything else in this world but grass. That was Bert Musser.’

And that is Bob Feindt.

After dedicating his career to turfgrass maintenance — nine years at Otter Creek golf course in Columbus, Ind., and 26 at Country Club of Rochester — the Penn State alumnus retired Dec. 31. No regrets, except one.

“I will miss the course itself,” he said. “I won’t miss coordinating tasks, the day-to-day routine things. But you get to the point where the course becomes part of your life, your family.”

That particular part of his family has become more challenging — and exciting — to work with over the last three decades, Feindt said. A former Indiana Golf Course Superintendents Association president, and member of the Midwest Regional Turfgrass Foundation and Pennsylvania Turf Council, Feindt pointed to innovations that have led to more sophisticated turf care.

“I think maybe we’ve created a monster,” he said. “The golfer says, ‘This is what I want,’ and we say, ‘We can accomplish this,’ and we go to the manufacturer and tell them what we need. Twenty or 30 years ago we never heard of greens being cut at 1/8 inch. Since we started doing this, we’ve created other problems — moss on greens, more diseases, things of this sort.”

The U.S. Golf Association, he said, is now saying the pendulum has gone too far in trying to reach tournament conditions for the Tour professionals, and that the trend should reverse. “They’re now saying to raise the height of cut, not stress the grass as much, and manage the water,” Feindt said. “You have courses today that are hand-syringing fairways. This was unheard-of [in the past].”

Perhaps today’s toughest challenge, along with administrative duties and turf care, is finding and keeping qualified crew members, he said.

“The days of getting high school or college kids here for the summer are gone. I keep preaching to our people: You’ve got to use common sense out there...

“It’s like working in a fish bowl. People see what you’re doing. Three or four kids edging a bunker is not acceptable. You and your assistant have to be on top of things like that.”

He will miss his course as well as a rapidly advancing industry.

“What is so exciting about the industry is, we’re going through some great changes,” he said. “There are great opportunities: the Audubon Cooperative Sanctuary

THE WORLD’S BEST WALKER

INTRODUCING THE NEW JOHN DEERE 220A

Another step forward. That’s the new 220A story. The latest addition to John Deere’s world-class lineage of walking greens mowers. Based on superintendent suggestions, the 220A brings new performance, reliability, and operator advantages to the ANSI B71.4-1990 certified design first introduced in the 220.

Read more about these improvements. Then, try the new 220A for yourself.

NOTHING RUNS LIKE A DEERE®

STEP 1

New operator-presence safety bail fits more smoothly against the handlebar.

STEP 2

Engine isolation mounts and new lateral bracing combine to reduce vibration.

N.J. environmental alliance hires Sadlon as executive director

WARREN, N.J. — The Alliance for Environmental Concerns (AEC) has selected Nancy P. Sadlon as its new executive director. The AEC will also have a new address and phone number.

Sadlon has been involved with environmental issues and regulations for 14 years, most recently for the U.S. Golf Association (USGA) as its environmental specialist. She has provided guidance on wetland issues, habitat enhancement, pond management, erosion control, integrated pest management, water conservation and other environmental regulatory issues.

She holds a bachelor's degree in landscape architecture/environmental planning and design from Rutgers University, where she continued her postgraduate studies focusing on wetland ecology and environmental issues. She is a principle of Sadlon Environmental, a consulting firm providing professional expertise on various issues. Sadlon takes the reigns of the AEC from its former executive director, Ilona F. Gray, who held the position since 1985. Gray leaves the position to relocate to Germany with her husband.

Contact the organization at P.O. Box 4292, Warren N.J. 07059-4292; phone 908-563-9252 or fax 908-560-8588.

Feindt retires

Program, some of the new grass varieties, naturalizing the golf course with prairie grass and things like that. After 45 years with the Penn State Turfgrass Alumni Club newsletter, that’s enough, he says.

JUST TOOK 5 STEPS FORWARD

STEP 1
New, more powerful, overhead valve engine quietly delivers 4.0 hp.

STEP 2
New mounting design keeps grass catcher more secure.

STEP 3
New basket shape delivers improved clipping collection.
