NATIONWIDE TEST GREENS TO YIELD RESULTS THIS YEAR

By MARK LESLIE

FAR HILLS, N.J. — Inspired by the old pie greens of the 1930s and '40s, three national organizations expect to plant test putting greens at 16 golf courses and have initial data readings by the end of the year.

“We're excited by this,” said Jim Snow, national director of the U.S. Golf Association (USGA) Green Section, which is sponsoring the project along with the Golf Course Superintendents Association of America (GCSSA) and National Turfgrass Evaluation Program (NTEP). "One of the things superintendents have wanted is data from variety trials that was gathered under golf course conditions. For whatever reasons, even if they are cut daily, most sites are not maintained that way. They don't get the traffic you get on a green.

"There have been some prominent grasses over the years that looked great in tests but failed miserably under field conditions." With $15,000 in funding each, the participating golf courses will build practice greens, which will be used as test plots for bentgrasses or Bermudagrasses. As of mid-May, 17 bent and 12 Bermudas were expected to be included, although that number will change.

Four courses will test the Bermudas, a dozen will test bent, according to NTEP National Director Kevin Morris.

“We're trying to get the bentgrass greens built this summer and established this fall,” Snow said. "We can begin taking data this fall regarding establishment rate and other things. Next year will be the first full year.”

The Bermudagrass greens will be planted next spring. Professors at nearby universities will be charged with keeping the data.

GETTING OPEN-READY

Latshaw faces compelling challenge at Congressional

By MARK LESLIE

BETHESDA, Md. — When the U.S. Open begins on June 12 at Congressional Country Club here, it will mark the beginning of the end of the three longest years of Paul R. Latshaw's life.

"It will be a letdown, actually," said the Congressional superintendent, "It's been a three-year grind." For three years, every day has pointed toward 96 hours in 1997 when the venerable old course becomes the focal point of golf for the world.

Latshaw had tackled the rigors of maintaining Augusta National for Masters competitions in 1986-89 and of preparing Oakmont (Pa.) Country Club for PGA and U.S. Open events in 1978 and 1983. And his arrival at Congressional was akin to University of Kentucky coach Rick Pitino taking control of the woeful Boston Celtics last month. The golf world looked on in anticipation.

"These were the most publicized greens in the world,” Latshaw said of Congressional's putting surfaces, which were in sad condition but for reasons no one could fathom.

"Everyone said, They're never going to make it; forget saving "

Texas A&M program a model for clubs considering Audubon

COLLEGE STATION, Texas — A unique program at Texas A&M University is helping more than 70 courses in Texas, such as Champions Country Club, to pursue certification as wildlife sanctuaries under a program of the Audubon International and the United States Golf Association.

Lake Side Country Club in Houston is the first fully-certified course in Texas, according to Audubon ecologist Marla Briggs. Some 2,000 courses in the United States and Canada have paid a $100 membership fee with the intent to pursue the program, and 85 have completed the strenuous, six-part program since its inception in 1991, she said.

But the unique boost in Texas, where long sunny days have sparked a passion for golf played on some 900 courses,
