WACO, Texas — Students in golf course and turfgrass management (GTM) at Texas State Technical College (TSTC) here are building a three-hole golf course, working with course architect Jeff Brauer. The immediate past president of the American Society of Golf Course Architects, Brauer is one of several people donating services for the job after being contacted by the U.S. Golf Association Green Section Director Jim Moore, advisory committee chair for GTM. The GTM advisory committee is a group of professional representatives who keep TSTC updated on skills the industry needs in graduates.

“We were thrilled to hear Brauer wanted to work with us,” GTM Department Chair Tinker Clift said. “We really appreciate his involvement in this project. It means a lot to have someone of this caliber working with us at TSTC. This professional design enhances the realism of the project.”

Clift said the project gives students a new level of important hands-on experience. Developing a golf course allows students to see a project progress from concept to construction. They learn to operate different turfgrass equipment, install the irrigation system and maintain the course. GTM plans to build one hole each year. TSTC plans to continue expanding this project as long as land is available.

Once a hole is complete, students will continue to use the area as a laboratory to develop their skills in golf course care. One hole is complete and employees and students can use it free of charge. The TSTC Student Activities Department also plans to use the facilities for intramural golf activities in the future.

Other donors include: Ogel Bay-Norton Industrial Sands of Brady which donated 10 trucks of root-zone mix, valued at $2,000; Shamrock Irish Peat Products of Brady which donated four pallets of peat moss (imported from Ireland), valued at $1,200; Rain Bird of Dallas which donated irrigation heads for the golf green; and Coastal Turf, Inc., of Bay City, which donated 5,000 square feet of Champion grass sprigs; valued at $3,200 and 1,080 square yards of 419 Bermuda-grass, valued at $1,890. The TSTC Student Activities and Intramural departments also donated gravel for the course.
