Head agronomist takes sales route to top

By PETER BLAIS

LA QUINTA, Calif. — Eric Schmidt came at his upper management position with KSL Fairways/KSL Recreation Corp. from a different direction.

Schmidt — who is director of agronomy for the KSL Fairways' 26 mid-priced public courses and head of golf operations purchasing for KSL Recreation's four luxury resort golf facilities — got his start in sales.

In the late 1970s, Schmidt received his bachelor's degree in agronomy and went to work selling for his father's seed distributorship, Indiana Seed Co. "I'm a lot like my Dad," Schmidt said. "We're both very outgoing and I just gravitated to marketing."

After several years in the family business, he moved to California and joined the turf and ornamental sales division of Foster Turf Sod Farms, a subsidiary of defunct Landmark Land Co.

About the time Landmark's financial woes hit the headlines, Schmidt was ready for a move. He wound up in Malaysia with a hydrosedding company. The firm's plans to become a major player in the Asia-Pacific hydrosedding market never materialized and six months later Schmidt returned to his previous job with Landmark, which was then in receivership with the Resolution Trust Corp.

KSL Recreation, which had acquired a dozen public courses from a management company called Fairways, then purchased several former Landmark properties, including Foster Turf, PGA West and LaQuinta Club & Resort. KSL spun off Foster Turf and offered Schmidt his current position.

"I've never been a superintendent at an individual golf course," he said. "But I have overseen the sale of massive amounts of bermudagrass and bentgrass sod."

That knowledge of turf, coupled with his experience in Corporate America, has helped Schmidt succeed in his new position. "Corporate golf," he said, "can provide certain things that equity [member-ship-owned] clubs can't. Some people want the prestige of an equity club and that might be the way for them to go. But it comes with a price — the insecurity of having 400 bosses who may all want different things."

"In the corporate world, superintendents and upper-level managers have no more than five or six people looking over their shoulders. Management firms stress teamwork and won't tolerate rogue behavior. But you are rated objectively based on your performance. You won't be fired for crossing a member."

Which isn't to say that superintendents seeking advancement can be rude to customers. Quite the contrary. "We try to establish the KSL culture at all our properties," Schmidt said. "We want our superintendents to interact with our customers and encourage their staff to wave to or speak with patrons when the opportunity presents itself."

In his executive position, Schmidt acts as an intermediary between senior financial and marketing managers and the course superintendents and district superintendents overseeing KSL properties. "Top executives usually don't have an agronomic background," he explained. "I'm the point person they depend on to translate the technical information into something they can understand."

"In the accounting world, answers are predictable. You add this to this and you always get that. But when you're working on a golf course, and unpredictable things happen, that's where a sales background helps."

Three different elements of the job lend themselves to a sales background. "First is the marketing of the properties and the sales of the existing stocks of bermudagrass and bentgrass sod," Schmidt said. "Second is the sale of additional turf and maintenance services. Last, we're trying to develop and build new revenues, such as Jorge's Chophouse at PGA West."

"I'm a numbers person," Schmidt said. "I'm all about the numbers and the bottom line."

"I've never had a graduate degree, but I've had a lot of corporate training," he said. "Business and accounting are the great equalizers."

Schmidt's path towards upper management at KSL Fairways/KSL Recreation Corp. reflects the increasing need for the skills that agriculture majors bring to the turf management industry.

"I'm happy that the agronomy major is becoming the dominant major for people who want to enter the turf management industry," Schmidt said. "This is the future.
CMAA elects new slate of officers

ORLANDO, Fla. — John A. Jordan, general manager of Cherokee Town and Country Club in Atlanta, was elected president of the Club Managers Association of America (CMAA) at its World Conference on Club Management held here.

Jordan has been serving as the general manager of the Cherokee Town and Country Club since 1967. Prior to this appointment, he was the country club manager of Cherokee.

He joined CMAA in 1965 and was first elected to the board of directors in 1990. During his tenure, Jordan has served on several national committees including the Budget and Finance, Executive, Strategic Planning, Bylaws, Club Management Institute, Chapter Services and Conference committees.

Willmoore H. Kendall, general manager of Woodmont Country Club in Rockville, Md., was elected vice president of the CMAA.

Paul K. Skelton, vice president, Golf & Club Operations, Desert T oon Companies and Hassayampa Golf Club in Prescott, Ariz., was elected the association’s secretary-treasurer.

Also elected to the board were Dennis R. Ahearn, secretary-general manager of The Country Club of Orlando; Warren L. Arsenault, general manager of the Foinse tt Club in Greenville, S.C.; Henry Weddington, general manager of Piedmont Driving Club in Atlanta; and Gordon Foster Welch, general manager of the Oaks Country Club in Tulsa, Okla.

Schmidt

like weather and disease intervene, the results aren’t always predictable. One of my main jobs is helping upper management understand that. Sometimes, it’s like being a referee and mediating between the two. I’m an Agronomy 101 professor for one side and an Accounting 101 instructor to the other.”

Probably because of his background in sales, Schmidt the KSL golf operations purchasing director sees his relationship with vendors as a partnership rather than a battleground.

“Vendors can always ask me why I bought a particular product from another supplier and I’ll give an honest answer,” he said. “For example, a manufacturer may have an exceptional fertilizer product and price it high. But if there are fairly comparable products from other manufacturers at a lower price, then I’ll have to justify spending the extra money.

“T come from a sales background and know there is nothing more frustrating than not getting a sale you were expecting. I’m always willing to work with vendors to show them how to modify sales so they can work.”

Asked what he liked least and most about his job, Schmidt replied: “I do miss being outside. I get to each property two to three times a year. But you can usually find me in the office 10 hours a day.

“The other hand, the main part of this job is being a problem solver. That’s the best. I don’t just show people how to solve agronomic problems, but how to solve administrative problems and go through the right channels to get what it is they are looking for. That’s very rewarding.”

In your business two types of crabs are a fact of life. New Acclaim® Extra Herbicide provides excellent control of the crabgrass escape type. Even more concentrated than the original Acclaim, Acclaim Extra is 14% stronger. So lower rates give you the same dependable spot treatment control without damaging your existing turf.

Plus, Acclaim Extra also lets you reseed fescue and ryegrass immediately after the spray dries. It can also still be used on bluegrass, ryegrass, zoysiagrass, fine fescue and tall fescue. And Acclaim Extra controls crabgrass escapes from the 1-leaf stage right up to just before seed head formation.

No preemergence herbicide is perfect, so make postemergence Acclaim Extra a part of your season-long crabgrass control program. As for that other type of crab... sorry, but you’re on your own. "Wait 3 weeks for bluegrass, zoysiagrass.
