Toro hooks up with Carnoustie

CARNOSTIE, Scotland — In preparation for the 1999 British Open, Carnoustie Golf Links has signed a three-year working partnership deal with turf-care provider Toro. The deal, worth more than £380,000, includes the supply of Toro turf-maintenance equipment and on-site support for the Open Championship, Carnoustie’s first since 1975.

Head greenkeeper at Carnoustie, John Philp, had been impressed by Toro machinery at his previous berth, St. Andrews, where he had prepared for the 1984 Open. "I chose Toro based on my past experience," said Philp. "I know the products and am particularly keen on the greens and fairways mowers."

While all three Carnoustie courses are renowned for their excellence, the publicly owned links on the North East coast of Scotland has many of the same problems as other, less illustrious tracks.

Consider that the course sees around 50,000 rounds per year and the scale of Philp’s task becomes apparent.

Philp’s new Toro fleet will include: seven GE2300-D greensmowers; one RM2300-D utility mower; two RM5300-D fairway mowers; a GM3000-D for cutting semi- roughs and five of the new GR1600 pedestrian mowers for tees and greens collars. In addition will be six GR500 pedestrian greensmowers on order for the Open.

Sky’s the limit for John Deere Co.

CHARLESTOWN, Mass. — According to a recent report in The Boston Globe, John Deere Co. has acquired Player Systems Corp., the developer and manufacturer of Sky Links, a GPS-driven player positioning system for golf cars.

Under the new arrangement, Player Systems will become John Deere Golf Technologies Inc., a new division of Deere. All manufacturing, distribution and marketing will continue in Player's current Charlestown location.

The Sky Links system is installed in 30 courses across the country at an average cost of $250,000. Player Systems reports that it did $8 million in sales last year.

Itronics turns byproduct into gold

RENO, Nev. — Itronics Inc. announced that its photobypmodity recycling subsidiary, Itronics Metallurgical, Inc., increased sales of its Gold'n Gro liquid fertilizer products by approximately 70 percent in the second quarter of fiscal year 1998 compared to total fiscal year 1997 sales.

Itronics develops a fertilizer in a proprietary process from used photographic chemicals. Its technology allows the recovery of virtually 100 percent of the silver and other heavy metals in used photographic chemicals.

Gold'n Gro is sold to several major lawn-service companies in northern and central California and to more than 25 golf courses in central and southern California at present.

"In January 1998 only two golf courses were using our fertilizer. Currently a number of additional golf courses are testing this fertilizer and we expect sales to continue to grow," said Paul O'Connor, chairman and chief executive officer of Itronics.

SIMPLOT COMBINES SEED/FERT. BUSINESSES

BOISE, Idaho — The J.R. Simplot Company has combined its grass seed and professional turf and horticultural fertilizer businesses.

Jacklin Seed of Post Falls, Idaho, and the BEST brand fertilizer business of Lathrop, Calif., will now operate as Simplot Turf and Horticultural Products. It will be marketer of seed, fertilizer and related services to the professional turf and horticultural market — this includes golf, landscape, sod, commercial nurseries and general turf.

Doyle Jacklin, president of Jacklin Seed, assumes the title of president of the newly-formed entity. Wayne Burk will continue to manage the BEST operations as Senior Vice President and General Manager of Fertilizer Products, reporting to Jacklin.

"Our goal is to be a major international supplier of products and services to the turfgrass and horticultural industry," said Jacklin.

SUPPLIER BUSINESS BUZZ

MTD launches Pro Line turf equipment

CLEVELAND, Ohio — At last month’s Outdoor Power Equipment Expo in Louisville, Ky., MTD Products Inc., an international manufacturer of outdoor power equipment, debuted its MTD Pro Line of professional lawn-care products, including wide-area mowers and turf-maintenance equipment.

While the company has yet to target the golf industry in its marketing strategy, the company appears to be well positioned to make a move into the market.

MTD’s new Pro Line consists of gear drive and dual hydrostatic mowers. Its gear-drive models have deck sizes ranging from 32”, 36”, 48” to 52”.

MTD’s full line for turf includes wide-area mowers, trimming mowers, blowers, over-seeders and aerators as well as hand-held power tools, spreaders and sprayers.

KUBOTA MAKES THREE MOVES ACROSS THE POND

THAME, Oxfordshire, England — Kubota UK Ltd. has made three new appointments within it’s Agricultural and Grass Machinery division.

Adrian Langmead is appointed as service manager at company headquarters in Thame; Tom Barnes, 13 years with Kubota, has been appointed marketing manager; and stepping into Barnes’ shoes is David Roberts who has been with the company for eight years.

St. Andrews Links inks deal with Barenbrug

OSTERHOUT, Holland/ST. ANDREWS, Scotland — St. Andrews Links Trust has appointed Barenbrug UK as its exclusive supplier of grass seed and related products, such as wild flowers.

The trend of ‘single-supplier deals’ in the machinery market has been well documented — St. Andrews and Toro being a recent example.

Michel Mulder, managing director of Barenbrug UK, concedes that: “This is the first official deal which is subject to a contract but we have very similar arrangements, with many other courses, Carnoustie for example.”

St. Andrews Links Manager Ian Forbes is looking forward to the opportunities that the exclusive supplier deal will bring.

“We will also be entering into an education programme with Barenbrug for our greenkeeping staff, looking into specialist areas of turf care.”

CHR. HANSEN NAMES NEW SOUTHEASTERN MANAGER

MILWAUKEE, Wisc.—Chr. Hansen BioSystems recently appointed Tom Perkins as regional manager for the Southeastern U.S. Perkins will be working with distributors with a focus on developing new business in both the Probiot and Biomate Brand product lines. He was most recently vice president of sales and marketing at H&N International, and for many years was with PMAg Products.

NOVARTIS PROMOTES OSBORNE

GREENSBORO, N.C. — Novartis Turf & Ornamental Products has promoted Jerry Osborne, former golf market manager, to the position of business development manager.

Osborne’s responsibilities will include developing new business opportunities with third-party companies through strategic acquisitions and alliances; growing the company’s ornamental business by working with large national accounts and management companies; improving internal processes such as new product launches; and negotiating with channel partners to maximize product portfolio sales in all market segments.

AgrEvo takes to the Web

MONTVALE, N.J.—AgrEvo Environmental Health has announced the availability of a new source of information for industry professionals with the introduction of the company’s green industry website at www.agrevo-green.com.

According to George Raymond, marketing manager, AgrEvo Green Industry, the website posts information on the company’s complete line of products for the green industry. The site will also include timely information as well as recent articles from the company’s newsletter for golf course superintendents.

Pennington ready with seed guide

MADISON, Ga. — The ink is still drying on the newest publication from Pennington Seed Inc. A collaborative effort by staff agronomists has resulted in the first edition of the Professional Turfgrass Seed Guide. The guide was developed with the information needs of golf course architects, landscape architects and specifiers of turfgrass in mind.

The color binder features more than 20 pages and is organized into tabbed sections on cool-season turfgrasses, warm-season turfgrasses and specialty seed items. Each section contains comprehensive planting and usage charts with English and metric measurements, variety descriptions and characteristics and variety specifications.

SAND BARRENS GOLF COURSE, NEW JERSEY

When your greens are seeded with L-93, golfers will go through almost anything to reach them.

At Sand Barrens Golf Club, you’ll find 25 acres of sandy waste standing between you and the greens. But once you get past the sand, you’re rewarded with the greenest, most uniform putting surfaces ever created. As a new course, the Sand Barrens needed a hardy, dense turfgrass that would establish and green-up quickly. That’s why they chose to cover their five acres of greens with Lofts’ L-93.

L-93 features improved resistance to numerous turfgrass diseases such as dollar spot, gray snow mold and brown patch. So it requires less fungicide in certain conditions than most other creeping bentgrasses. Its upright vertical growth and aggressive establishment helps prevent spike marks. And it’s been ranked #1 overall best performing creeping bentgrass variety for the past two years.

So the next time your greens, tees or fairways need seeding, give L-93 a try. You won’t believe how many golfers will come out to watch it perform.

“L-93’s grow-in performance surpassed all of my expectations. Its quickness of establishment and upright growth habit are quite impressive.”

Steve Maliszowski, Golf Course Superintendent
The Sand Barrens
Clermont, NJ

Griffin formalizes new team

VALDOSTA, Ga.—Griffin L.L.C. has announced the formation of the new business team for its specialty products group. The team will be headed by Owen Towne, global business director.

Joining the team are Jimmy Whatley, business director; Joe Mares, product development manager for insect control; Trey Warnock, sales manager for turf, nursery and ornamentals; and M.C. McCloud, sales manager for aquatics.

David King is assigned technical support manager.

Scotts’ Golden Eagle ready to ship

MARYSVILLE, Ohio—Golden Eagle fungicide, Scotts Fertilizer plus Golden Eagle by The Scotts Company are now available for shipment. Golden Eagle is a systemic fungicide containing the active ingredient myclobutanil to prevent and control turfgrass diseases. Scotts Fertilizer plus Golden Eagle uses Scotts Continetl fertilizer technology to feed all types of turfgrass while controlling diseases with one application.

Itronics

Continued from page 47

“tissue to grow rapidly in the third quarter,” said Dr. John Whitney, Itronics president and CEO.

Gold’n Gro fertilizer is now sold through Western Farm Services Inc.’s (WFS) California Turf and Ornamental sales group. WFS is one of the largest fertilizer retailers in the western U.S.

In July WFS began manufacturing Gold’n Gro 8-12-9, a plant starter product, and Gold’n Gro 20-1-7, which has been ranked the #1 fertilizer two years in a row by the University of California Riverside. “The new manufacturing process went smoothly and the bulk manufacturing and distribution agreement between Itronics Metallurgical and WFS, which was signed in March 1998, is operational,” Whitney said.

“Itronics is now focusing on completing the financing for its move into a new manufacturing facility in Reno/Stead, Nevada,” Whitney said. “The present goal is to be operating in the new facility in mid-September.”
