Accessible, sustainable golf gets its due

By M. LEVANS
ST. AUGUSTINE, Fla. — The First Tee, launched in November in a national publicity wave headlined by George Bush and Earl Woods, has managed to pull together the golf industry’s heaviest hitters in what is being called the most significant concerted effort to create accessible golf facilities for minority and junior golfers. According to The World Golf Foundation, The First Tee’s founding organization, the initial focus will be on developing financial support to acquire locations for the facilities. To supplement these acquisitions, The First Tee plans

The newly renovated 6th hole at East Lake Golf Club will play host to one of Atlanta’s most ambitious junior golf initiatives to date.

By PETER BLAIS
ATLANTA — It’s too early to say exactly what the effects will be of the $100 million East Lake Meadows project. But the private/public partnership that resulted in the renovation of the historic East Lake Golf Club, construction of a new executive length course and building of a 500-unit residential community looks like a boon for the Georgia capital’s inner city.

The initial focus was the famous East Lake Golf Club, where golfing legend Bobby Jones learned to play the game. The club deteriorated badly since the late 1960s when

T he Americans with Disabilities Act (ADA) appears to have consequences in the world of golf which go well beyond disabled golfers. Courses may be forced to change facilities as well as policies, such as the “Cart Path Rule.” To get a superintendent’s take on ADA, Golf Course News spoke with Jerry Coldiron, superintendent of Lassing Pointe Golf Club in Boone County, Ky.

COLUMBUS, Ohio — Remarkable advances in genetic engineering of turfgrass will bring new cultivars to the marketplace more quickly. But seed costs could go up markedly, particularly because different companies own patents on the various techniques and genes that drive the discoveries.

Future release of new turfgrass varieties will be punctuated by negotiations “to see who gets what out in the marketplace,” said Dr. Virgil Meier, a plant breeder responsible for turfgrass development at O.M. Scott. Meier explained that to

TALKING STICK SPEAKS VOLUMES
Coore & Crenshaw’s Talking Stick, two 18-hole courses built on Salt River Pima-Maricopa Indian Community land, promises to bring a little Scotland to Scottsdale, Ariz. See story page 54.
The less-famous No. 2 course was sold to members of the Atlanta Athletic Club bought the East Lake No. 1 course with the idea of preserving the historic No. 1 venue. Another group of private developers, a partnership consisting of several members of East Lake operated the club clubhouse. Architect Rees Jones oversaw the renovation and the No. 1 course reopened to rave reviews in August 1995. East Lake will host the PGA Tour Championship in late 1998 and the U.S. Amateur Championship in 2001, according to Greg Muirhead, a designer in Rees Jones' office, Jones rebuilt the greens, tees and bunkers; relocated the 17th hole; changed the 4th and 16th holes to par-4's and the 5th and 10th holes to par-5's.

The private East Lake club has become intertwined with the restoration of the entire neighborhood, which includes the tearing down of the existing East Lake Meadows public housing project across the street from the golf club, and rebuilding it as a mixed-income residential community and recreation center. The new community will include a public, 18-hole, executive-length course named the Charlie Yates Golf Course after the Atlanta-born golfer and one-time British Amateur champion. Jones also designed the Yates course.

How did this get done?

The East Lake Community Foundation, led by Atlanta developer Tom Cousins, formed a partnership with the Atlanta Housing Authority and residents of the existing East Lake Meadows project to rebuild East Lake Meadows. The old 650-unit public housing project consisted of badly deteriorated, barricks-style apartments. Like many inner-city housing projects, the neighborhood was plagued by a high crime rate and tremendous poverty. For example, three years ago, Giornelli said, the average earned income for an East Lake Meadows family was $1,000 per year. Of the 450 families living in East Lake, there were just 16 twoparent families as of two years ago.

"It was 100 percent African-American and totally segregated from the surrounding area," Giornelli said. "There were not literal walls around it. But people who didn't live there didn't go there either."

As of mid-December, 70 percent of the existing community had been torn down. The remaining 30 percent was scheduled to be completely gone by the end of 1998. In its place, the new community will consist of 500 to 600 units—garden apartment, townhouses and duplexes. Half those units will be set aside for families on public assistance and the other 250 will be available to anyone who cares to rent there. There is no visual or quality difference between the public and private units.

"Within the context of a rental community, it's as nice as anything that exists in Atlanta," Giornelli said.

The housing authority paid to build the public housing units and the foundation financed the market-rate units. The old East Lake Meadows community sat on 60 acres. The foundation purchased additional acreage and the community contributed some additional acreage giving the new community 175 acres.

"Interestingly, the footprint of this new community is being built exactly on the old East Lake No. 2 course," Giornelli said. In addition to the 500 housing units, elementary school, YMCA, park, ball fields and tennis facility, there is the new 18-hole Charlie Yates course and practice range.

The community is being built in two phases. Phase I includes 200 housing units, the first nine holes of the Yates layout and practice range. The first nine will be spring in the spring and should be ready by late summer. Phase II, which includes the remaining 300 residences and final nine holes, should start in late 1998 and be completed by mid-2000. The cost of the entire project will be upwards of $100 million.

The private East Lake club, Giornelli said, is an economic engine that helps drive the rest of the project and will help create an environment for the development of yet another private club. The private East Lake club generates revenue in two ways. First, as the golf club makes money, excess profits go to neighborhood projects. Second, memberships are sold only to corpora
tions, which are expected to contribute $200,000 to the East Lake Community Foundation when they pay their $50,000 to join the club.

"We are a year into the effort and we have 35 companies aboard," Giornelli said. "We expect to fill it out within the next two years and at that point we'll close it out. Once we get to 100, the whole thing works. The bottom line is that with 100 companies on board, each one contributing $200,000, we'll have raised $20 million to help fund the charitable side of what's going on."

Programs at East Lake are aimed at long-term benefits for kids, particularly education. A golf academy for neighborhood children runs five days a week for 3 1/2 hours per week for school. Enrollment, reading and computer classes are offered and run by Georgia State University's education department. Golf is also a component of the program. All 100 kids in the program receive golf instruction twice a week and the opportunity to play golf. The program has run out of the private East Lake club the past two years. In the future, the new Yates course will be the site of the junior golf academy, allowing the program to be expanded to include many more children.

"Every child from that neighborhood who is a part of the junior golf academy will be able to play that [Yates] course any time they want," Giornelli explained.

"We want it to serve as an incentive. They'll have to know the rules of the game, pass an etiquette test, know how to repair ball marks and things like that. Hopefully it will act as an academic incentive so that you'll have to have certain grades in order to play.

A handful of neighborhood residents work at the golf courses, although job creation wasn't a major reason for renovating East Lake or building the Yates courses.

"East Lake is a caddies-only club, we don't allow golf carts," Giornelli pointed out. "From a jobs standpoint, that's the most significant we have. More than 300 kids have worked as caddies the past two years. As an after-school or summer job for a high school or college standpoint, you can't beat it. It's wonderful to have a successful business in a neighborhood that has fallen on tough times," Muirhead said.
