**Toro to help supers hunt the ideal “green”**

By MICHAELE LEVANS

BLOOMINGTON, Minn. — In an effort to supplement its existing Near Infrared Reflectance Spectroscopy (NIRS) service, Toro has added its Universal Green Turf Scale that incorporates proprietary turf analysis equations designed to monitor the “greenness” of grass.

Toro said the new service, which is available to Toro’s major accounts and key partners using its NIRS, offers superintendents a more accurate way to predict and maintain nutritional levels that result in “green” grass.

The ultimate goal, said Toro, is to arrive at a “universal green.”

Since Toro launched its NIRS service three years ago, Dr. Syed Dara, Toro’s leading researcher on turf tissue, has accumulated thousands of turf samples that he said enabled him to formulate these color comparison equations.

"Those samples allowed us to characterize a lot of color changes and the color variability in the turf compositions," said Dara. "That allowed me to write equations which relate growing turf color to dry and brown turf color, which NIRS sees." The more samples that Dara can collect, the more accurate the reading will be.

In turn, superintendents are given an additional color number on their NIRS tissue analysis report that is based on the current composition detailed in the NIRS.

**TEXTRON/RANSONES: The pending deal is buzz of the golf industry**

By MICHAELE LEVANS

[Dec. 22]—The industry has been buzzing since the word of Providence, R.I.-based Textron Inc.’s probable purchase of Ransomes PLC hit the streets (see GCN December, pg. 3). Now the golf industry is waiting to see just how the $144 million deal could affect the dynamics of the “iron” marketplace if the deal is currently out of his hands.

"The first possible closing date, the first date when our shareholders could respond, could be Dec. 23," said Wilson. "But there are certain conditions to the bid...and everything may not be in place by that time for everybody to make a decision."

There are a number of factors, said Wilson, including British regulatory issues, that could postpone the timing of the deal.

Meanwhile, Ransomes and Jacobsen distributors are among those most anxious to receive word. Although no formal structure or alignment of Ransomes and Jacobsen equipment has been announced, U.S. distributors are busy crunching the myriad factors and possibilities.

"We’re pretty excited about it," said Don DeLaney, vice president of Lake-Biltz Inc., a Milorganite distributor. "Textron will give them [Ransomes] some avenues that they haven’t had available to them before."

**MMSD to privatize**

MILWAUKEE — The Milwaukee Metropolitan Sewerage District (MMSD), the governmental agency that oversees the production of Milorganite fertilizer, is on the verge of privatizing two wastewater treatment plants, a Milorganite bio-solids fertilizer plant, the sewer interceptor system and deep-tunnel storage networks in addition to its 30-megawatt power plant.

"As far as Milorganite, this won’t have any impact at all," said Larry Wilson, president, including British regulatory issues, that could postpone the timing of the deal.

**NEW PRODUCT OF THE MONTH**

Terrapin Ltd. has introduced the Aereagreen, an aerator that aerates upward from below the root zone. It can cover areas up to the root zone from depths as much as 12 inches. Air and polystyrene beads are inserted under pressure to keep the voids open, allowing long-term aeration and percolation of water, oxygen and fertilizer. The Aereagreen is equipped with three or four probes that can be adjusted to two- or three-foot centers. The walk behind unit may be towed up to seven miles per hour using the optional tow bar. For more information, contact Terrapin at 888-298-4272.

Golf Ventures, RapidTurf partner

JUPITER, Fla. — Golf Ventures Inc., a distributor to the golf course maintenance market, has formed an exclusive sales and distribution partnership with RapidTurf Inc., a supplier of natural grass grown on plastic, in Florida.

According to Jim Sartain, Golf Ventures' chief executive officer, the alliance is a natural extension of the company's tradition of offering its golf course clients innovative products.

RapidTurf and RapidSprigs products and services include certified turf grasses (Tifdwarf), custom-grown new releases (Floradwarf and Tifeagle) as well as installation services. The company said that installing rolls of RapidTurf considerably reduces the time between planting and playing.

British Landscaping plans move across the River Welland

LINCOLNSHIRE, England — British Landscaping Equipment Co. (BLEC), having outgrown its original premises located next to the family home, have settled into a new, purpose-built factory and office/showroom facility.

The move, from the Deeping Gate, near Peterborough, to the next-door village of Deeping St. James, actually crosses the River Welland and therefore the county boundary from Cambridgeshire to Lincolnshire, where BLEC has acquired a half-hectare site, with excellent road access.

The company said the new facilities should ensure that BLEC is equipped for expansion into the next century, while maintaining its policy of continuous development of products particularly suited to landscapers, golf and sportsfield developers and turfgrowers.

ITODA commits to Platinum Tee

NAPLES, Fla. — The Independent Turf & Ornamental Distributors Association (ITODA) unanimously passed a resolution to commit to membership in the Golf Course Superintendents Association of America's (GC-SAA) Platinum Tee Club, the GC-SAA's funding effort to advance environmental and scientific research developments in golf course management. The ITODA agreed to make this commitment at its annual fall meeting in Naples.

Pursell names new formulator

SYLACAUGA, Ala. — The Lange-Stegmann Co., a St. Louis-based fertilizer formulator, will now offer Polyon-coated controlled-release fertilizers throughout the central US.

According to Michael Stegmann, vice president of Lange-Stegmann, Polyon-coated nutrients will soon be available in many of the company's fertilizer blends, including various specialty formulations. Stegmann also announced that additional sales staff has been added to support the move.

David Pursell, president and chief executive officer of Pursell Technologies, said: "Lange-Stegmann is an outstanding company with an unparalleled reputation. Their expertise and experience will prove beneficial as we expand the availability of Polyon-coated products."

MMSD

Lennert, Milorganite's sales and advertising manager. "The plant will operate in the same manner and Milorganite will be the same product it has always been."

According to United Water Resources, Milwaukee-area customers are guaranteed to save in excess of $130 million as a result of the new contract. United Water already has agreed to hire all MMSD employees at current wages and benefits packages.

Made For The Shade

Forget everything you know about bluegrass and shade tolerance. The second generation of Glade is here—the latest introduction from Jacklin's Five Steps Above Program. NuGlade grows well in moderate shade, making it the perfect bluegrass for tree-lined fairways and other low-light areas. NuGlade maintains its rich, deep color, even in shadows and at low cutting heights.

This breakthrough variety better resists disease and stress even when cut at 1/2 inch. Plant NuGlade, and you'll never be afraid of the dark again.
