MAINE SUPERS HONOR HODGE

CUMBERLAND, Maine — Jim Hodge, superintendent at Val Halla Golf Course here, recently received the Maine Golf Course Superintendents Association Distinguished Service Award. Hodge is a 10-year member of the Maine GCSA and has served as the chapter’s president and vice president, chairman of the scholarship and research, bylaws and turf conference committees; and Main liaison to the GCSAA Chapter Relations Committee. Hodge received the award during the Maine Turf Conference in Rockland.

SUPERS FUND HOSPITAL GREEN

DALLAS — The North Texas Golf Course Superintendents Association (NTGCSA) will fund and maintain a new putting green at the Dallas Scottish Rite Hospital for Children. The green will serve as an outdoor area for both therapy and recreation for hospital patients. NTGCSA President Keith Ihms announced that the group’s support will be in honor of Quinton Johnson, a long-time member who recently retired.

MIDWEST SUPERS SUPPORT RESEARCH

INDIANAPOLIS — Five golf course superintendents’ associations gave the Midwest Regional Turf Foundation more than $35,000 during the 1998 Midwest Turf Expo here for research and education. In turn, the foundation gave $96,000 to the Purdue University Department of Agronomy for its turf program and another $10,000 to the School of Agriculture for development of the Purdue Turfgrass Research and Diagnostic Center. Meanwhile, the foundation honored Jim Kenney with its Distinguished Service Award.

AFTER THE ‘NEW’ WEARS OFF

BY BOB SPIWAK

COEUR d’ALENE, Idaho — While routine golf course maintenance like mowing and turf protection provide the steak for the golfer, on-and-off course beautification adds the sizzle. And more and more courses, old and new, are adding colorful flowers and plants with pizzazz to set themselves apart, or gain a reputation.

“Augusta National is known for its azaleas,” said Coeur d’Alene Golf Course superintendent John Anderson, “and we want the thousands of junipers and geraniums we plant every year to be identified with Coeur d’Alene in the same way.”

“We use a lot of color, both annuals and perennials, and this is one of the things people enjoy most about Pebble Beach,” said Ted Horton, vice president of resource management for the Pebble Beach Co.

“We want this place to catch people’s eyes,” said Gerry White, the superintendent at Point Sebago Resort in Maine, “and the way we do it is by being creative” — which means the use of native rocks and plantings to accent the course.

Beauty isn’t always the single, overriding reason for renovations at a golf course.

Over the years, a property can begin to show its age. Plants die. High-traffic areas turn from turf to mud. Original ideas of course design may, in use, turn out to be liabilities. In these and many more instances, renovation is necessary.

“Many golf courses need help in renovating key landscape areas.”

SOLVING POA ANNUA PROBLEMS FROM EL NIÑO

BY PATRICK O’BRIEN

The abundant rains and warmer temperatures this winter from El Niño have caused a prolific growth of poa annua at many golf courses in the Southeast. Superintendents fear this weed grass the most, especially if it appears in putting greens. In most instances, cultural and chemical control is reliable and cost-effective on tees, fairways and roughs.

Unfortunately, battling poa annua on bentgrass putting greens is a complex topic.

Weed Southeastern scientists, Drs. Fred Yelverton at North Carolina State University and B.J. Johnson at the University of Georgia-Griffin Station, are trying to help superintendents control poa annua on putting greens with a cost-effective and reliable program. Both agree that using growth regulators is the preferred strategy on bentgrass greens.

“The Turf Enhancer (paclobutrazol) product has provided the best control and suppression of poa annua from our work at NCSU the past five years,” said Yelverton.

Both researchers agree on the application rates and timing for the Turf Enhancer program on bentgrass greens. They suggest fall and spring treatments at the rates of 1/4 pound

USGA’S GREEN SECTION SPLITS WEST REGION

SANTA ANA, Calif. — The U.S. Golf Association Green Section’s West Region has been split. The new Northwest Region encompasses Alaska, Washington, Oregon, Idaho, Wyoming and Hawaii. The Southwest Region consists of California, Arizona, Nevada, Utah and Colorado, and is headquartered at 505 North Tustin Ave., Suite 121, Santa Ana, Calif. 714-342-5766. Pat Gross, an agronomist for the Western Region since 1992, has been promoted to director of the Southwest Region, working with agronomist Mike Huk. Larry Gilhuly, previously director of the Western Region, in director of the Northwest Region at 8610 Old Stump Dr. N.W., Gig Harbor, Wash. 98332, tel. 253-856-2266.

Hoffman turns a passion into reality

BY MARK LESLIE

BRAINERD, Minn. — Scott Hoffmann was able to turn a hobby, passion and dream into not just a reality, but a national award-winning golf course.

When Golf Digest picked The Classic at Madden’s Resort as the third-best New Upscale Public Golf Course in North America last December, it was a feather of huge proportion in Hoffmann’s cap. Not because he is the superintendent of Madden’s four golf courses — which he is — but because he designed The Classic.

There was his name, beside such golf course architects as Tom Fazio, Pete Dye and Robert Trent Jones Jr. Yet, Hoffman shares the acclaim with others. Though he routed the 18-hole layout and designed the elements of every hole, he credits advisers including architect Geoffrey Cornish; Minnesotan and former U.S. Amateur champion John Harris; Warren Rebolho, who had just retired as executive director of the Minnesota Golf Association; and his assistant, Pat Marstad, who is now the head superintendent at The Classic.

“We had done the initial clearing through the woods.
