Bowden has more than 20 years experience in personnel management, employee relations, training, and safety with GW Composites, Emerson Electric-Motor Division, General Tire and Rubber Co. and Hall Printing Co. of the Mobil Corp.

GROWTH PRODUCTS HIRES WALKER

WHITE PLAINS, N.Y. — Growth Products Ltd., manufacturer of liquid fertilizers and natural organics, has announced the addition of Rick Walker, as its new technical sales representative for the southeastern region of the United States. Walker has been associated with the golf industry in the southeast for the past 17 years as a golf and landscape superintendent.

Toro adds St. Andrews to irrigation list

BY TREVOR LEDGER

BLOOMINGTON, Minn. — Toro Co. has landed the contract to be the exclusive irrigation provider for all five championship courses and the nine hole course at St. Andrews Links, Scotland.

The £2.3M contract will see Toro providing the control system and sprinklers with the piping and installation due to go out to tender during May 1998.

St. Andrews Links Manager, Ian Forbes, is excited at the prospect. "I'm looking forward to getting our hands dirty installing these systems. Up to now the irrigation at St. Andrews has been the most difficult piece of all.

According to Forbes, St. Andrews present system evolved over 30 years and is reaching the end of its useful life. "It's a hybrid system," he said. "St. Andrews realized that its irrigation needed updating in order to maintain its position as one of, if not the, most famous golf courses in the world."

With the Millennium Open scheduled for St. Andrews in the year 2000, the stakes could not be higher.

A committee was formed to investigate the available options and, after extensive research and presentations, the Toro Company was chosen.

Toro's International Director of Marketing, Phil Burkart, identified a primary reason for the prestigious deal. "A key closer was the central control system, SitePro."

Ian Forbes was happy to confirm this. "Like the extra capacity SitePro gives us to store and manage our irrigation system and other types of information. Keeping track of fertilization rates is a good example. In the past this has typically been kept by individuals in their heads."

Smithco seals 'speed boss' patent

BY MICHAELE LEVANS

WAYNE, Pa. — Smithco Inc. has recently secured full patent protection for its "speed boss" operational speed governor system for its bunker rakes. The company introduced last year.

Installed as a standard feature on all the company's gasoline, diesel and electric bunker rakes, the "speed boss" control system for bunker rakes governs the speed of the unit during raking.

When the raking implement is lowered into the sand, the system takes over and automatically limits the operational speed, which is adjustable and pre-set by the superintendent.

"As soon as the rake as...

GIVING A LITTLE BACK TO THE KIDS

Four students from the Sycamore High School golf team receiving a check for $10,000 from David J. Elrod, president of the golf industry's largest golf course management company, GCBA. The Sycamore High School golf team is one of four teams that will receive a portion of the $10,000 check from the GCBA's "Sticks for Kids" program.

NEW PRODUCT OF THE MONTH: CUSHMAN HAWK

The Cushman Hawk utility vehicle is engineered with several features to enhance its versatility around the golf course. Available with a choice of either gas or electric power, the offroad Hawk's heavy-duty steel frame, reinforced front suspension and rack and pinion steering help make it highly stable and maneuverable. Especially when operated on slippery or undulating terrain. Other features include: a durable V-twin, two-cylinder, 14-HP air cooled engine; rugged transmission; power train helps provide pulling power; drum type parking brake; heavy-duty 20x10.50-12 tires with knob tread pattern. For more information on the Cushman Hawk utility vehicle, contact Banome America at 800-228-4444.

SR teams with UHS

CORVALLIS, Ore. — Seed Research of Oregon (SR) recently announced that its has formed an alliance with United Horticultural Supply's Atlantic Division for the distribution of the complete SR product line.

UHS will be covering the western two-thirds of Virginia, Maryland, Delaware, Pennsylvania, New Jersey, New York, and all of the New England states. Also included in this alliance are Sweeney Seed Company, King of Prussia, Pa., and Pro-Seed Turf Supply of Chantilly, Va.

This alliance now offers complete sales, service and distribution of the Seed Research grass seed products throughout the entire region. The SR turfgrasses are being used extensively by a wide range of customers, including landscapers, sports turf managers and lawn care companies.
Lesco incorporates major boost to IT systems

ATLANTA — Atlanta-based CST Inc. today announced that Lesco, a manufacturer and distributor of commercial turf care and golf course products, has licensed CST Jacada to provide Java-based graphical client access for its information systems that link six production locations, 16 distribution centers, in excess of 320 store locations, and a direct sales force.

The addition of Jacada to Lesco’s information system will provide easy-to-use graphical access to a variety of information and business transactions located on its AS/400 system for its distributed sales locations that include 235 drive-through convenience stores as well as its direct sales force and Lesco Stores-on-Wheels, a fleet of trucks serving the golf course market.

“The adoption of CST Jacada fits our development strategy to deploy ‘Best-in-Class’ hardware and software to create an information infrastructure that will help us archive superior customer service,” said Wayne Murawski, vice president and chief information officer, Lesco.

“Jacada permits LESCO to gain greater enterprise access to information residing on our existing AS/400 without major disruptions to our business. We can then more easily reengineer our processes, organization assignments and computer systems,” Murawski said.

CENTURY RAIN EXPANDS IN FLA.

MADISON HEIGHTS, Mich. — Century Rain Aid, a wholesaler of irrigation supplies, announced an expansion in Florida with the acquisition of two local distributors, Atlantic Irrigation and AWF.

The four-store acquisition gives Century a total of 17 branches throughout the state, announced Mike Stein, Century regional vice president. Stein said the company has plans to open additional Florida branches in 1998.

Smithco

semiby is dropped into the trap and the speed is controlled by the speed boss,” said Ted Smith, founder of Smithco. “The superintendent can set it at any speed he wants. But when he goes slowly it doesn’t stir the sand...it causes much less commotion. The surface then becomes a lot more firm. The speed boss allows him steady control of the important finishing process.”

When the raking implement is returned to the raised position, the “speed boss” disengages and full transport ground speed can be maintained.

Toro/St. Andrews

 Continued from page 59

That works fine until the individual leaves. With SitePro we can build all of that into our system so well always know.”

Forbes said he’d first witnessed the possibilities of SitePro while on a trip to Pinehurst, N.C. The system to be installed at St. Andrews will not have the Satellite Positioning option apparent at Pinehurst due, largely, to the differing habitats.

“The decoder boxes needed for Satellite Positioning could be hidden in the trees at Pinehurst,” said Forbes. “We couldn’t hide them at St. Andrews so we have gone for the radio option.”

The system enables the head greenkeepers to travel the course with a handheld radio control and turn on individual sprinklers wherever they are needed. Thus, the greenkeeper controls and creates optimum water supply and a permanent record of irrigation activity that allows for precise water management.

With such a high-tech, expensive irrigation system will St. Andrews have its character altered with an increased application of water?

Not according to Forbes. “Our aim is to have hard, running surfaces. A good irrigation system is an insurance policy and should be used sensibly on a links course.”

GOLF COURSE NEWS

the next time you need a bunker rake and you’ll see what makes us different. We look at rakes, and all our products, from every possible angle. We examine the smallest details. We think and re-think every item we create in order to give you the outstanding accessories you deserve. And for more than 70 years, we’ve succeeded.
