Hurdzan/flat pipe

pretty harsh thought I would admit, but not without a fair amount of truth. We are living in a period of rapid technological innovation and application that is trending toward a pattern of life that is more naturally sustainable. This period has no foreseeable end and the pace will only quicken.

One way to speed up play. The program will, even more importantly, teach marshals how to manage and maintain play in the first place!

Many times marshals are the ambassador of a golf course. Other than the guy that took your money and the kid at the concession stand, you might not meet any other staff at the course. Therefore, it's in the interest of the golf course that marshals are well trained, personable and good shepherds.

This is actually where the opportunity comes in for Golf Course News and ourselves to work in some way with Redgate and the City of Rockville. How could we partner to distribute theseMarshal training programs to publicize this program?

Our issue is not the production but building a solid distribution network and the National Golf Foundation.

Furthermore, we are going to be conducting a lot of research in partnership with golf courses and the National Golf Foundation.

Redgate, for instance, is very interested in working with us on some of the problems they face.

Bottom line, our goal is not to be adversarial. Your article, I'm afraid appeared to portray us that way. We will not be able to work with and attract golf courses if they perceive we plan to order them to simply allow walking. It's unrealistic.

We believe this can definitely be a win-win situation for everyone.

Furthermore, I hope there is a way we can work together in the best interests of the sport of the golf. Thank you.

Graham Whatley

Jake’s SandScorpion ready to strike

Jacobsen has introduced its new SandScorpion bunker and infielde enjoy to provide a convenient walk-through deck with generous leg room. Jacobsen also designed the operator position for 360 degree visibility while keeping the operator away from sand and debris. A tilt steering wheel allows customizing the wheel position for individual comfort and pad productivity.

Steering requires minimal effort. Customers can purchase an additional battery tray, which holds six 8-volt batteries, to extend operating time. The SandScorpion Electric operates an average of up to six hours per charge in most conditions.
