Oh, Canada!

Super of the Year: Stay enthusiastic

By Mark Leslie

RAMPON, Ontario, Canada — Ask Bob Heron about his accomplishments and he first points away from himself, to his many assistants who have gone on to take head superintendent jobs from North America to Loch Lomond, Scotland.

Ask about his family and he embellishes about 29-year-old son Scott "whose resume is better than mine." But ask colleagues of Canada's 1998 Superintendent of the Year and they remark about a man who has greatly impacted this career field.

"Bob Heron has a good relationship with his members and he produces a pretty fine golf club," Gordon Witteveen of The Board of Trade with his members and he produces a pretty fine golf club," Gordon Witteveen of The Board of Trade Country Club in Woodbridge said about the man who is now head superintendent at Beacon Hall Golf Club here.

"He's an upbeat guy and always has a positive personality, which makes him fun to be around," said golfing pal Paul Dermott of Oakdale Golf & Country Club in Downsview, who nominated Heron on behalf of the Ontario Golf Golf Course Superintendents Association. "He's a good player and always turns out a playable and well-maintained course for his membership. He's always been a real proponent of bentgrass, and he was one of the first ones up here to experiment with some chemicals to eradicate poa annua."

Indeed, several innovations in golf course maintenance have been pioneered by Heron at Beacon Hall. He was one of the first ones up here to experiment with some chemicals to eradicate poa annua.

PTC AWARDS $175,000 FOR RESEARCH

The Pennsylvania Turfgrass Council has announced allocation of funds to Penn State for the 1998-99 fiscal year. The $175,000 research grant brings to almost $2.5 million what the council has donated to Penn State over the years. The funds will support research projects in the departments of agronomy, entomology, and plant pathology. The council has purchased some of the greatest advances in the world of golf have been borrowed from turfgrass conference here, the superintendent at Islesmere Golf and Country Club in Laval, Quebec, said his experience with Bubble Covers to protect their greens from winter injury, and, according to Serge Gauthier, they have found success while saving money.

Speaking at the Canadian International Turfgrass Conference here, the superintendent at Islesmere Golf and Country Club in Laval, Quebec, said his experience with Bubble Covers to protect their greens from winter injury, and, according to Serge Gauthier, they have found success while saving money.

"We are sensing there is a growing need for using search firms to protect their greens from winter injury, and, according to Serge Gauthier, they have found success while saving money."

Kopplin feels there are three critical factors for finding the right superintendent: competence, integrity and compatibility.

"We advertise the position whereas the best candidates usually have a position with a similar type environment at an existing club," he said. "I talk with and recruit all of the candidates, perform reference and due-diligence checks, clarify everything and bring in three good, quality candidates. I telephone interview each candidate and meet with them in person, at their respective clubs, before they become eligible as one of the three final candidates."

"One of the key qualities," said Farrell, "is someone who is hands-on already; who has a very good, detailed knowledge of the industry; and who, from the technical aspect, is computer literate. Our clients are looking for people with successful business backgrounds.

The headhunter's job, Farrel said, "is to identify for our clients the most qualified candidates we feel are out there for the particular job. In that process we are interviewing, on a preliminary basis, all candidates. Before our client sees them, we will have interviewed them, toured their golf facilities and thoroughly checked their references."

Jerry Faubel, a partner with Bruce Williams in the firm Executive Golf Search, Inc., said: "We go to each club and interview them to find their needs for a superintendent, make suggestions as to the type of superintendent they want and need, look at the golf course and then begin a search in our large database with the club's job specifications in mind."

Faubel and Williams, both former presidents of the Golf Course Superintendents Association of America, then perform in-depth interviews and personality tests for each club's specific needs, narrow down the candidates to between three and five, perform a background check with the superintendents' permission and then send the club the resumes and Faubel's and Williams' assessments.

Once candidates are presented to the search committee, according to Kopplin the panel usually interviews them, allowing them to showcase their talents in a relaxed atmosphere.

"We ask each candidate to go step by step through each job they have had," Kopplin said, "to discuss their management abilities. Then the candidate asks questions, all in a one-hour time limit and then the candidate receives a complete tour of the facility," Kopplin said. "We do not do any personality or psychological testing unless a club specifically asks for it, then we use professional companies that specialize in it."

"The quality of the superintendent candidates that I deal with is so good, and their work ethic is very strong," Kopplin said.

Executive Golf Search, Faubel said, recommends candidates who can grow grass, have communication skills and a personality that best fits a particular club.

Faubel and Williams do not get involved in the salary, fringe benefits (unless asked) and negotiations, but will offer sample contracts if desirable, he added.

All these search firms have golf backgrounds—from Faubel and Williams' years as certified golf course superintendents who are close to a variety of industry leaders, to Golf Search Personnel, whose three partners have many years background in finance and recruiting (Steven Lieberman), agronomy (Mark Miller, who worked with IMG and Arnold Palmer Golf Management), and course management (Farrell).

Their payments vary. Kopplin Search clients—about 80 percent of whom are equity
Sod producers donate $62,000 for research projects

ROLLING MEADOWS, Ill. — Eight turfgrass sod research projects will receive a record-setting $62,436 in grant money for 1998-99 from the 5-year-old International Turf Producers Foundation (ITPF). The not-for-profit foundation’s previous one-year grant award record was $20,500, set in 1995-96.

Specific grant recipients cannot be announced, pending formalization of each project’s goals and objectives. However, general areas of study to be undertaken include extension of sod’s post-harvest “shelf-life,” shaded turf management and various projects related to water and nutrient management. ITPF is now in the process of notifying the recipients.

This year’s eight recipients were selected by ITPF’s Research Committee from among 20 projects, seeking a total of over $220,000. ITPF, created as a stand-alone foundation in 1994 by Turfgrass Producers International, has established a long-range endowment goal of $2 million which it is beginning to accumulate through contributions from annual campaigns and a silent auction conducted in conjunction with TPI’s summer convention. Each year, a portion of the newly raised funds and direct support from TPI is used to support research projects directed at questions of specific interest to turfgrass sod producers.

Now you can control grubs preventatively or curatively. With a single application. Only with new MACH 2™ Turf Insecticide.

MACH 2 is a powerful killer with a new chemistry that accelerates the molting process of target insects.

Just hours after ingesting MACH 2, the insect stops feeding. Then it dies beneath the surface in 2 to 3 weeks. It’s that simple.

With MACH 2™ Turf Insecticide, you’ll kill target enemy insects all season long. Grubs. Cutworms. Armyworms. Sod webworms. Plus, odorless MACH 2™ is easy to apply.

You don’t even have to water it in immediately.

So don’t let grubs control your grounds, or your schedule. Depend on MACH 2™ Turf Insecticide.

It’s all you need to prevent or cure.

For more information or for the distributor nearest you, call 1-888-764-6432 and visit our website at www.mach-2.com.

private clubs and 20 percent are management companies, resorts and other public-access venues — pay a fee, usually 15 to 25 percent of the superintendent’s first-year base salary.

“We have contact for one year after the successful candidate is hired, to offer complete and total service,” Faubel said. “Our fees are on a percentage sliding scale of between $5,000 and $12,000, based on the superintendent’s first-year salary.

“We are in business to help superintendents, to strengthen their professional careers,” Faubel said, “and we do headhunting only for superintendents. Seventy-five percent of our business is with private clubs and 25 percent with public-access courses, and we place from six to 12 superintendents each year.”
