**Of ants, flies and other friendly pests**

**By Mark Leslie**

FAR HILLS, N.J. — Ants that devour the eggs and larvae of cutworms, grubs and other pest insects. Parasitic flies that kill mole crickets. The risks, or lack thereof, associated with golfer exposure to pesticides.

The U.S. Golf Association (USGA) Green Section will reveal the results of investigations into these and many other matters in a soon-to-be-released report on the latest USGA-funded research projects. The research covers a gamut of topics from course construction practices and integrated turfgrass management to biological controls, which are becoming more important and widespread in their use on public courses. The research also revealed the impacts of golf and the Wildlife Links Program.

But key to the entire program are naturally occurring biological controls, which are becoming more important and widespread in their use on public courses. The research also revealed the impacts of golf and the Wildlife Links Program.

**Sports & Fitness expanding its portfolio**

**By Peter Blais**

MANCHESTER, Mo. — It’s going to be a busy summer for Sports & Fitness Management, the Missouri-based golf and health club management firm.

Sports & Fitness will open Fred Couples/Gene Bates-designed Stonebridge Golf Club in Bossier City, La., later this summer and recently agreed to purchase Garden Valley Golf Resort in Tyler, Texas. The firm is also about to break ground on a Gary Kern-designed course near St. Louis called Aberdeen and is negotiating a three-course purchase agreement with a management firm operating facilities in Louisiana and Texas, according to Vice President

**Tests reveal good & bad of ultradwarfs**

**By A. Overbeck**

BELTSVILLE, Md. — As ultradwarf Bermudagrass continues to find its way onto golf course greens across the United States, independent research and on-site testing suggest that best management practices for these "super dwarfs" are radically different than for standard Bermudas.

In cooperation with the United States Golf Association and the Golf Course Superintendents’ Association of America, the National Turfgrass Evaluation Program (NTEP) is currently in the second year of a five-year ultradwarf test at eight courses across the United States, to stay out of the water

Sports & Fitness
Continued from page 1

Located within a residential development in the north-east portion of Bossier City/Shreveport, the course will help fill a shortage of private courses in an underserved market that has economically benefited from the infusion of casino money in recent years, Kerckhoff said. Shreveport Country Club and Southern Trace are the two main existing private clubs serving that market, Kerckhoff said.

Garden Valley is a 36-hole, 680-acre complex. The John Sanford-designed Dogwood Course that opened in 1992 is rated among the top courses in East Texas. The acquisition was expected to close in mid-to-late June.

In addition to StoneBridge, Garden Valley and Aberdeen, the firm operates Briarwood Golf Club in Tyler; Crystal Highlands Golf Club in Festus/Crystal City, Mo.; Golf Club of Incline Village in Foristell, Mo.; Innsbruck Resort & Golf Club in Helen, Ga.; Golf Club of Macon (Ga.); and The Country Club at the Legends in Eureka, Mo.

The five courses Sports & Fitness expects to add this year put it ahead of its acquisition goal of two properties per year. The firm plans to grow through new developments and acquisitions in both current and new markets. New construction projects would preferably include contributions of permitted land, utili-

ies and a portion of the course construction costs from the developer. Acquisitions would be existing facilities where improved marketing and management could lead to larger revenues.

“It’s a little easier to acquire courses as opposed to the big boys have gotten their toes stubbed,” Kerckhoff said. “The Wall Street money firms and Meditrusts overpaid for properties a year and a half ago. Now golf properties are a little more reasonable again.”

As for the availability of existing courses, even with the growing number of management firms looking to snap them up, Kerckhoff said: “There are courses available now and there will be more in the future. A lot of courses have gone under construction in the past few years that aren’t being built by golf experts, but by golf devotees. We have several groups here in St. Louis who built courses because they thought it would be a good business venture, a fun thing to do, and not that difficult. In most cases, they found at least two of those three things weren’t true... Those types of courses tend to turn over in two to four years.”

Mark Beckham, J.L. Stevens and William Bates formed Sports Fitness & Management in 1984 to operate recreation properties, specializing in racquet sports, fitness and golf. The company purchased its first fitness club in 1987 and owns nine such facilities today. It acquired its first golf facility, The Golf Club of Incline Village, in 1992. Its assets are valued at roughly $30 million, more than half of which is golf, Kerckhoff said.

“We do have a number of investors and are interested in establishing a pathway to liquidity for them over the next five years,” Kerckhoff said. “Two years ago we said if we were at $50 million to $60 million in assets, we’d be an attractive acquisi-

tion for a much larger group or a potential public offering. Now the number is moving closer to $75 million to $100 million. We’ll just keep going, build a good golf company and see what happens.”

In addition to Beckham (president), Bates (secretary/director) and Kerckhoff (vice president), the staff includes a number of financial, management and legal experts.

“Our origins are in turn-around projects, in the recreation industry and now in the golf business,” Kerckhoff said. “We’ve been very creative in putting deals together, whether it’s the acquisition of an existing property or developing a new course. We have a number of certified public accountants on staff, so we’re good at putting creative financial deals together that come out as a win-win for everybody.”

Consyst \* WDG

The Most Effective, Economical, Broad Spectrum Fungicide Ever!

Consyst \* WDG, the all-purpose fungicide, has been providing professional turfgrass managers excellent disease control for over 8 years with no complaints. Other higher priced fungicides can’t compare.

Consyst \* WDG gives excellent disease control from Dollar Spot and Brown Patch to Snow Molds consistently. It is the ideal fungicide for all Patch Diseases. The Water Dispersible Granule formulation makes it easy to use and store and the unique measuring device makes it easy to mix the exact amount needed for each application, every time.

No Guessing.
No Waste.
No Hassle.
