Developers of Ocean Trails Golf Course in Rancho Palos Verdes, Calif., are still seeking a solution to repair the landslide that pushed part of the 18th hole toward the ocean in early June.

Ocean Trails
Continued from page 1

Developers are wondering how much credence can be given to geological reports and surveys. The potential for a landslide at Ocean Trails was identified before construction began, said Greg Post, senior planner for the city of Rancho Palos Verdes. "Mitigation measures were taken to ensure that no problems took place," he said.

However, since preventive measures failed, it is now up to the developers and Post to find out what caused the slide.

More than 25 geologists are on site and have dug 26 monitoring wells to take borings and samples of earth.

"Of course we want to rebuild the 18th hole," said Ocean Trails Director of Golf Bobby Heath. "But the important thing right now is stabilizing the land mass and making sure that the fix that is put in will accomplish what the golf course, access trails and habitat require."

The Ocean Trails slide has also raised the concerns of environmental activists.

"You have a lot of people in the city who want the golf course project to go forward," said Post. "But then there are people who have been against the project from the get-go and who are opposed to building anything along the coast."

The city is behind Ocean Trails, but remains cautious, according to Post. "The golf course is a financial boost to the city and we want it to go forward, but we are going to make sure that everything is looked at before we proceed," he said.

Ocean Trails is not the only ongoing golf course development project in Rancho Palos Verdes. The city is also working to increase golf-related revenue two miles up the coast at Longpoint, a proposed project that includes an 18-hole golf course, hotel and convention center close to the development moratorium zone at Portuguese Bend. While the city and the developer are still working to come to terms on the use of a sizable amount of public land, they are preparing an Environmental Impact Report (EIR), a zoning plan and coastal development permits.

Michael Moler, vice president of Destination Development Corp. and Longpoint's project manager, insists that the geology underlying the property is different than that of Ocean Trails. However, he acknowledges that the landslide incident has made his job much more difficult.

NGF report focuses on state of junior golf

JUPITER, Fla.—The National Golf Foundation (NGF) has just released a new research report which provides golf courses and golf businesses with new information to help them develop their junior golfer customer base.

The NGF report came from the NGF's recently released future state-of-the-game study, "A Strategic Perspective on the Future of Golf." Among other things, it suggests there are 8 million juniors (ages 5-17) in the United States who would like to play more golf, or take up the game for the first time.

Called "The Power of the Junior Golf Market," the study provides the reader with current quantitative and qualitative information on the junior market. In addition to statistics on participation rates, frequency and demographics, the report reveals why junior golfers play, the barriers juniors face when attempting to play golf, the actions necessary to encourage more play among current participants, and suggestions for attracting non-golfing juniors to the game.

For example, the report shows that high commitment to golf as a junior translates into high commitment to golf later in life. Specifically, nine out of 10 avid senior golfers today were avid golfers when they were juniors. And this adds up when considering that the economic impact of a committed or avid golfer is two-to-three times greater than the average golfer in any one year.

The report also shows that "Dad is the most influential motivator during the trial and commitment phase for juniors. And now may be the most appropriate time to take advantage of this." Also, the report reveals that "the Echo Boomers" (the children of the "Baby Boomers") are now into their teenage years.

NGF poses the question: "Golf is competing for the attention of juniors within a marketplace that is more crowded than ever before. The number of entertainment alternatives available to today's youth has never been greater and it only promises to get more cluttered. Thus, to be successful in the years ahead, golf entrepreneurs must have better information on the junior market and "The Power of the Junior Golf Market" is the most comprehensive report that the NGF has published on this important segment." Copies of "The Power of the Junior Golf Market" can be obtained by calling the membership services department at 888-NGF-2500 or 561-744-6006. The cost is $45 per copy for NGF members and $50 for non-members, plus shipping and handling.

Green Lawnger™ Turf Paint from Becker-Underwood is the fastest way to restore the natural green color to turf which is dormant, discolored or damaged.

Ideal for golf courses and sports turf! Green Lawnger helps keep fairways, tees and greens looking healthy and lush. Revitalizes worn areas of stadium turf and brightens up stressed or overplayed fields. Easily applied with any types of sprayers, Green Lawnger blends in beautifully with most grasses. Won't wash or wear off.

Call or write for more information!
