AHNERT JOINS RAIN BIRD GOLF DIVISION
AZUZA, Calif. — Rain Bird announced that Fred Ahnert, key accounts manager for the golf division, has joined the staff of Mike Donoghue, golf division director. In his new position, Ahnert will continue to manage Rain Bird Golf's relationships with management companies and large account-based firms while contributing his experience in these areas to the strategic planning and direction of the division.

GROWTH PRODUCTS ADDS BLAIR
WHITE PLAINS, N.Y. — Growth Products, Ltd., has added Brian Blair as general manager of GREEN-RELEAF products in the turf, horticultural and agrichemical division of Elf Atochem North America, Inc. has appointed Christie McDowell vice-president, sales and business development, North America, Inc.

SYBRON APPOINTS SEDIVY
SALEM, Va. — Sybron's Biochemical Division has appointed John Sedivy general manager of GREEN-RELEAF products in the turf, horticultural and agricultural markets. Sedivy will manage and direct all business activity for the global development, production, marketing and sales of GREEN-RELEAF products. Before joining Sybron, Sedivy served four years as director of marketing and development for the agrichemical division of Elf Atochem North America, Inc.

Golf Course News recently sat down with Wayne Burk, senior vice president and general manager of fertilizer products for Simplot Turf and Horticulture, to talk about how the rapid changes in the fertilizer industry are affecting Simplot's business plan. Burk, who has been with Simplot for 18 years, lent perspective on how deals with Eco Soil Systems, Inc. and Pursell Technologies, Inc. (PTT) (see GCN March 2000) relate to the company's aggressive growth strategy.

GCN: What is driving Simplot's nationwide expansion?
Burk: The Simplot family and the top corporate management folks made this decision at the time they acquired Jacklin Seed Co. They saw an industry that the size of Simplot could play in. The turf and ornamental industry is attractive to us. We are basic in most of the raw materials, we have a pretty good foothold in the Western United States and the Pacific Rim. We see it as a business where we could leverage our brands and strengths and be a pretty sizable player.

GCN: What does PTT bring to the table?
Burk: They have the best controlled-release fertilizer technology in the world right now. Even though we are a major fertilizer manufacturer, we have never had a position in a controlled-release technology, so we came together to leverage their technological position with our marketing and manufacturing position.

GCN: So this is a way to fill gaps in your product line?
Burk: Absolutely. There are certain fertilizer market segments in which you just simply have to have this type of performance product to play in.

GCN: What do Eco Soil and Turf Partners offer?
Burk: Distribution, particularly in the East and Midwest. We had more or less announced our plans to expand to the east and we talked to the players in those markets. Eco Soil came to us and said they were interested in taking our products into those markets. They have 20 locations with 75 sales people so we started pursuing [an agreement].

GCN: Will you be making any other moves to fill holes in distribution?
Burk: Turf Partners is a core that we will be looking to add onto in those areas where we don't have distributors to date. Recognizing that they don't have branches and distribution in the Southwest and Southeast, we would have to add onto Turf Partners depending upon how the business is structured. Having said that, the Pursell agreement does not include the Southeast.

GCN: Are there plans to ramp up supply capabilities?

Lesco profits surge
CLEVELAND — LESCO, Inc. has reported that its net income for the fiscal year ending Dec. 31, 1999 increased 98 percent to a record $11.6 million compared with $5.9 million in the same period last year.

Sales of fertilizers, turf-protection products and turfgrass seed combined for $385.4 million in sales accounting for 83.7 percent of total sales.

Commercial lawn care equipment and parts sales were $75 million, an increase of 14.6 percent compared with a year ago. For the 12 months, comparable store sales increased about 8 percent over the same period a year ago.

"Throughout the year we focused our energies toward improving our profitability. We are particularly encouraged by the 190-basis-point increase in our operating margin to 4.9 percent in 1999 and believe our unique business model has begun to demonstrate its underlying profitability potential," said William A. Foley, Lesco chairman, president and chief executive officer. "We are encouraged by our progress and remain focused on improving our return on capital. We look for continued improvement in our 2000 results."

Lesco noted that positive factors for year-over-year profitability included improved sales mix, cost controls and improved performance at Commercial Turf Products, Ltd., its commercial equipment joint venture with MTD Products Inc.
ABT sell-off

said Hurley.
The DIP financing will also allow ABT to go forward with its plans to liquidate assets.

"It is going to be happening pretty quickly," said Hurley.

"What is going to be happening is that the 35 companies that made up ABT are going to be sold off in the next 30 to 60 days. Who will be the winning bidders is anyone's guess, but the varieties will still be available.

"It is just like a baseball player that gets traded. Ken Griffey Jr. used to play with the Seattle Mariners and now he plays with the Cincinnati Reds. The outcome of the ownership of the variety won't change the availability of the variety."

Hurley expects ABT's top brands, such as L-93 bentgrass, Palmer ryegrass and rebel tall fescue, to be the most attractive to potential buyers.

"It is most likely that seed companies will buy them up," he said.

"In the next 30 to 45 days we will have a pretty good feeling and by the end of May it will be all done."

However, DSI's William Brandt cautioned: "It remains uncertain at best whether the liquidation proceeds will be sufficient to generate any distribution to the company's shareholders."

The DIP credit facility is set to expire July 31.

Eco Soil reorganizes management

RANCHO BERNARDO, Calif. — Eco Soil Systems, Inc. has announced the resignations of Douglas M. Gloff, president and chief operating officer, and Mark D. Buckner, chief financial officer and corporate secretary.

"The company is reorganizing its corporate functions to position itself for the proposed sale of all or a part of its Turf Partners subsidiary to the J.R. Simplot Co."

Gloff's resignation will be effective March 31. He will continue to direct the transition management team of the Turf Partners subsidiary, while serving on the Turf Partners board of directors.

Max D. Gelwix, vice president of marketing has been promoted to president and chief operating officer. "Max will focus on the reorganization of the parent company and prepare the company's biotech products for distribution into new agricultural channels," said Adams.

Wellenbergs.

Tyler's new Kentucky operations are based in Louisville at a warehouse and distribution center that opened in March. Sam Huff will be leading the company's entry into the state and will be responsible for the sales and marketing efforts in the golf course and landscape markets in northern Kentucky. Kentucky is the third state where Tyler has launched a new marketing effort in the last year. It now has sales and delivery operations in Illinois, Indiana, Michigan, Ohio and Wisconsin. Another facility will open in Cincinnati this month.

"It is Tyler's intent to be the dominant regional player in the specialty turf industry in the Midwest," said Jasurda. "Our goal is to take advantage of the current market changes in the supplier industry by providing consistent service and products to professionals in the turf industry."

---

Specify Putter
creeping bentgrass
and everything falls into place.

From a turf management perspective, Putter is a hardy variety with fine leaf texture that features an upright growth habit, high shoot density and improved disease resistance.

Putter is also very aggressive against Poa annua.

From a golfer's point of view, Putter's rich, dark, bluish-green color looks great. From tee to fairway to green, Putter offers beauty, resilience and a true-line putting surface that greens up early in the spring and holds its color late into the fall for a longer season of use.

Top turf professionals trust Putter to improve the game from anywhere on the course and in any kind of climate. Recommended by Jacklin Golf and available through Jacklin Seed and Medalist America, trust Putter to help everything fall into place for you, too.
