The Rock at Jocasse, the community plans for a major renovation and construction over the next eight years to upgrade and build new roads, expand recreational amenities, develop homes, and improve the cornerstone recreational amenities, develop a championship style golf course called The Rock. Nestled in the foothills of the Blue Ridge Mountains on highway 11 in Pickens County, S.C., The Rock at Jocasse is a complete, year-round family retreat. The developers are investing more than $3 million to reshape and improve hole design, build new tee boxes and make the course entertaining for players of all ages and skill levels.

OLD BROCKWAY FIRST 9-HOLE WESTERN COURSE TO BE CERTIFIED BY AUDUBON

By DOUG SAUNDERS

TAHOE CITY, Calif. — Since 1992, when Audubon International’s Sanctuary Program was launched, more than 2,500 courses nationwide have been certified as members. The concept of designing and maintaining courses in an environmentally friendly way continues to gain strength, but so far only three courses in the Sanctuary registry are 9-hole facilities. These smaller layouts, usually family-owned, are typically run with tighter budgets. While many of them are ecologically superb, they haven’t seen great value in investing the time, money and toil required to obtain Audubon International’s stamp of approval.

Old Brockway Golf Course, located along the shores of Lake Tahoe in the High Sierra of California, is one small course that was the first to seek certification recently, it became the first 9-hole course west of the Mississippi to do so.

Why did Old Brockway’s high command decide to shoot for certification? What sort of benefits did they envision? The answers became clear once operations began to upgrade the 76-year-old course in an area with some of the most stringent environmental controls in the country.

Tobago Plantations opening in December

By TREYVOR LEDGER

TOBAGO, West Indies — December 15 has been inked for the unveiling of Tobago Plantations Golf Club, designed and managed by PGA Golf Management of Bristol, United Kingdom.

“Tobago is such a beautiful site,” said PGA technical director Bob Hunt, who continued, “there is no decorative planting, everything about the design is wild and natural, very similar to a British links course in that respect.”

Situated on an old sugar and coconut plantation, Tobago Plantations required a fair bit of muck shifting – 350,000 cubic meters of rich, composted topsoil to be exact – a lot of this being the incredible flora and fauna of the course – orchids through to ‘Naked Indian’ trees, and lizards through to these birds that are constantly flapping around and chattering.

Design of the course was undertaken with three new courses already opened and four more scheduled to debut in the near future, Cal Olson Golf Architecture, based here, is on a hot streak in California, New Mexico and Nevada.

The newest construction project, which broke ground recently, is Diamond Hill Golf Course, an 18-hole, upscale public course nestled between two hills in Fullerton, Calif. The course measures 6,890 yards from the tips, but has five tees per hole, making it friendly to both big hitters and beginners.

Design of the course was undertaken with three new courses already opened and four more scheduled to debut in the near future, Cal Olson Golf Architecture, based here, is on a hot streak in California, New Mexico and Nevada.

The newest construction project, which broke ground recently, is Diamond Hill Golf Course, an 18-hole, upscale public course nestled between two hills in Fullerton, Calif. The course measures 6,890 yards from the tips, but has five tees per hole, making it friendly to both big hitters and beginners. At Diamond Hill, we’re planning on using bentgrass on the greens and Bermuda grass on the tees, said Olson. “I think this will work best within the constraints of the natural environment.”

According to Olson, the well-drained soil should provide an excellent turf growing media, which should keep the surface dry as possible. Diamond Hill GC will also feature seven lakes, as well as four to five acres of waste bunkers created for overall drainage needs.

“The site is extremely sensitive environmentally,” explained Hunt. “We had to be very careful not to contaminate the mangrove swamps with any run off. The wonderful side effect of this extreme care...”

Olson on roll

Calif., opened late last year, just before the snows hit. The site sits at an 8,000-foot elevation and incorporates tree-lined fairways, well-trapped greens and numerous lakes, ponds, waterfalls, and streams to make it the ideal mountain retreat for golfers. "It is designed to challenge all skill levels, and it was by far the most difficult to construct," Olson said. A resort course open to the public, Sierra Star is being managed by Intrawest and is the centerpiece of one of the new Intrawest villages.

In Las Cruces, N.M., the Olson group celebrated the grand opening of the Sonoma Ranch this spring. This 7,000-yard championship course sits at an elevation of 4,000 feet and is considered a "high desert" course. The layout has water on only two holes, but the real test of the rolling terrain rests in the variety and strategy of the course itself. "Sonoma Ranch GC has spectacular views - it is really a great looking project," said Olson. "The course has many interesting holes, each unique within the site, and it provides an interesting challenge to the player. It has the feel of a links course."

ENVIRONMENTAL DESIGN

Mandated by the philosophy to develop aesthetically pleasing and optimally playable golf courses, Olson and his team also aim to create construction techniques that maximize the harmony of the natural environment. His Coyote Hills Golf Course in Fullerton, Calif., which was completed in 1996, was recently certified by Audubon International as a wildlife sanctuary.

According to Olson, it's the only California course south of San Francisco to receive this honor. Coyote Hills GC is carved from the hills of an operational oil field, which is precisely why Olson believes this course runs the gamut of design challenges: endangered species, pumping oil wells, soil reclamation, and 150-foot elevation changes. "It was the toughest course to design from an environmental standpoint," he said. "All my courses are committed to environmental integrity. Nowadays, if you're in California, it's an automatic."

Since no two Cal Olson golf projects look or play alike, Mountain Falls Golf Course in Pahrump, Nev., is ready to set a new standard for golf design. The hotel and casino resort course is scheduled to open this month, and will open many eyes to creative golf layout in "flat" areas. "The 7250-yard course is carved out of flat desert and sculpted to challenge players of all abilities," said Olson. Among some of the course's attributes include two holes on each nine having alternate green placements, one for regular play and one for tournament play. Other projects underway are the Hemet Valley Inn and CC, a 6,600-yard course primarily for seniors, which begins construction this month. Also, Reidy Creek, an 18-hole, par-3 course in Escondido, Calif., is scheduled to start construction in September and will open next summer for play.

Since its inception in 1979, Olson's company has designed golf projects in the continental United States and Hawaii, and overseas in Japan, Korea, Singapore, French Polynesia and Spain.
