WHITACRE JOINS SIMPLOT

POSTFALLS, Idaho — Bill Whitacre has been named president of Simplot Turf and Horticulture succeeding Doyle Jackson, who retired May 5. Whitacre will be responsible for business operations and financial matters. Before joining Simplot Whitacre served 24 years with Research Seeds, a St. Joseph, Mo., firm engaged in the development, production and marketing of proprietary forage and turf seed.

TORO NAMES DANIELSON

BLOOMINGTON, Minn. — The Toro Co. has named Paul Danielson finance marketing manager for the Commercial Division where he will oversee the development and execution of all strategic and finance programs for golf and grounds customers and Toro distributors. He comes to Toro from New Holland Credit Co., where he was responsible for finance programs for more than 600 agricultural and industrial dealerships.

PTI reshuffles management deck

Higgins to focus on PTI Tour, product development

By ANDREW OVERBECK

SYLACAUGA, Ala. — In order to concentrate efforts on expanding Pursell Technologies' (PTI) ambitious PTI Tour training program, marketing director Jeff Higgins has taken the new post of director of market development. John Johnson, formerly vice president of sales for Scotts Professional Business Group, has taken over as the new marketing manager for the company.

"Our marketing strategy is centered around the PTI Tour and I was spending the majority of my time doing it," said Higgins. "So we decided to create a new position and I have moved in to coordinate all of the tour activities and the development of new products. John has come in to take over the traditional marketing functions."

Jeff Higgins

John Johnson

Johnson is excited to take the marketing reigns for PTI.

"The goal is to build POLYON to the number one brand in the U.S.," said Johnson. "All the other fertilizer companies are fighting for a share of the methylene urea market. By taking a coating technology and making it economically feasible, Pursell has carved out a niche market with POLYON."

PTI TOUR

Making customers aware of the POLYON technology is the purpose of the PTI Tour said Higgins.

"The hurdle we have for growing our business is that Polyon is so technical and we are perceived as being expensive," he said.

"The tour clears up confusion through education and takes them through

BASF to amend Curalan use on sod, not golf

RESEARCH TRIANGLE PARK, N.C. — Following the tolerance reassessment of vinclozolin by the Environmental Protection Agency (EPA) under the Food Quality Protection Act, BASF Agricultural Products has announced that it will amend the listing of vinclozolin uses supported by U.S. labeling. Vinclozolin is the active ingredient in Curalan and Ronilan fungicides.

However, according to a BASF official, the label amendments will not effect the golf course use of Curalan, a broad-spectrum fungicide used on dollar spot and brown patch.

"There will be no change on use patterns on golf courses," said Jerry Minore,

market manager, fungicides, at BASF. "It will effect other uses on sod farms and food crops but that is about it."

According to Minore, in its two-year reassessment of vinclozolin, the EPA was primarily concerned about dietary exposure and risks to children.

"Since sod is used on home lawns, they decided to restrict sod use," he said. "But there is no major shift for golf."

This year there will be an imposition of a 24-day pre-transplant interval for turf sod, and further refinement of turf and ornamental labeling will be released later this year.

Novartis to divest FLINT, Compass

By ANDREW OVERBECK

BASEL, Switzerland — The merger between Novartis' crop protection and seeds division and AstraZeneca's agrochemicals business is pressing forward as both companies have been forced by U.S. and European regulatory agencies to divest certain product lines. While AstraZeneca plans to divest its worldwide acetochlor corn herbicide, Novartis' divestment will directly impact golf course superintendents.

As a preliminary step in its planned merger to create Syngenta, Novartis Agribusiness has put its worldwide FLINT business up for sale. The decision was based on Federal Trade Commission (FTC) concerns that the combined companies would have a monopoly on the market for *strobilurin* fungicides.

FLINT, which is also known as Compass, has been commercially available in Switzerland, South Africa, Norway and the United States since 1999 and entered the market in Great Britain, Germany and Belgium earlier this year. FLINT is a second-generation *strobilurin* with broad spectrum control and is used widely in the golf, lawn, landscape and ornamental markets.

"At the moment there are only two or three *strobilurin* products on the market," said Novartis spokesman

AERA-vator®

Mike Snyder
Golf Course Superintendent/Sun Lakes Golf Course
Banning, California

"The AERA-vator punches through our hard, compacted soil much better than any aerifier that I've ever seen. I previously owned a Crankshaft style machine that did nothing more than bounce off the ground. I use the AERA-vator primarily to relieve compaction in our high traffic areas as well as the 'hot spots' areas to allow for better water penetration. The vibration effect really enables the tines to break through hard soil with ease. I use it on fairways without the P.T.O. engaged for minimal turf disruption and still get three inches into the soil. The AERA-vator also works great to prep burned out or bare areas that need reseeded."
