PTI reschedules management deck

Higgins to focus on PTI Tour, product development

By ANDREW OVERBECK

SYLACAUGA, Ala. — In order to concentrate efforts on expanding Technologies' (PTI) ambitious PTI Tour training program, marketing director Jeff Higgins has taken the new post of director of market development. John Johnson, formerly vice president of sales for Scotts Professional Business Group, has taken over as the new marketing manager for the company.

"Our marketing strategy is centered around the PTI Tour and I was spending the majority of my time doing it," said Higgins. "So we decided to create a new position and I have moved in to coordinate all of the tour activities and the development of new products. Johnson has come in to take over the traditional marketing functions."

BASF to amend Curalan use on sod, not golf

RESEARCH TRIANGLE PARK, N.C. — Following the tolerance reassessment of vinclozolin by the Environmental Protection Agency (EPA) under the Food Quality Protection Act, BASF Agricultural Products has announced that it will amend the listing of vinclozolin uses supported by U.S. labeling. Vinclozolin is the active ingredient in Curalan and Ronilan fungicides.

However, according to a BASF official, the label amendments will not effect the golf course use of Curalan, a broad-spectrum fungicide used on dollar spot and brown patch.

"There will be no change on use patterns on golf courses," said Jerry Minore, market manager, fungicides, at BASF. "It will effect other uses on sod farms and food crops but that is about it."

According to Minore, in its two-year reassessment of vinclozolin, the EPA was primarily concerned about dietary exposure and risks to children.

"Since sod is used on home lawns, they decided to restrict sod use," he said. "But there is no major shift for golf."

This year there will be an imposition of a 24-day pre-transplant interval for turf sod, and further refinement of turf and ornamental labeling will be released later this year.
