SINCE YOU CAN'T CONTROL THIS IRRIGATION SYSTEM
WE'RE GIVING YOU MORE CONTROL OVER OURS.

PRESENTING THE NEW E-SERIES OSMAC SATELLITE
The popular OSMAC satellite has just gotten better. The new Toro E-Series OSMAC comes with 12 enhancements. Among them, you'll now have the ability to manage up to 64 stations for greater control with precision coverage. You also get our exclusive digital wireless paging technology for interference-free communication between your satellite and central controller. Not to mention the industry's finest surge protector to minimize potential electrical problems. To learn how our new satellite can help with your next installation or system renovation contact your Toro distributor.

Or visit www.toro.com. It's the next best thing to controlling the weather.

SUPPLIER BUSINESS

Industry formulating e-commerce strategies
As business-to-business Internet sites continue to reshape the U.S. economy, the golf course industry is struggling to develop proper e-commerce strategies. Many manufacturers and distributors are torn between signing on with a dot-com company or starting their own e-commerce sites, while also trying to figure out how to use the Internet as a sales tool without eating into existing sales and distribution channels.

To cover all the bases, Lesco, which is pursuing agreements with different e-commerce sites, is also planning its own e-commerce site. "The difference between Lesco and the other dot-com ventures is that we have a business model that has reached out to the golf courses in this country," said Vice President and Chief Information Officer, Wayne Murawski. "Our concept is e-enablement. It allows customers more access to us. We plan to integrate e-business into our bricks and mortar business."

By taking the middle ground and building its own web site and joining up with other dot-coms, Murawski expects to expand Lesco's geographical reach and grow its customer base.

However, according to superintendent Marc Davison at Green Bay (Wis.) Golf and Country Club, e-commerce must be kept simple.

GREENTRAC.COM

Greentrac.com, which launched at the Golf Course Superintendents Association of America Show in February, is up and running and has posted strong numbers in its first 90 days of operation, with $10 million of closed transactions. The Newport Beach, Calif.-based company uses a bidding model to help match buyers with sellers on-line.

"The electronic request for proposal (eRFP) is a buyer driven tool," said Rhonda Knipp, vice president of sales and marketing. "A superintendent can go in and fill out a form detailing exactly what they want to buy and then it is automatically submitted to registered vendors that match that product category."

Vendors can then submit bids on orders and superintendents then select the one that best fits their needs.

According to Knipp, buyers don't always go for the low bid.

"The buyer may be price motivated, but there are also delivery concerns, terms of the agreement and brand and product familiarity that come into play," she said.

Greentrac.com currently has 785 members, which breaks down to 448 buyers and 337 vendors. Since the site went live, they have closed 297 eRFP's. The site covers all product categories, from maintenance and pro shop to food and beverage items.

While the site has an average of 60 to 70 new users a week, vendors have been tougher to add said Knipp.

"The national companies are slower to embrace us because of the implications for their channel or sales organization," she said. "But the eRFP's give them access to leads and allows companies to track staff and distribution activity and see where they are getting bids."

Vendors are charged four to six percent on each transaction.

Going forward, Knipp is setting her sights on building the e-auction section of the site.

"We need to take more..." Continued on next page

"The difference between Lesco and the other dot-com ventures is that we have a business model that has reached out to the golf courses in this country," said Vice President and Chief Information Officer, Wayne Murawski. "Our concept is e-enablement. It allows customers more access to us. We plan to integrate e-business into our bricks and mortar business."

By taking the middle ground and building its own web site and joining up with other dot-coms, Murawski expects to expand Lesco's geographical reach and grow its customer base.

However, according to superintendent Marc Davison at Green Bay (Wis.) Golf and Country Club, e-commerce must be kept simple.
"I am not going to go to everyone’s individual web site,” he said. "That is going in the wrong direction, we need a one-stop-shop.”

Randy Nichols, superintendent at Cherokee Town and Country Club in Dunwoody, Ga., and a Greentrac.com user has been impressed with the cost and time savings available on-line. “Every time I have placed an eRFP I have saved the club money, anywhere from 10 to 35 percent,” he said.

Exactly how the Internet will alter existing vendor relationships is still unclear, although some companies are envisioning a new sales model.

Linde Sorensen, managing director of Internet services for Toro Co., believes that the Internet will not replace face-to-face customer support, but will enhance it.

“It may get salespeople out providing training and product support and help them spend less time pushing paper,” she said.

Casey Pearson, director of e-business for Textron Golf and Turf, looks to take it one step further.

“I see customers using on-line ‘configurators’ to put together specific combinations of accessories that they are looking for in a piece of equipment,” he said.

However, companies are approaching the young e-commerce industry with guarded optimism.

“We are taking the conservative approach,” said Sorensen. “We are looking at all the sites. There is not one solution.”

Melichar. “Insects such as ants, army worms, cut worms, chinch bugs, chiggers, tics and crickets will all be controlled at the one pound rate. The rate will still control 85 percent of the insects listed.”

Dow will have to change the Dursban Pro label to reflect the new rates by December, but Melichar said that all product with the current label, including stock purchased between now and December, can be legally applied until Dec. 1, 2001.
