

Tennis champ Ivan Lendl plans premier course for New England

GOSHEN, Conn. — Tennis great Ivan Lendl and International Golf Group chairman David A. Rosow plan to build an 18-hole private golf club in this northwestern Connecticut town that — they say — will rival the best courses in New England. The layout will be designed by Steve Smyers of Lakeland, Fla., who is well-known for sensitivity to the environment, an important factor for the developers.

Rosow, who lives an hour away in Southport, and Lendl, who lives in Goshen and now golfs on the Celebrity Players Tour and Buy.com Tour, decided nearly three years ago that the region needed a high-quality 18-hole course.

"Torrington Country Club has a waiting list and all the others are nine-hole courses," said Rosow. "We are both avid golfers and want a premium golf facility. And with the dearth of courses in northwestern Connecticut we concluded this was a great opportunity."

A two-year search for the best land for a links-style course singled out 650-acre Ivy Mountain Farm, owned by the children of Mike Budney who, at 89, is such an avid golfer that he has a practice facility at his home. Lendl and Rosow have a multi-year option on the property from the Budneys while they go through permitting with various governmental agencies.

"We would love to be under construction sometime next summer, with a planned opening in 2002," Rosow said.

The developers hope to include a state-of-the-art practice facility and a nine-hole par-3 course on the property, if one can be fit adequately on the land.

'LOW-KEY AND COUNTRYISH'

Rosow, whose company operates four golf properties, envisions a modest clubhouse, tennis courts, a swimming pool and perhaps a limited number of houses. "Our plan," he said, "is to design the best golf course to fit on the property. After that is routed and permitted and underway, we will think about housing. But there will be no more than 20 homes, they will be very, very high-end, and they will overlook the course but not be adjacent to it."

Cottages on the site would allow four foursomes to spend the night.

"It will be low-key and countryish," said Rosow, adding that he expects to cap the memberships at 260 families.

Rosow and Lendl settled on Steve Smyers as the architect based on his environmental record.

"Ivan and I have played a number of Steve's courses and are incredibly impressed with the way he fits a golf course into the land and the strategy he designs," Rosow said.

The site has tremendous vistas of the hills to the west and south that surround a 200-acre pasture, and more than half the golf course will be in view from the clubhouse.

"It also has a wonderful lake, gently rolling terrain, and what we look for in hard, powerful edges — edges being

tree lines and the foothills," said Smyers. "The site is open but contained by forest areas to the south and east. And off to the north and west is a mountain range and state park that will never be developed."

LENDL'S ROLE

What of the involvement of Lendl, the winner of eight Grand Slam championships who has abandoned tennis for golf?

"Ivan will be very much involved," said Smyers. "That is his nature and golf is his passion. Both he and David have a real fire for this project. Ivan is a student of golf architecture. He has played all the great golf courses in the world and loves to talk about strategy, design and the game of golf. He is as intense with golf as he was with the game of tennis."

Revised plan saves 'hallowed' first hole at Stanford GC

PALO ALTO, Calif. — Palo Alto Mayor Liz Kniss and Stanford University president John Hennessy have worked out a way to relocate faculty housing and save the famed first hole of Stanford's golf course. The university had proposed relocating the first hole because it sits on land that, under a 1997 plan, could be developed for much-needed housing. That plan envisioned 570 faculty townhouses sitting on the first fairway.

The new scheme — an amendment to a contractual agreement between the city and Stanford — would allow the university to build faculty housing on an adjacent site, thus preserving the first hole.

Former Stanford golfers Tom Watson and Tiger Woods were among many alums who objected to the idea of relocating the unique first hole, one of the most dramatic opening holes in Northern California. A 507-yard par-5, the hole requires a drive over Junipero Serra Boulevard from a manicured ridge that overlooks the campus, to the fairway 75 feet below.

Instead of moving the hole, the proposal would leave it intact, and, in exchange, designate a 13-acre parcel on Searsville Road and an adjacent 25-acre lot on Campus Drive for faculty housing.

"We feel this is a good solution to a challenging problem of housing needs," Kniss said. "This will allow us to protect the hallowed first hole and the surrounding habitat while providing needed housing."

Hennessy said he is pleased that Kniss

We feel this is a good solution to a challenging problem of housing needs.

—Mayor Liz Kniss

The King & The Bear to debut at World Golf Foundation 2000

ST. AUGUSTINE, Fla. — Arnold Palmer and Jack Nicklaus, after teaming up as designers for the first time, will unveil their joint creation Nov. 15 at World Golf Village (WGV) here. The King & The Bear, measuring 7,247 yards from the championship tees and 5,195 from the forward pegs, becomes the second layout at the WGV.

During the same week, St. Augustine will host a bevy of major industry events. Under the heading of World Golf Foundation 2000, the week includes The First Tee program's national association meeting, featuring the announcement of its phase two goals and an address by the honorary chairman and former President, George Bush.

From Nov. 15 to 17, an event called Golf 2000: Vision for the Future, will bring together industry experts to address participation, growth and access issues. Also taking place: the CertainTeed Hall of Fame Golf Chal-

lenge, Nov. 20 to 22, featuring 20 Hall of Famers from the Ladies Professional Golf Association (LPGA) and the Senior PGA Tour.

The debut of The King & The Bear is the marquee event. Both members of the World Golf Hall of Fame, Palmer and Nicklaus pooled their design talents last year in honor of the Hall of Fame, also based here, which will induct eight new members Nov. 20. Their combined architectural skills have fashioned a remarkable course that's both beautiful and challenging. They will christen their new layout with an 18-hole exhibition that is free and open to the public.

Traditional in design, the course features generous fairways with water coming into play on almost every hole. Lakes lined with large coquina rocks make for an impressive

N.Y. governor honors Colonial Acres Golf Club for environmental practices

By JOEL JOYNER

ALBANY, N.Y. — Colonial Acres Golf Club, located in Glenmont, has received the Governor's Award for Pollution Prevention, the first golf course ever to win the highest environmental honor given by

New York State.

"I have an outstanding board of directors that lets me do what's necessary to maintain the course in an environmentally positive direction," said superintendent Pat Blum, who accepted the award.

Opened in 1964, the nine-hole

Colonial Acres course sits on 33 acres of property with only 13 acres of maintained turf. "We have 20 acres of woodland, naturalized area, and water," said Blum. "Our water source is 100 percent runoff—we don't use wells or creeks."

As a 1998 certified member in

the Audubon Cooperative Sanctuary Program, the golf course also has the distinction of being the smallest one in the world certified by Audubon International, according to head staff ecologist Joellen Zeh. "Pat was very motivated in environmental stewardship," she said. "He held the record for certification time — 10 months — until just recently. The Mesquite Grove

Golf Club, at the Dyess Air Force Base in Texas, now holds that distinction with a six-month certification period.

"Colonial Acres is a small course that needs wide fairways for the golfers, and Pat has an extremely low budget," Zeh added. "Despite those factors he has managed to create a wonderful sanctuary on the property."

TURKEY POOP SOLUTION

Blum said his goal is to continue increasing biological and compost use while gradually reducing the use of chemicals. "I had to show [with documentation and sales receipts] that I only used category three products, like Chipco 26019 for fungicide control and Touché, which carry only cautionary labels," he said. "Category one and two products have danger and warning labels, respectively, and they persist longer in the environment."

Blum has built up soil strength with compost fertilizers and microbial inoculates. "With a combination of a bone meal fertilizer and a product called Stain, which is essentially turkey poop, we've created a soil more resistant to pests," he explained. "We have been relying heavily on this process for five years now, each year reducing our Chipco and Touché use and increasing our biological and compost use. Ideally, we're striving toward the goal of total pollution prevention."

The superintendent joked that "you could spit from one end of this course to the other. But to have so much wildlife on only 33 acres like we have at Colonial Acres, it really says a lot about the habitat and environmental conditions. The main thing is to get the message out to other superintendents, so that maybe they'll push themselves a little bit further in their environmental awareness and maintenance practices."

Stanford's save

continued from page 3

supports the new proposal. "This would be a happy outcome for all parties," he said. "We would still have the same amount of space available for faculty housing, and we would preserve a valued part of the Stanford golf course."

The proposal also precludes the need to reroute the first seven holes of the 18-hole design.

"This is clearly a victory for all," said Stanford director of athletics Ted Leland. "We're thrilled that we can now accommodate the university's housing needs while maintaining the integrity and architecture of the Stanford Golf Course." The course, developed in 1930, is one of the country's most challenging college layouts. ■

GOLF COURSE NEWS

Walk tall. Carry a big stick. Drive This.

Sometimes you just have to get tough. And when you do, get the E-Z-GO Workhorse™. With standard features like an 11hp 350cc engine, a 1200lb. payload capacity and an exclusive heavy-duty bed liner, it has everything you need to handle the big jobs. It carries sand, gravel, bales of straw, building materials, and all your tools and equipment. Optional extras include an oversized cargo bed and power dump. So, when the going gets tough, get to your E-Z-GO Workhorse dealer.
