Western Golf goes ‘back east’ to land Stonewall Golf Club

By JAY FINEGAN

GAINSVILLE, Va. — Western Golf Properties has landed a contract to manage the new Stonewall Golf Club here in Gainsville, about 45 minutes west of downtown Washington, D.C.

Western Golf, headquartered in Scottsdale, Ariz., will handle day-to-day operations of the 18-hole course and clubhouse, both scheduled to open early this fall. The Robert Trent Jones Golf Club, frequent host of the President’s Cup tournament, borders the Lake Manassas gated residential complex that embraces the Stone wall course.

“Western Golf Properties has an impressive portfolio of courses,” said Warren Watkins, president of South Star Development Co., which developed the Stone wall complex and Lake Manassas, a fast-growing residential community. “Having managed some of the finest courses in the country, such as Estrella Mountain Ranch Club in Arizona, they have the expertise and experience to run a high-end daily-fee course like Stonewall.”

LARGE PRACTICE AREA

The 6,938-yard, par-72 layout was designed by golf architect Tom Jackson and built by engineers Dewberry & Davis. Ed Long has assumed the duties of head superintendent.

We will be high-end public,” said director of golf Rob Ford. “The golf course is going to be conducive to that, the way it’s laid out. We’ll have fine amenities, membrability, aesthetics, condition-

Cunningham to head development for KemperSports

NORTHBROOK, Ill. — Dan Cunningham has been elected vice president, development and construction, of KemperSports Management by the company’s board of directors.

Cunningham has more than 20 years of experience in the development of championship golf courses and related structures. Throughout his career, he has played a part in building more than 15 golf courses, including the remodeling of the Boca Raton Resort in Florida and ASU Karsten Golf Course in Arizona.

He also was involved in the remodeling of Harborside International Golf Course in Chicago, which was recently rated the third-best municipal golf course in America. He has worked with numerous golf architects, including Pete Dye, Arnold Palmer and Dick Nugent.

Cunningham will oversee KemperSports’ development group, which is currently building, in addition to The Glen Club, three junior centers in Chicago, a Greg Norman-designed golf club for Landleonore Resort and Conference Center in Virginia and the Nike Redevlopment Project, a multi-million dollar sports complex in Vernon Hills. He will also direct the company’s capital

Once the work of these consultants showed us the proposed costs, including the time required to implement suggested changes, we applied these to our valuation of Case Study GC.

**HIDDEN VALUE**

The physical attributes of a course are of particular interest to us because they often tell the hidden story of the facility's overall quality and value. At Case Study GC, the property was located on a dramatic and beautiful site but it lacked quality conditioning to go along with the good design and great terrain. Quantifying this evaluation means understanding and evaluating the efficient operation/maintenance of the important course components:

- Grassing
- Irrigation systems
- Site size and terrain
- Green and tee sizes
- Maintenance specifications and quality of maintenance
- Cart paths
- Features (bunkers, ponds, etc.)
- Buildings (clubhouse/maintenance, etc.)
- Architect & design
- I would be remiss if I didn’t mention that an analysis of clubhouse facilities can often be deceiving. Often, the bigger the clubhouse, the bigger the problem. A big clubhouse not only doesn’t mean more value; sometimes it means less.

**DETERMINING VALUE**

There are three primary approaches to appraising facility value:

- **The Income Approach** – A set of procedures by which an appraiser derives a value indication by computing the property being appraised to similar properties that have been sold recently, applying appropriate units of comparison, and making adjustments, based on the elements of comparison, to the sales prices of the comparables.
- **The Cost Approach** – A set of procedures by which an appraiser derives a value indication by estimating the current cost to reproduce or replace the existing structure, deducting for all accrued depreciation in the property and adding the estimated land value.

There’s a great deal of analysis involved with each method, especially the last. We use a combination of all three because, while each has its strengths, each also has its weaknesses.

Nevertheless, when it comes to golf course properties, the income approach is typically the most reliable as it normally reflects the behavior of buyers and sellers in the marketplace most accurately. The main strength of the income approach is this: It is usually the method use by investors when analyzing golf properties for possible purchase. The main weakness: The short cash flow period associated with golf courses (and the vagaries of weather) can render inaccurate even the most well-supported income or expense projections.

**INCOME-BASED COMPARISON**

The sales comparison approach, by nature, is designed to reflect buyer and seller behavior, but with golf courses this method can often produce data with a wide range of indications. Therefore, most experienced golf property appraisers will utilize income-based units of comparison in developing the sales comparison approach.

The strengths of this approach: It can provide an excellent barometer as to how buyers and sellers are reacting to income and expense projections; and how a property’s image can affect its market value directly. The weakness of this approach: Adequate data is often unavailable and comparable sales are often difficult to find and confirm.

The cost approach, as with many income properties, has limited application for golf courses. It is not typically reflective of buyer behavior and often yields value indications far different than those found from the income and sales comparison approaches. This approach, however, can be used effectively with properties which possess unique qualities that make comparisons difficult, or when an income approach may not be applicable, such as in some (but not all) non-profit clubs.

If I can leave you with one thought, it's this: Experienced course appraisers are equipped to identify more than the market value of a particular facility. My firm, for example, has performed hundreds of appraisals all over the country. In analyzing the operating procedures at all these facilities, we've seen the good and the bad – what works and what doesn't, and why.

Determining actual facility value is important and useful, but sharing this objective, comparative analysis with clients lays the groundwork for increasing that value.

from the bag drop to the clubhouse to the service levels – valets and things like that.

"The practice facility is probably second to none around here," Ford added. "We have two tee ing areas, each measuring 300 yards long and 75 yards deep. There are target greens out there with bunkers. We have practice greens, chipping greens. You can even hit fairway bunker shots."

Besides maintaining the landscape of the course and practice areas, Western Golf will manage the personnel and purchasing for the clubhouse's pro shop, bar and grill.

Southern Star is building 700 homesites on the property, along with miles of wooded trails, fishing ponds, and a pool and tennis center.

Founded in 1985 by former PGA president Joe Black, Western Golf manages or consults for some 25 courses around the country.
