GCSAA shakes up management team, O'Brien leaves

LAWRENCE, Kan. — The departure of chief operating officer Joe O'Brien and the appointment of new directors highlight a management shakeup at the Golf Course Superintendents Association of America (GCSAA).

A 27-year veteran of the golf industry, O'Brien said he is leaving to pursue new challenges. He joined GCSAA in 1994 to manage such programs as education, career development, communications, research and membership. "It was rewarding to work with such an outstanding group of individuals who represent the profession," he said. "I trust the association and its members are better off now than seven years ago."

He also was involved in the Golf and Environment Initiative, which in 1998 earned him the association's highest honor in the field, the President's Award for Environmental Leadership. "While we are losing a valued team player, he will always be our friend," said GCSAA president R. Scott Woodhead.

O'Brien began his golf career with the PGA of America in 1973 and worked his way up the ranks as director of education, manager of membership services and senior director for strategic planning. From there he became senior business developer for Marriott Golf.

"His contributions to the GCSAA and its members were considerable and lasting," O'Brien said. "It is important for us to keep things right." Monza also announced that two new directors have been appointed to the management team - Clair Keizer, corporate marketing and sales, and Clark Throssell, research.

Keizer comes from Bernstein-Rein Advertising, in Kansas City, Kan. He has 19 years of marketing, advertising and association-related experience and will replace Bob Shively, who left the GCSAA to become CEO of the National Auctioneers Association. Keizer graduated from the University of Kansas in 1980 with a B.A. in journalism.

Throssell, a professor of turfgrass science at Purdue University, takes over as director of research. He holds a degree in biology from the University of Montana and an M.S. in agronomy from Penn State. His experience includes service as a GCSAA seminar instructor and member of the association's research committee, and as executive director of the Midwest Regional Turf Foundation. He replaces Jeff Nus, who left GCSAA to become research communicator at the U.S. Golf Association.

EPA clears Myrtle Beach National of wetlands violations

MYRTLE BEACH, S.C. — Federal environmental investigators have cleared two Horry County landowners of illegal wetlands ditching. Myrtle Beach National Golf Club Co. and Silver Carolina Development LLC got word recently that they are no longer subject to the U.S. Environmental Protection Agency's ongoing investigation of wetlands destruction in the county.

Myrtle Beach National was officially cleared in a letter from the EPA and the South Carolina Office of Ocean and Coastal Resource Management (OCRM). Silver Carolina got word that it was cleared in a conversation with OCRM officials, said Mike Wooten, president of DDC Engineering. DDC represents both Myrtle Beach National and Silver Carolina.

Both companies were included in the first round of investigations following a company looking for violations of the federal Clean Water Act. The act protects wetlands because they filter water and absorb floods.

Investigators questioned activities on 570 acres Myrtle Beach National owns near U.S. 501. The company is growing very slowly for the rest of this winter, likely to bring more record cold. Heat waves and drought scourged much of the southern and western United States in 2000, while the Midwest and northeastern regions encountered extended periods of cooler- and wetter-than-normal conditions, according to the NWS.

Months of below-normal precipitation and above-normal temperatures brought severe drought and widespread wildfires throughout the South and West. The Deep South experienced a third straight summer of below-normal precipitation, with the driest May-to-October stretch on record for Florida, Georgia, Alabama...

Southern California PGA honors Thorman

BREA, Calif. — The Southern California Professional Golf Association (SCPGA) has honored golf consultant and benefactor Dick Thorman with its 2000 President's Award, recognizing his tireless work in the golf industry.

The award is presented each year to an individual who has given extraordinary service and contribution to the game. The SCPGA noted Thorman's major role in developing the association's two new championship layouts at Oak Valley, in Beaumont, 40 miles east of Los Angeles, making the association the first regional section of the PGA to own and operate its own courses.

"Thorman was so much more than a consultant to us," explained Greg Frederick, president of SCPGA. "He helped us, educated us, nurtured our thinking and energized us to find out what we could do as professionals."

Thorman also has spent years donating time and expertise to develop golf programs for inner-city youths. He provided the development services and raised more than $1 million for Pro Kids Golf and Learning Academy, a San Diego-based youth golf program chosen as the PGA Tour "charity of the year" in 1996. Thorman continues to serve on the president's council of Pro Kids Golf and to help other communities develop similar programs to bring urban youth in to golf.

With 25 years of experience in developing residential, resort and public golf projects, Thorman has participated in such high-profile projects as the purchase of the PGA West and La Quinta Golf Courses for KSL Recreation; restructuring of Del Mar Country Club; development of the Callaway Golf Designing program; and project management of Farm Neck Golf Club on Martha's Vineyard, Mass.

Drought, wildfires, record cold - what a year 2000 was!

SILVER SPRING, Md. — The National Weather Service (NWS) has described 2000 as a "year of topsy-turvy weather," with the rest of this winter likely to bring even more record cold.

Heat waves and drought scourged much of the southern and western United States in 2000, while the Midwest and northeastern regions encountered extended periods of cooler- and wetter-than-normal conditions, according to the NWS.

Monthly forecasts showed above-normal precipitation and below-normal temperatures throughout the South and West. The Deep South experienced a third straight summer of below-normal precipitation, with the driest May-to-October stretch on record for Florida, Georgia, Alabama...
