Club Car and E-Z-GO enter adaptive golf car market

By ANDREW OVERBECK

AUGUSTA, Ga. — Citing a need to make golf courses more accessible, both Club Car and E-Z-GO have unveiled plans to enter the adaptive golf car market. The market for such adaptive cars is potentially huge according the golf car manufacturers. Of the 50 million disabled people in the United States, four to seven million are potential golfers. Versions of the companies’ adaptive cars were rolled out at both the PGA show in Orlando and GCMA show in Dallas, much to the delight of fellow competitors in the niche business who feel the entry of the “big two” will help to validate the need for the vehicles. “For the past five years, I have been saying that courses need to be purchasing these cars,” said Nick Pike, president of Mobility Solutions in Southington, Ohio. “With Club Car and E-Z-GO getting involved, people will take notice of the needs of handicapped golfers.”

CLUB CAR

While the major companies in the market are primarily start-ups or spinoffs from larger mobility scooter concerns, both Club Car and E-Z-GO have formed strategic alliances to get an immediate foothold in the market. Club Car’s 1-PASS vehicle will be manufactured by Englewood, Colo.-based SoloRider Industries, which has nearly eight years of experience in the field.

Ex-PGA president Addis launches Medallion Golf

By JAY FINEGAN

SAN DIEGO — Tom Addis III, president of the PGA of America in 1995 and ’96, has teamed up with 14 other golf industry professionals to launch Medallion Golf, a full-service management firm. The new company, based here in San Diego, will train its marketing sights on California, Arizona, Nevada and Utah.

“My main goal is to have four to six facilities in our portfolio in the next two years, courses that we either own, lease or manage,” said Addis, Medallion’s president and operations chief. “We don’t want to spread ourselves too thin while we’re getting established. We plan to take a very hands-on approach to every project.”

Addis has decades of salient experience.

Developer bulldozing new Greg Norman course

By JAY FINEGAN

SCOTTSDALE, Ariz. — In one of the weirdest reversals ever seen in golf development, a brand new Greg Norman-designed layout here, Stonehaven Golf Course, will be bulldozed back to raw earth and rebuilt virtually from scratch under a plan by Tom Fazio.

Indeed, nearly everything about the property is changing - the owner, the developer, even the name. The new course is being called Mirabel Golf Club. Where Stonehaven was a daily-fee facility, Mirabel will encounter more dry lake beds and harsher water restrictions.

“When the national drought people show a map of the continental United States, there’s a huge bulls-eye that covers Florida from northern Orlando to...”

Florida drought approaching crisis

By JOEL JOYNER

TALLAHASSEE, Fla. — In its third year of drought, the moisture-starved state of Florida has learned that the worst is yet to come.

Expecting little rainfall before May, as hot and dry weather patterns sweep across the region, golf courses in central Florida will encounter more dry lake beds and harsher water restrictions.

“When the national drought people show a map of the continental United States, there’s a huge bulls-eye that covers Florida from northern Orlando to...”

Adaptive car market ready for Club Car, E-Z-GO

Continued from page 1

"We had been looking at accessibility solutions over the course of the last year and we tested a lot of the vehicles on the market to get an understanding of what the needs and requirements were," said Gary Stough, director of marketing for Club Car. "The SoloRider vehicle was the safest and most stable car out there."

Roger Pretekin, president of SoloRider, began researching the needs of disabled golfers in the early 1990s. The company's first shot at an adaptive golf car was a modified mobility scooter which simply was not stable or powerful enough. After further development, SoloRider rolled out the AteeA, which was specifically designed to tackle golf course terrain.

"The car exceeds ANSI standards and has an independent four-wheel suspension that transfers only six pounds of pressure per square inch," said Pretekin. "It is also accommodates a wide variety of handiports."

The vehicle features ergonomic hand controls, a multi-position, lockable 360-degree swivel seat, rear-wheel manual traction control, regenerative braking, and six-inch ground clearance.

"These are the bare minimums," Pretekin said. "We also developed a standing seat option that raises the player into the standing position where they can execute a shot."

The standard 1-PASS vehicle will retail for $6,995 and the standing seat option will cost $2,000. The first shipments of the car will begin this month and Pretekin said his factory is capable of producing 2,000 units a year.

As part of the deal, Club Car will supply SoloRider with sales, marketing, sourcing and engineering assistance. "We have already made alterations to the vehicle," said Stough. "It now has a 36-volt charger and a new transaxle designed like ours that will make it easier to service."

E-GO ALLIES WITH EAGLE

E-Z-GO has entered the market in a similar agreement forming an alliance with Augusta-based Eagle Products and Parts. In addition to manufacturing golf car accessories, Eagle produces electric shopping buggies.

"More and more courses are becoming aware of accessibility issues," said Ron Skenes, communications manager for E-Z-GO. "Courses will certainly not need 60 of these vehicles, but at some point every golf course will need to have these adaptive cars. This is a good niche market that made sense for us to expand into."

In developing the E-Z-GO product, Eagle started from scratch.

"We began with a clean sheet of paper," said Eagle president Frank Dola. "We used the same controller technology but we have beefed up the car."

"The trick here is to appeal to fleet sales," he continued. "We are developing a car that will handle the lion's share of disabilities. We are not addressing quadriglegers, but primarily people who are inconvenienced."

As a result, the car will retail for about $4,000 and focus on the low end of the market. Features on the car include a low center of gravity, three braking mechanisms, a slip-proof transaxle and a lower center of gravity. The car will enter production this July.

MARKET ACCESS

While the established players have traditionally marketed their products via word-of-mouth and made sales mostly to individual golfers, the challenge now will be to broaden their market appeal and break into fleet sales to golf courses.

"This is where both Club Car and E-Z-GO have the advantage."

"Before SoloRider teamed up with Club Car, we had little access to the market and service and distribution were problems," said Pretekin. "Now that is solved. Without our agreement with Club Car, there is no one out there that can properly maintain these vehicles and provide parts. Club Car provides service in every state and they have financing programs that make it very easy for courses to step up and support accessibility by purchasing these cars."

The little guys, however, said they are up to the task.

"We have a high quality and high performance golf car," said Jeff Mattheson, director of sales and marketing for Fairway Golf Cars. "They may have the direct and immediate access to accounts, but that is part of our challenge. We have to get out there and let people know that there are alternatives in the market."
