Club Car introduces Café Express

AUGUSTA, Ga. — Club Car has introduced the Club Car Café Express, a completely redesigned vehicle that is lighter and has more storage capacity. The vehicle offers a wide range of benefits for course owners, managers and golfers. The car is made of rust-free aluminum and stainless steel to reduce weight. It features 10 cubic feet of cold-storage space along with clear doors and tiered food racks to keep food separate from ice and to display drinks and snack items clearly. Two insulated beverage dispensers enable the vehicle to offer hot and cold beverages at the same time. Café Express vehicles, which began shipping in August, carry a two-year warranty.

The lightweight Café Express offers more storage

SISIS ready with Rotorake 600 dethatcher

The new Rotorake 600 dethatcher from SISIS turf equipment offers a 13hp engine and a 24-inch working width that operates at a maximum depth of two-inches to provide a clean-cut groove. The machine comes with a range of interchangeable reels for year-round use. The reel rotates at high speed against the direction of travel as blades cut upwards continuously throwing fiber forwards rather than pushing it into the surface. Front or rear discharge can be selected, as well as a large capacity collector box. Neutral, reverse and six forward gears ensure maneuverability.

PrimerSelect set for November release

Aquatrols has introduced PrimerSelect and PrimerSelect SWDG — enhanced matrix flow soil surfactants based on the original Primer chemistry. The PrimerSelect formulations promise all the benefits of Primer 604 with some additional benefits discovered through Aquatrols’ continued testing of the Primer chemistry. PrimerSelect lowers costs by ensuring uniform rootzone delivery of water, fertilizers or chemicals — and lessens hassles that can be associated with using soil surfactants. The product also allows superintendents to select application rates and frequencies based on their own soil type(s) and spray program preferences. PrimerSelect liquid can also be applied with many fertilizers and turf management chemicals — further increasing ease of use. PrimerSelect SWDG is a patented ‘spreadable, water dispersible granular’ that dissolves when watered-in leaving no residue on the turf surface and minimizing pickup by mowers.

Profile releases Tee & Fairway soil modifier

Profile Products has added PROFILE Tee & Fairway to its line of porous ceramic products. Like Profile’s porous ceramic products for sand-based putting greens, the tee and fairway product is designed to modify soil structure to provide a better root zone. Incorporated into heavily-used tee box and fairway root zones during construction or as part of a topdressing program, the product adds porosity to improve the soil profile. For more information, contact: 800-207-6457 or www.profileproducts.com.

Simplot Partners debuts PolarKote fungicide

SAN DIEGO — Simplot Partners has announced the addition of PolarKote preventative fungicide to its product line. PolarKote has proven to be effective in controlling both gray and pink snow mold.

The new PolarKote products are available in 10G, a 10 percent granular formulation, and 4F, a liquid sprayable formulation. The granular product is available in 50-pound bags and contains five pounds of PCNB per bag. The flowable product is available in both five-gallon jugs and 50-gallon drums, and each contains four pounds of PCNB per gallon.
