Yamaha Golf Car to unveil $31 million factory, '03 model

BY A. OVERBECK

NEWNAN, Ga. — In a strong statement of its commitment to the golf market, Yamaha Golf Car (YGC) is set to open a brand new $31 million manufacturing facility dedicated solely to golf cars, utility vehicles and off-fairway vehicles June 8. At the grand opening the company will also unveil its 2003 golf car model — reportedly the first of several new products slated to roll off the production line at the state-of-the-art, 220,000-square-foot factory.

"The first car to come down the line will be the '03 model," said Jon Bammann, division manager of new business development and off-fairway vehicles. "We will also be expanding our utility vehicle line. We feel we have a good medium-duty vehicle in the G21, but there is a spot in our lineup where we could have a heavy-duty and lighter-duty vehicle."

Yamaha officials also hinted at future products that will push golf's staid image. "We have some fun stuff that we are going to leverage," said Stu Horlak, general manager for Yamaha Motor Co. "We have the advantage of bigger markets and more diverse product lines [ATVs, motorcycles, watercraft]. The guys at YGC don't stop thinking with the traditional fleet golf car, [superintendents] have needs from turf care to off-fairway vehicles."

PGA Village foes face referendum deadline

BY DEREK RICE

SAN ANTONIO, Texas — Opponents of the proposed PGA Village here were disappointed by the City Council's 9-2 decision to approve a deal with Austin-based Lumbermen's Investment Corp. to build the resort on land that drains into the Edwards Aquifer, the city's sole source of water. Hours after the April 5 decision, a coalition of groups that oppose the plan began scrambling to obtain the 68,023 signatures that would be necessary to put the issue to citywide referendum. Under the city's charter, the groups had 40 days, or until May 13 to obtain those signatures, although the interpretation of the charter is open to debate.

"There are a number of different interpretations about what that date Continued on page 18
YGC readies certified pre-owned program

PEACHTREE CITY, Ga. — In a move to reach a lower price point with its golf cars, Yamaha Golf Car (YGC) has opened a reconditioning facility here near its headquarters in Newnan to handle its new certified pre-owned vehicle program.

“If price is selling golf cars, we are telling our customers that we save them money in the price of maintenance and upkeep,” said Jon Bammann, division manager of new business development and off-fairway vehicles. “Our same parts that come from our ATV line so they last a long time. Our certified pre-owned program takes advantage of that longevity.

DiMino tackles Lesco’s challenges

Continued from page 25

distribution centers to reduce transportation costs dramatically.

The sales force has also been realigned to operate more efficiently, Lesco has combined its golf and lawn care operations to better serve all the people in a region and to eliminate idle salespeople. DiMino has also separated the sales and service departments so that individual roles are better defined.

“With sales and service overlapping we had people who enjoyed selling who were restocking shelves,” said DiMino. “Now we have the salespeople doing what they are supposed to be doing. The sales people can now concentrate on selling.”

DiMino said the changes in distribution and sales will allow for same store growth of five to six percent this year.

SHIFTING INTO REAL TIME

To better track sales from its distribution centers, Lesco has partnered with AT&T, Microsoft and IBM to improve its existing reporting system.

“Right now the stores are not in real time,” DiMino said. “Fixing that will allow us to get a jump on replenishing stock, manufacturing and forecasting sales growth.

Combining these new changes with organic growth like the expansion of its independent marketer program, which now has four members, DiMino said that going forward Lesco could approach eight to ten percent growth in year-to-year same store sales.

According to DiMino, Lesco is already seeing the benefits of the changes that have been implemented to date. While they have raised prices one to two percent to increase margins, the new CEO reported modest sales growth and lower than expected first-quarter losses.

“We have seen a recovery towards profitability because of our efforts to concentrate on productivity and efficiency,” said DiMino. However, Lesco still faces several challenges, the most pressing of which is saving its underperforming Novex specialty fertilizer brand.

“It is a great product, but it is expensive to make,” admitted DiMino. “On a return on invested capital basis, it is not in the sweet spot at all. Novex by itself will probably not be a $20 to $25 million product line.

Lesco will be mixing it with its PolyPlus fertilizer to create 10- to 60-percent blends, giving its Novex regular fertilizer the slow-release qualities of Novex. The move is expected to offset production costs while also improving PolyPlus profits.

Lesco is also watching external issues such as golf sales, which have remained flat because resort courses are still facing low levels of play. Sales from national accounts also dropped nearly five percent during the first quarter as large accounts like American Golf are in financial trouble.

“Lesco is not going to be a little more careful about the customers we are choosing,” said DiMino. “We are not going to chase unprofitable business.”

$31 million Yamaha facility to improve productivity

Continued from page 1

The concept is simple, according Horlak. “We aim to decrease costs, improve quality and reliability and add manufacturing flexibility,” he said.

“Number one was cost and flow improvements,” Horlak continued. “We really focused on productivity improvements because we need a low-overhead, low-cost facility.”

Workers from the old factory competed with other applicants for the 100 spots in the new factory. Horlak said the low number of employees was made possible by automation, training and product simplification. “We will reduce the number of man hours per vehicle by 50 percent as a result,” he said.

Quality and reliability were two other target areas.

“We have installed new welding stations with a new tooling scheme that reduces the number of transfers and increases the amount of robotic welding on the frame,” said Horlak.

In addition to the 17 robotic welding stations, Yamaha also invested $5 million in a multi-step frame coating system that includes immersion cleaning, immersion corrosion protection and powder coating.

“The cars have gotten even better,” said Horlak. “The frame has more corrosion protection and better integrity through robotic welding. If we can deliver a better car, in a better manner at the same or better cost, we are going to start beating them [the competition].”

In addition to these investments and product improvements, Horlak said the facility will have greater flexibility to handle custom batches and options and produce vehicles on a just-in-time schedule for dealers.

Bayer

in lost sales.

“It was to be expected that insecticides [would be divested] as Bayer already has a strong position in this segment,” said Forneck. “Bayer retains two neonicotinoids – imidacloprid and thiacloprid.” He added that Bayer’s primary motivation in purchasing Aventis CropScience, especially in the U.S. market, was gaining access to its strong herbicide product line and biotechnology research.

Once the deal goes through, Bayer will be the second largest agrochemical manufacturer behind Syngenta AG. However, the company’s first quarter operating profit dropped 46 percent to 493 million euros ($442 million), and Bayer officials warned that 2002 was going to be a tough year.

Trion Direct

Giving You a Straight Approach

Equipping your shop with the best turf equipment lift is incredibly easy. When you work with a factory direct sales consultant at Trion, you’ll quickly get all the information you need:

- Brand comparison data
- Technical assistance
- Referral contacts
- Lift accessory information
- Real budget numbers
- Shop floor plans
- Custom lift option

With Trion’s factory direct sales and service, you make the right choice — we’ll take care of the rest!
