Summit Golf adds to growing portfolio

By ANDREW OVERBECK

PONTE VEDRA BEACH, Fla. — Seizing upon the turmoil in the golf course business, Summit Golf Group has added three new management contracts so far in 2002, bringing its growing portfolio to five courses. The company anticipates having 15 management agreements in place by the end of the year.

The golf business is struggling and when that happens it benefits good operators like Summit Golf. When times are lean you have to watch costs. Clubs will have to evaluate how they run their businesses and that will bode well for us this year,” said president Kevin Stark.

To handle the growth, the company has brought in Eric Miko to be the director of operations and has hired Julie Reuse as the director of membership and business development. Summit Golf specializes in turn around deals, and the three it just signed are no different.

Intrawest acquires Hawaii’s Big Island Country Club

By ANDREW OVERBECK

SCOTTSDALE, Ariz. — Intrawest Golf has completed its first acquisition in two years with the purchase of Big Island Country Club in Kailua-Kona, Hawaii. The deal includes a Pete and Perry Dye designed 18 hole golf course and all developed and undeveloped real estate around the course.

Although the golf and tourism markets have been volatile of late in Hawaii, Intrawest is confident that the acquisition of Big Island Country Club will be successful.

“It has the same season as Arizona where we have a number of courses,” said marketing manager Ben Keilholtz. “Once you get to May you depend on local traffic, and I think the right now, but it will pick back up,” he said. “If we had gone in at the peak of the market, there might have been some concerns. But to get a return on this asset should be a fairly attainable number.”

Experts urge clubs to tackle turnover problems

By DAVID HUBBARD

By 2006, the hospitality industry will need to add 20 million more workers to cover the anticipated growth — the highest projected for all major industries over the next 10 years.

The search for new employees to effectively handle the growth illustrates another issue, how to manage existing employee turnover rates.

Speaking at the National Golf Course Owners Association Conference (NGCOA) in Phoenix in January, human resource specialists, John Sibbald, president of John Sibbald & Associates, an executive search firm based in St. Louis, Mo., and Catherine Gustafson, Ph.D., University of South Carolina, cited the more significant problems and offered a few solutions.

“Reducing turnover is critical as the losses can be enormous and are both tangible and intangible,” said Gustafson. “Left unchecked, it can cause the loss of consistency and uniformity in the delivery of a business’ products and services, the potential for poor customer service, lost sales, a lowered perception of managerial effectiveness, as well as the time lost in filling vacant positions.”

When the employee turnover rate becomes inordinate to the normal flow of workers in and out of a facility, Sibbald encourages business owners and managers to take a more...

pro-active approach to determine a reasonable and effective turnover rate for their particular operations.

REDUCE TURNOVER

According to Sibbald and Gustafson, the first step is to differentiate between voluntary and involuntary turnover, and to understand who leaves and why. "While employees should be regarded as assets rather than expenses, some positions should simply not be regarded as permanent," said Gustafson. "It is often more cost effective to allow employees in easily filled positions to move on or up. As for the truly stand out employees, promoting from within allows management to create opportunities which in turn reduce the turnover rate."

Sibbald and Gustafson noted that for the great number of seasonal golf club operations, retaining trained and experienced help is particularly aggravating. They suggested that owners be creative in their incentives and recognition programs to encourage their best employees to return.

Hiring the right person for the job at the onset is, of course, the best means to control the turnover rate. In times of employee shortages, managers pressed for time can easily get a little careless in the selection process. Sibbald and Gustafson reiterated the dangers of "labor crisis management" that involves little more than quick interviews without careful reference checks.

"Simply filling positions with warm bodies can lead to the problems that plague the industry," said Sibbald. "Hired in a crisis mode, new employees are not properly introduced to the company, and usually receive only minimal training, creating the situations that lead to their quitting or being involuntarily dismissed."

They suggested seeking new and perhaps non-traditional sources for new employees such as university programs, internships, the aging workforce, and even welfare to work programs and rehab centers.

can reach up to eight feet high. If you hit your ball into a silage field, it’s gone. Our roughs, in some places, reach up to six feet tall."

MAINTENANCE CHALLENGES

The challenge for Strong and his regulators is that the course is played quite often. "We don’t have somebody that manages the course constantly," said Strong. "Members tend to take liberties at times."

For example, there are 20 golf cars on the course owned by individual members. "There are no golf carts provided by the club," Strong explained. "Some golfers will even use John Deere Gators, Quads, ATVs, or - when it is really cold - some will even drive their truck out on the course."

"The constant play makes redesign, maintenance of fairways, changing of tee boxes and everything a real challenge," he continued. "We can’t really shut the course down to maintain it or make changes."

The main five regulators - the big helpers - include: Jerry "Big Daddy" Kirchoff, Ron German, Joe Heath, Larry "Swede" Fagerquist, and Paul Parker. Other regulators include: Jim Davis, David Kuhlman, Steve and Melva Barnett, Nikki Hemel, Bev Kirkoff, and Richard and Teresa Hemel.
