USE READER SERVICE #10
Everyone wants weed-killing power but no one wants a lingering odor that makes being near treated turf an unpleasant experience.

Triplet® Low Odor's unique formulation of 2,4-D, Mecoprop-p and Dicamba delivers the proven triple-whammy you need to control dandelion, clover, henbit, plantains and other broadleaf invaders with deadly certainty. It's perfect for all turf uses, including lawns and golf course fairways, roughs, tees and aprons.

But your nose and eyes will notice the real difference when you open the jug - less odor and a much clearer liquid. The reason is the addition of 2,4-D TIPA, a highly refined ingredient available only from Nufarm.

Make everyone - especially their noses - happy. Use Triplet Low Odor.

Contact a Nufarm representative or your local distributor for more information: 800-345-3330 • www.turf.us.nufarm.com

The business of golf did better in 2004 than it did in 2003, and some are predicting 2005 will be a better year than 2004, although not by much. The bottom line is that business is steady and superintendents will still have to do more with less.

Golf course builders have had to adjust to the changing market as the economy recovers and demand increases. Golf Course News interviews Landscapes Unlimited's Bill Kubly about the state of golf course development.

Hiring qualified workers is not one of superintendents' favorite responsibilities. But they learn from past mistakes staffing their maintenance crews.

Architect Steve Smyers updates an Arnold Palmer-designed course in Florida with additional contours, an improved irrigation system and hillside bunkers.

Recent advances in the understanding of nutrient behavior have put more science into the process. Nitrogen management stands apart from other nutrients in its impact on turfgrass growth.

Superintendents devote a lot of time, money and labor to make bunkers look as natural as possible.

Courses offer tips for coexisting with neighbors.
Don't let your cooler be a water hazard.

The Standard Golf Water Purification System...

safe, pure drinking water anywhere on your course.

Make sure the only water hazards your players encounter are those that are supposed to be there. Standard Golf's Water Purification System will put an end to your drinking water worries. By purifying water at the time and place of use, the Nature Pure® purifier eliminates opportunities for microbiological contamination. Just a few pumps give your players pure, great tasting water all the time. To learn more, contact your Standard Golf Distributor or call 1-866-743-9773 and talk with a factory representative.

Targeting workers

Labor is critical for the success of a golf course, and it’s consistently one of the top concerns for golf course superintendents. Hiring maintenance workers is a challenging aspect of the superintendent’s job, and it becomes more difficult when the labor pool is small or shrinking.

It’s becoming even more difficult to hire quality workers because there’s more supply (golf courses) in the market, fewer people who want to do golf course maintenance work, and competition with other industries such as fast food and retail.

Labor isn’t only an issue for superintendents at the local level, it’s an industrywide concern, which is why industry associations should do something about it.

One solution for superintendents to fill vacancies on their maintenance staffs is to hire foreign workers. Many use the federal H2B program to hire workers that come from Mexico and Central America. Superintendents like these workers because they’re punctual, dependable and work hard. These workers like their jobs in America because they pay more than most of the jobs they can get in their home countries. These foreign workers are filling a need in the marketplace that isn’t being met by Americans.

However, employing foreign workers has its disadvantages. Many of these workers don’t speak English, or if they do, they speak it poorly. And superintendents know how important communication is with their staffs to ensure jobs are done correctly, efficiently and in a timely manner.

Another disadvantage is availability. The federal government puts a limit on the number of H2B workers – 66,000 a year – that can come into the country yearly. Steve Mona, chief executive officer of the Golf Course Superintendents Association, said some GCsAA members in the North have tried to hire H2B workers, but there are none left because they’ve been hired already, mainly because courses in the South prepare for their season earlier than those in the North.

So if superintendents are in need of workers and can’t get any more foreign ones, where are they going to turn? Well, they can look right here in America.

The national unemployment rate has been steady the past few quarters and is at 5.5 percent currently, but there are still many Americans without jobs. Newspapers throughout the country list hundreds of jobs weekly, so it’s frustrating to see the number of people out of work. But for some of those unemployed workers, it’s their own fault because they’re too lazy or they’re too picky about the jobs they want. Granted, they might not be qualified for some.

There are too many people who think they should be working in an office pushing paper making $100,000 a year. Too many Americans are unwilling to do physical labor for a living. It seems to be a thing of the past for many.

Golf course maintenance work isn’t easy. The job entails working outdoors, being on your feet most of the day and getting dirty. On the other hand, some of it, such as cutting grass on riding mowers, isn’t difficult. While it might not be the most glamorous job, it’s good, honest, available work that requires teamwork. It’s a job to be proud of.

Maybe there aren’t many people who think about working on golf courses. But if American workers aren’t coming to superintendents for work, superintendents and the golf industry need to go to American workers. Just like the National Golf Course Owners Association, the Golf Course Builders Association of America and the PGA are trying to encourage more people to play golf, the GCsAA, GCBAA and NGCOA should campaign and encourage more people – young and old – to work on golf courses. Age isn’t an issue, but benefits that can be provided might be.

A public relations campaign is needed to communicate the benefits of this work, such as being on a golf course, working for educated people, learning a craft or trade and possibly having a career in the industry.

Superintendents shouldn’t stop hiring foreign workers. In fact, the H2B program could expand, and some are lobbying for that. But the industry should think about ways to send messages to those American workers looking for jobs that the golf course maintenance industry is a beneficial place to work.

It’s time associations spent money to encourage people to work on golf courses. Some Americans will become better workers, and golf courses might become a little easier to maintain.
START CUTTING.

NOT JUST MOWING.

Or scalping. Or plowing. Cutting is precise. Cutting is exact.

It's about you out there shaping the course one blade of grass at a time. It's the difference between playable and prestigious. A superior course comes from a superior cut. The kind you can always get from a Jacobsen. 1.888.922.TURF or www.jacobsen.com.
