Oasis central irrigation software
- Features visual positioning, imaging and mapping
- Provides a way to locate infield controllers, weather stations or other devices using zoom features
- Allows the user to highlight any controller and launch programming screens, view alerts or use the integrated notepad

Rain Master
golfcourseindustry.com/readerservice #214

X2 Golf personal transporter
- Adaptation of the original model features self-balancing technology
- Includes a golf-bag carrier, scorecard holder and an accessory bar
- Smooth tires and small contact patch with the ground make it turf friendly
- Includes LeanSteer technology, which allows the rider to lean in the desired direction
- Maximum speed is 12.5 mph

Segway
golfcourseindustry.com/readerservice #217

Paspalum turfgrass
- Low-growing, rapidly spreading semidwarf variety
- Can be used on tees, fairways, roughs and greens
- Is salt tolerant and can tolerate most types of alternate water sources
- Often requires less nitrogen and water than other warm-season cultivars
- Does well in cool weather

Sea Isle Supreme
golfcourseindustry.com/readerservice #216

Octane herbicide
- Contains active ingredient pyraflufen ethyl, which when added as a tank-mix with postemergent broadleaf weed herbicides, increases the speed of kill
- Visual herbicidal results are evident within 24 to 48 hours of application
- Gentle on desireable turfgrasses
- Low water solubility and vapor pressure limit its potential off-target movement to sensitive sites
- 2 percent SC

SePRO
golfcourseindustry.com/readerservice #218

Everything for Your Bag.
Find the products and service information you need to make informed buying decisions on GCI Online. Take advantage of product specials and promotions.
www.golfcourseindustry.com/product
Meridian insecticide
- Registered for commercial and residential use on turf
- Controls a spectrum of soil and foliar pests with a wide application window
- Features preventive and curative properties
- Product is suitable for use on trees and shrubs and has a reduced need for watering in after application
- Insects controlled include soil pests such as billbugs, white grubs, Japanese beetles, oriental beetles, and European, Southern and Northern masked chafer; and foliar pests such as aphids, whiteflies, mealybugs and leafhoppers
- Offers control of ants and other insect pests of trees and shrubs
Syngenta
golfcourseindustry.com/readerservice #219

Pro Core processor
- OnePass hitch attaches processor behind three-point aerator
- Powered by a 35-hp Briggs Vanguard engine
- Features a 70-inch processing width
- Full rear roller smoothes turf and eliminates tire tracks on cores or freshly aerated turf
- Carbide tip blades process material into fine particles for even and thorough distribution
- Optional tow hitch allows for operation behind any tow vehicle or tractor
Toro
golfcourseindustry.com/readerservice #220

Platinum TE paspalum turfgrass
- Exhibits high salt tolerance and proven performance with proper management
- Demonstrates general foliar disease resistance
- Fine leaf blade and tight internode spacing create a compact canopy surface
- Features growth performance and sustainability, even in low-light-intensity conditions
- Dark green cultivar lends to striping capability
- Provides ideal ball setup and puttability
Turf Ecosystems
golfcourseindustry.com/readerservice #222

LS-22 overseeder
- Designed to deliver maximum seed germination
- 1.5-inch blade spacing and microscrew depth adjustment provides quick, accurate blade adjustments
- Seed window allows the user to reference seed levels
- Lower spring tension in the blade clutch bail reduces the hand pressure required for operation
- The most often-used controls are on the handle within easy reach of the operator
Turfco
golfcourseindustry.com/readerservice #221

Lower Your Handicap.

Golf Course Industry Online helps you overcome daily challenges with business resources for maintaining your course at the highest level. Application schedules, newsletter articles, and budget and personnel forms are just a few of the tools you’ll find to help you with your daily tasks.

GO Online helps you overcome daily challenges with business resources for maintaining your course at the highest level. Application schedules, newsletter articles, and budget and personnel forms are just a few of the tools you’ll find to help you with your daily tasks.
www.golfcourseindustry.com/tools/businessforms
The key to any successful business is the effective management of revenue, costs and of course, profitability. This book provides golf course superintendents with the necessary tools to manage their daily financial operations by explaining basic accounting principles such as pricing, budgeting, cost control, payroll and cash flow.

Human Resource Management for Golf Course Superintendents

$40
Robert A. Milligan, Thomas R. Maloney.
Every aspect of golf course management is covered. Learn how to improve your planning abilities, build leadership and communication skills, maximize employee performance, select and train new employees, and conduct employee performance evaluations. Using the principles in this book will help you effectively manage any golf facility.

Applied Turfgrass Science and Physiology

$80
Jack Fry, Bingru Huang
Applied Turfgrass Science and Physiology illustrates topics with research results from peer-reviewed scientific journals to provide insight into how principles and techniques work in real-world practice. Case studies help reinforce material for students as well as professionals seeking to advance their careers.

The Superintendent’s Guide to Controlling Putting Green Speed

$65
Thomas Nikolai
It is critical for golf course superintendents to know the factors that impact green speed. This book covers every aspect of green speed maintenance including playability, environmental considerations, mowing and pest management. It also provides practical decision-making advice relative to financial and budgeting issues.

This year, *Golf Course Industry* is publishing feedback from golfers throughout the United States. We’re conducting this research to establish a dialogue between the professional community and golfers. On this page, we’ll report trends, likes/dislikes, suggestions and other information we gather through our face-to-face, Web-based and phone research.

The lines are open

Communicating with golfers is a popular topic among golf course superintendents. During educational sessions and seminars throughout the country, speakers and superintendents have stressed the importance of managing golfer expectations. Communication is necessary to do that, and is probably more common at private clubs than public golf courses. For many superintendents, it’s the most difficult and least desirable part of their job.

But communication is supposed to be a two-way street, so to speak. We asked golfers about communicating with golf course maintenance professionals and other golf facility managers. Below are charts that show how often golfers approach a golf course manager and shed light on how important they view talking to you.

A random sample of golfers throughout the country were surveyed by InsightExpress, a market research company. Golfers surveyed play at least five rounds a year.

Have you discussed any changes (improvements) you would like to see at the course you most frequently play golf? If so, with whom?

- **41%** Never suggested changes/improvements
- **25%** Fellow player/member
- **21%** Pro shop
- **20%** Golf pro
- **16%** General manager
- **16%** Superintendent
- **6%** Green chairman
- **4%** Other

Total responses: 198  Source: GCI research

How often do you talk with the golf course superintendent or other maintenance professional at your primary course?

- **At least once a week** 16%
- **Never** 31%
- **Once a month** 29%
- **Once a year** 13%
- **Less than once a year** 10%

Total responses: 198  Source: GCI research

Who's telling your story?

Your work results in more available oxygen and fewer allergens, noise reduction and lower cooling bills, thicker turf that filters pollutants and landscapes that increase property values. There are endless environmental, economic and lifestyle benefits that green spaces provide—yet consumers don’t know about them. They don’t understand the true value of your products and services.

Join us in telling the whole story of what you do. Project EverGreen is an organization dedicated to educating the public about the value of green spaces and encouraging responsible practices.

To make a contribution or find out more, call 877-758-4835 or visit www.projectevergreen.com.
Positive ID

The Lakewood Country Club in Rockville, Md., was completely renovated about two years ago under the watchful eyes of Christopher Ayers, CGCS, and Mark McGreevy, assistant superintendent.

An extensive subsurface drainage piping system was installed throughout the course, and the outfall drains became clogged and were hard to find. McGreevy found that the as-built drainage blueprints weren't always correct about which specific area drained into a particular outfall pipe.

To make it easier to find the outfall pipes in the native-grass areas, wooden hazard stakes were made and used as markers. A drill-mel tool engraved the stakes to signify the specific areas with abbreviations of what area was being drained. For example, 17G + LB + RB + BSN stands for the 17th green, left bunker, right bunker and catch basin. Then the stakes were painted blue.

Some of the outfall pipes drain only one area. Other larger pipes drain as many as 10 different areas. The pipes also can be triangulated off of the closest sprinkler heads on the as-built irrigation blueprints. There were about 40 outfall pipes that were marked in the nonmaintained native grass areas.

McGreevy has since moved on and is the golf course superintendent at Wyncote Country Club in Oxford, Pa.

“Browns” not greens

The Mesaieed Golf Club in Doha, Qatar, is one of the few all-sand golf courses left on the planet. The first nine holes were built in 1952, and the second nine were built in 1979. The club, which is owned and operated by Qatar Petroleum, measures 6,645 yards and plays to a par 71 with two sets of tee markers.

The “browns,” which are more than two feet deep, are built using straight, fine-grade dune sand from the Arabian Gulf. They’re oiled once a year in mid-summer during the off season using 270 to 400 gallons of raw, crude oil per green. The greens take six to nine weeks to dry. The maintenance staff rakes the greens each morning prior to play and a “greenkeeper” is positioned next to three or four greens that are close to each other so he can rake the greens after each group putts out. The hole locations are changed once a week.

The sand bunker surrounds also are oiled at the same time as the “browns.” The club doesn’t allow members or guests to hit shots from the bunker surrounds, so a rope is placed on the top of each slope. If a ball lands on the sand side of the slope, the golfer gently nudges the ball, forcing it to roll down the hill, and then it’s played as it lies. The same procedure is used on the other side of the rope. The mason bunker sand is raked daily.

The fairways used to be oiled once annually, but it hasn’t been done since 1990 because of environmental reasons. The edges of the fairways are defined by 12-ounce, aluminum soft drink cans filled with concrete. A large nail is positioned in the concrete, then it’s placed in the turf to keep the can upright.

If golfers’ shots land in the fairway, they hit off of an 18-inch-by-18-inch artificial turf mat. If they land in the rough, they play it as it lies. Most members and guests walk and carry their clubs or use “trolleys.” There are two “buggies” for those players who can’t walk.

The trees have drip irrigation bubblers that are programmed to water each tree two times per day in the summer and once during the winter.

Viswanathan, who is a native of India, has been the golf course superintendent for the past 27 years.
of the CMAA as a reason for the increase.

The addition of the CMAA brought together many golf course managers, owners and superintendents at the show for the first time.

"One golf course manager said to me, 'We joined the NGCOA when we found out you guys were working together,'" says Jim Singerling, c.e.o. of the CMAA, adding he's heard
